Learning & Knowledge Suite: Build Specification (v3)

For the AI engineer building the product. Read this sheet first, then follow the order below.

1. What you are building

A learning platform for companies in any service industry. Every employee is mapped to a role; every role has required skills; every skill has a test. Test results give each person a level (0 to 5) and a rank for each skill. From the gaps the system builds a learning pathway, tracks participation and reminds until it is finished. Pathways link to internal career moves (up and sideways) and to certificates. Courses are generated with AI, some with AR or interactive simulation. Gamification and live leaderboards keep people engaged; reports can be exported; every workflow can be manual, automatic or hybrid; mandatory training such as POSH and DPDP can be proctored. A completely separate module, the Knowledge Hub, lets any team store, find, review and control SOPs, policies and company data, with versions, reminders, owner-controlled access and leader dashboards.

2. How to use this workbook

Sheet	What is in it	How you use it
01 Core Flow	The whole loop in 14 steps: who does what, what is automatic, what can be done by hand	Start here
02 Requirements	Every feature as a requirement with a test you can run (acceptance criteria), priority and screen	Your to-do list
03 Workflows	25 workflows, step by step, with default mode (manual, automated or hybrid)	Build the workflow engine from this
04 Skills Rules	Score to level table, ranking, gap, availability, pathway and career rules (the maths)	Rules the code must follow
05 to 08 (library)	247 skills, 187 roles for 15 industry groups, 1,871 role-skill requirements, 185 career moves	Seed data to load into the database
09 Assessment & Proctoring	Skill tests, proctoring levels, mandatory training, certificates	Build the test and certificate engines
10 AI Courses & AR	AI course pipeline, video, AR and interactive simulation, scenario file format	Build the AI studio
11 Gamification & Leaderboards	Points, levels, badges, challenges, real-time leaderboards	Build engagement features
12 Invites & Reminders	Invitations for scheduled sessions; completion reminders at a convenient time	Build notifications
13 Reports	32 standard reports with fields, filters and exports	Build the reports centre
14 Knowledge Hub	Design of the separate module: Library view, versions, reminders, access, dashboards	Build second, in parallel
14a to 14d (Hub)	44 requirements with tests; types and categories; 164 demo items; demo leader and function dashboard with live formulas	Requirements, lookup tables and expected numbers
15 to 19 (demo)	A working demo company: 36 employees, tests, levels, ranks, gaps, pathways, careers	Test data and a model that shows the expected numbers
20 Data Model	The records and fields	Create the database

21 AI & Security	AI guardrails, privacy, security and legal rules	Non-negotiable rules
22 UI Screens	Every screen with its purpose and the UI deck slide	Build the front end
23 Build & Tests	Build order, suggested stack and 20 end-to-end tests	Plan and verify
24 References	External facts used, with links	Check when unsure

3. Golden rules (apply to every screen and every feature)

Rule	What it means	Type
1. One main action per screen	Each screen has one big primary button. Everything else is secondary.	UI rule
2. Plain words	Say "Start learning", not "Initiate module". No jargon. Short sentences. Hindi and English.	UI rule
3. Always show what is next	Every home screen shows the next best step. No dead ends.	UI rule
4. Safe by default	Confirm before anything is sent to many people; show a preview; allow undo for 10 minutes.	UX safety
5. Humans decide	AI drafts and suggests. People approve content, scores in doubt, proctoring flags and certificates.	AI rule
6. Everything can be done by hand	Any automatic step has a manual way, and every workflow can be set to Manual, Automated or Hybrid.	Workflow rule
7. Everything is logged	Overrides, exports, deletions, role changes and approvals are written to the audit log.	Security rule
8. Settings, not hard-coded numbers	Every default in this workbook (thresholds, hours, caps, retention) lives in a settings table.	Engineering rule
9. Mobile first, accessible	Design for a low-cost phone first. Meet WCAG 2.1 AA.	UI rule
10. Privacy first	Collect only what is needed; show clear notices; follow the data-privacy rules in sheet 21.	Legal rule

4. Words used in this workbook

Word	Meaning	
Role	A job. Every employee has one primary role.	
Skill	One thing a person must be able to do. A role needs 10 to 16 skills.	
Level	0 to 5: none, awareness, working, proficient, advanced, expert. Level 3 is role-ready for most roles.	
Required level	The level a role needs for a skill.	
Gap	Required level minus current level, never below zero.	
Stack rank	Position of a person among all tested people for one skill (rank, out of how many, percentile).	

Pathway	A person's learning plan: waves of 3 skills; each skill has four steps: learn, practise, connect, prove.	
Career map	Next roles a person could move to (vertical = promotion, lateral = sideways) with readiness.	
Certification course	A course that ends in a pass mark and a certificate that can be verified.	
Workflow mode	Manual (a person does it), Automated (the system does it), Hybrid (the system does it after a person approves).	
MVP, V2, V3	Priority. MVP first, then V2, then V3.	

Everything in the demo sheets (15 to 19) is invented test data. Real people and companies are never used for development or testing.

Core Flow: the whole loop

From employee to role to skills to test to rank to pathway to career to certificate, and back again.

Step	What happens	The system does automatically	A person can do it by hand	Screen	Requirements	Workflow
1	Load employees and map each to a role	Validates the file, matches roles, suggests roles for unknown titles, creates users and sends login links.	Admin picks a role for each person from the list.	A-02	SKL-01, SKL-02	W-01
2	Each role has required skills and levels	Preloaded for 187 roles; each person's skill profile is created from the role.	Admin edits skills and required levels for any role.	A-03	SKL-03, SKL-04	W-02
3	Every skill has a skill test	AI drafts questions from the skill definition; an expert approves; tests are built at random per person.	Expert writes or edits questions by hand.	A-04	SKL-05, SKL-06	W-03
4	Employees take the test	Invitation and reminders; one question per screen; proctoring level as chosen.	Admin sends invitations by hand; an invigilator can run a test in person.	L-04	SKL-13, SKL-15	W-03
5	Score becomes a level, and people are stack-ranked skill by skill	Converts score to level 0 to 5; ranks everyone for each skill; shows rank, out of how many and percentile.	Manager can adjust a level by one with a reason.	A-04, M-02	SKL-07, SKL-09, SKL-10	W-03
6	Gaps and skills availability are calculated	Gap = required minus current; leaders see demand, qualified, experts, risk and route.	Leaders override the suggested route.	M-02	SKL-11, SKL-12	W-14
7	A learning pathway is created for each person	Ranks gaps, makes waves of 3 skills, four steps each (learn, practise, connect, prove), with hours and weeks.	Manager or admin edits or builds a pathway by hand.	L-02	PTH-01, PTH-02	W-04
8	Courses are AI-generated; some have simulations; some are certification courses	AI drafts course, quiz, video and simulation; experts approve; certification courses add pass mark and certificate.	Authors build or edit any course by hand.	A-05, L-03	CRS-01 to CRS-12	W-05, W-06
9	Participation is tracked and people are reminded until complete	Tracks each step; sends invitations for scheduled sessions only; sends completion reminders at a convenient time for self-paced learning; escalates after the due date.	Admin or manager sends reminders with Run now.	L-02, A-06, A-07	PTH-04, PTH-05, LIV-03, LIV-04	W-07, W-09
10	Mandatory training is proctored; certificates are issued	Assigns POSH, DPDP and others by rule; proctoring flags go to a human; certificates (PDF and verifiable credential) are issued, renewed and can be revoked.	HR assigns and an invigilator runs tests in person.	L-06, A-09	CMP-01 to CMP-12	W-11, W-12
11	Re-test updates level, rank, points, badges and leaderboards in real time	After the learning steps the person is re-tested; boards update within 5 seconds.	Admin awards or removes points with a reason.	L-08, L-09	PTH-08, ENG-01 to ENG-07	W-15
12	Career map shows internal roles to grow into	Shows vertical and lateral options with readiness, skills to close and weeks; one click adds the target to the pathway; ready people are told about openings.	Manager and employee agree a target in a 1:1.	L-07	PTH-09 to PTH-12	W-13
13	Reports and dashboards at every step; export on demand	Real-time tiles; 32 standard reports; export to Excel, CSV, PDF; schedules.	Anyone with access can run and export a report.	A-01, A-08	RPT-01 to RPT-08	W-16
14	Knowledge Hub supports every step (separate module)	SOPs, policies and company data live in the Knowledge Hub: one Library view by type and category, owners, versions, review reminders and escalation, access controlled by owners, and leader and function dashboards. Items can link to skills and courses.	Anyone can add or find knowledge without using the learning system.	K-01 to K-13	KNW-01 to KNW-44	W-17 to W-25

Requirements

Build to these. Each has a test (acceptance criteria). Knowledge Hub requirements (KNW) are in sheet 14a.

ID	Module	Requirement (what the system must do)	Acceptance criteria (how to test it)	Priority	Screen
LRN-01	Learner app	Learner home shows one clear "Next step" card for the most important pending item.	A learner with pending items sees exactly one primary card; tapping it opens the item. With nothing pending it says "You are up to date" and offers one optional item.	MVP	L-01
LRN-02	Learner app	Course catalogue with search and filters (skill, role, format, language, length).	Search returns results in under 1 second for 5,000 courses; filters combine; no-result page suggests alternatives.	MVP	L-05
LRN-03	Learner app	Lesson player: video with captions, speed control, resume from last position, documents, quizzes.	Closing and reopening resumes within 10 seconds of where the learner stopped, on any device.	MVP	L-03
LRN-04	Learner app	Progress is saved automatically and a lesson can only be marked complete when its rules are met (for example 90% watched, quiz passed).	Skipping to the end does not complete a lesson that requires 90% watched.	MVP	L-03
LRN-05	Learner app	Import SCORM 1.2 and 2004 packages; store learning activity as xAPI statements.	A sample SCORM package launches, tracks completion and score, and shows in reports.	MVP	L-03
LRN-06	Learner app	Mobile-first web app (installable) that works well on low-cost phones.	Home, My Path and lesson screens load in under 3 seconds on a typical 4G connection.	MVP	L-01
LRN-07	Learner app	English and Hindi interface; content language switch per course.	Switching language changes every label with no missing text; courses show available languages.	MVP	L-01
LRN-08	Learner app	Meet WCAG 2.1 AA: captions, keyboard use, screen-reader labels, colour contrast, text resize.	Automated accessibility scan passes; manual keyboard-only test completes a course.	MVP	All
LRN-09	Learner app	One-tap rating and feedback after each course.	Feedback saved with course version; visible to course owner.	MVP	L-03
LRN-10	Learner app	Offline download of lessons for frontline staff.	A downloaded lesson plays offline and syncs progress when back online.	V2	L-03
SKL-01	Skills and tests	Bulk upload of employees (CSV or Excel) with name, work email or mobile, role, manager, location and joining date.	A 10,000-row file is validated in under 5 minutes; every error is shown with its row number; nothing imports until the admin confirms.	MVP	A-02
SKL-02	Skills and tests	Every employee is mapped to one primary role (and optionally a second role).	Tests cannot be launched for an unmapped employee; the admin sees an "Unmapped people" list with a one-click fix.	MVP	A-02
SKL-03	Skills and tests	Role library preloaded with 187 roles across 15 industry groups; admin can add, clone and edit roles and required levels (0 to 5).	Editing a role creates a new version; people on the old version keep their history.	MVP	A-03
SKL-04	Skills and tests	Skill library preloaded with 247 skills; admin can add skills with definition, criticality and level descriptors.	A new skill appears in role editing and test building immediately.	MVP	A-03
SKL-05	Skills and tests	Every skill has a skill test (question bank): AI drafts the questions, an expert approves them.	A skill cannot be added to a campaign until it has at least 40 approved questions (10 per level band).	MVP	A-04
SKL-06	Skills and tests	Question types: multiple choice, situational judgement, short written (AI-scored against a rubric), practical or work-sample upload; simulation and adaptive tests later.	Each type renders and scores correctly; written answers show a confidence level; low-confidence answers go to an expert.	MVP	L-04
SKL-07	Skills and tests	Test score (0 to 100) converts to a level (0 to 5) using a settings table.	Changing a threshold in settings changes levels on the next scoring run; past results keep their original level unless re-scored by choice.	MVP	A-11
SKL-08	Skills and tests	Retake rules: default one retake after 7 days, best score counts, at most 3 attempts per quarter.	The fourth attempt in a quarter is blocked with a clear message; values are configurable.	MVP	L-04
SKL-09	Skills and tests	A manager can confirm a level or change it by at most one level with a written reason and evidence.	Changing by two levels is blocked; every change is in the audit log.	MVP	M-02
SKL-10	Skills and tests	Stack-rank employees for every skill: rank, out of how many, and percentile; filter by team, location and role.	Two people with equal scores share a rank; a manager sees only their own team.	MVP	A-04

SKL-11	Skills and tests	Gap is calculated automatically: required level minus current level, never below zero.	For any person the gap list matches the formulas in the demo workbook.	MVP	L-02
SKL-12	Skills and tests	Skills availability view (demand, qualified, experts, near-ready, coverage, risk flag, suggested route).	The demo data reproduces the numbers in the demo availability sheet exactly.	MVP	M-02
SKL-13	Skills and tests	Assessment campaigns: choose people, skills, dates and proctoring level; start, remind and close automatically.	A campaign sends invitations on the start date and locks on the end date.	MVP	A-04
SKL-14	Skills and tests	Manual override of any score or level with a reason, always logged.	The audit log shows who, when, old value, new value and reason.	MVP	A-04
SKL-15	Skills and tests	Test integrity basics: random questions and order, time limit, one question per screen, copy and paste blocked in tests.	Two attempts by the same person show different questions or order.	MVP	L-04
SKL-16	Skills and tests	Re-assessment is scheduled yearly and on role change or pathway completion.	A role change creates a re-assessment task for new required skills within 1 day.	V2	A-04
PTH-01	Pathways	After levels are set, every employee gets a learning pathway: gaps ranked by priority, grouped in waves of 3 skills, four steps each (learn, practise, connect, prove), with hours and weeks.	The pathway for each demo employee matches the demo pathway sheet.	MVP	L-02
PTH-02	Pathways	Manager approval of pathways is a setting; compliance pathways are auto-approved.	With approval on, a pathway stays "Awaiting manager" until approved; reminders to the manager follow the rules.	MVP	M-03
PTH-03	Pathways	Pathway shows progress, next step, due dates and updates live.	Finishing a lesson updates the pathway percentage within 5 seconds.	MVP	L-02
PTH-04	Pathways	Track participation per step: started, percent complete, time spent, last active, passed.	Reports show these fields for every step and person.	MVP	L-02
PTH-05	Pathways	Reminders continue until each step is complete, then stop (see sheet 12).	No reminder is sent after completion; the log shows every reminder sent.	MVP	L-02
PTH-06	Pathways	Pathway re-plans when new results, a role change or new content arrive; finished steps are kept.	A new test result changes only open steps.	MVP	L-02
PTH-07	Pathways	Connect step matches an in-house expert (level 4 or above) or shows an external-mentor placeholder.	The suggested expert is never the learner; experts can decline.	V2	L-02
PTH-08	Pathways	Prove step re-tests the skill; if the level is reached the profile, rank and badges update.	Passing the re-test raises the level and moves the person up the rank list.	MVP	L-04
PTH-09	Career map	Career map shows vertical and lateral next roles visually, with readiness (tested skills only), skills to close, skills still to test and estimated weeks.	For a demo employee the readiness numbers match the demo pathway sheet.	MVP	L-07
PTH-10	Career map	Admin can edit career paths (from role, to role, vertical or lateral); 185 sample moves preloaded.	A new path shows on the career map of everyone in the from-role.	MVP	A-03
PTH-11	Career map	"Add to my pathway" builds a pathway for the target role and merges it with the existing one.	Duplicate skills appear once; the earliest due date is kept.	MVP	L-07
PTH-12	Career map	Internal opportunities: HR posts an opening; employees at or above a readiness threshold (default 70%) are told they may be a fit and can express interest.	Only people above the threshold are notified; HR sees the interested list.	V2	L-07
PTH-13	Pathways	Export an individual development plan (PDF) for 1:1 conversations.	PDF contains levels, gaps, steps, dates and career options.	V2	M-01
CRS-01	AI courses	Create a course from a document, SOP, web page, recording or topic: outline, lessons and quiz.	A 20-page document produces an outline in under 2 minutes and a full draft in under 10 minutes.	MVP	A-05
CRS-02	AI courses	Every factual statement carries a source; an expert must approve before publish; an "AI-assisted" tag shows to admins.	Publishing is blocked until an expert approves; statements without a source are flagged.	MVP	A-05
CRS-03	AI courses	Course types: self-paced, microlearning (5 minutes or less), live or cohort, certification, simulation.	Each type has its own template and rules (for example certification needs a pass mark).	MVP	A-05

CRS-04	AI courses	Auto-create narrated-slide video with captions in English and Hindi.	A published lesson has a video, captions in both languages, and an AI label.	MVP	A-05
CRS-05	AI courses	Optional avatar-presenter video with consent record and AI label.	An avatar cannot be chosen without a consent record.	V2	A-05
CRS-06	AR and simulation	AI drafts a simulation from a process or SOP as a scenario file: steps, objects, correct actions, common mistakes, scoring.	The scenario file validates against the schema in sheet 10; an expert can edit it in a simple editor.	MVP	A-05
CRS-07	AR and simulation	One scenario file runs in three modes: (A) 2D interactive with photos or 360 views, on every device; (B) 3D object and place-in-room AR on supported phones; (C) guided AR tasks on supported devices.	Mode A works on every test device; mode B uses browser AR on Android and AR Quick Look on iPhone; unsupported devices fall back to mode A automatically.	A: MVP, B: V2, C: V3	L-03
CRS-08	AR and simulation	Simulation scoring: correct steps, order, time, mistakes; pass mark; replay with feedback; result becomes skill evidence.	A failed run shows which step was wrong and why; passing adds evidence to the skill.	MVP	L-03
CRS-09	AR and simulation	Asset library: generic 3D assets plus company uploads (glb and usdz), with a size cap and review.	A 12 MB file is rejected with a clear message; approved assets are reusable.	V2	A-05
CRS-10	AR and simulation	Starter simulation templates by industry (see sheet 10).	Each template can be cloned and edited.	MVP	A-05
CRS-11	AI courses	Course versioning, review date, expiry, and a "needs update" alert when the source changes.	Changing a linked knowledge article flags the course.	V2	A-05
CRS-12	AI courses	Certification course setting: pass mark, proctoring level, certificate template, validity, renewal.	A course marked certification cannot publish without all five settings.	MVP	A-05
CRS-13	AI courses	Question bank per learning objective with difficulty tags; item analysis after use flags weak questions.	Questions that almost everyone gets right or wrong are flagged for review.	V2	A-04
CRS-14	AI courses	Accessibility and brand checks on every course (captions, contrast, alt text, template).	A course failing a check shows what to fix.	MVP	A-05
CRS-15	AI courses	Cost cap per company and a record of every AI job.	Hitting the cap stops new jobs and warns the admin; each job shows cost and reviewer.	MVP	A-11
LIV-01	Sessions	Schedule a session: date, time, length, capacity, trainer, mode (online, in person, hybrid), audience by role, team or skill gap.	The session shows on every invited person's home and calendar.	MVP	A-06
LIV-02	Sessions	Create the meeting through Zoom, Teams or Google Meet; if not connected, paste a link.	A session always has a valid join link before invitations go out.	MVP	A-06
LIV-03	Sessions	Scheduled sessions send an invitation (email and calendar file, WhatsApp if allowed) with Accept and Decline; reminders go only to those who accepted.	Declined people receive no reminders; RSVPs show live to the trainer.	MVP	A-06
LIV-04	Sessions	Self-paced courses never send invitations; they send completion reminders only, at a convenient time (sheet 12).	A self-paced assignment produces zero invitations and reminders only inside the learner's window.	MVP	A-06
LIV-05	Sessions	Waitlist and automatic seat release.	When someone declines, the first waitlisted person is offered the seat within 1 minute.	MVP	A-06
LIV-06	Sessions	Attendance capture with a credit threshold (default 75% of duration) and trainer override with reason.	A person who joins for 60% is not credited unless the trainer overrides, and the override is logged.	MVP	A-06
LIV-07	Sessions	Recording becomes a lesson with transcript, summary, chapters and quiz after trainer review.	A recording appears as a draft lesson within 1 hour of the session ending.	MVP	A-06
LIV-08	Sessions	In-person sessions: venue and QR check-in.	Scanning a QR code at the venue records attendance.	V2	A-06
LIV-09	Sessions	Reschedule or cancel updates invitations and calendars automatically.	Calendar events change for every attendee within 5 minutes.	MVP	A-06
ENG-01	Gamification	Points ledger: every learning event earns points under written rules, with daily caps and anti-gaming checks.	The same lesson repeated does not earn points twice; caps are enforced.	MVP	L-09
ENG-02	Gamification	Five levels, streaks, at least 25 badges and team challenges (see sheet 11).	Earning a badge shows a celebration screen and appears on the profile.	MVP	L-09

ENG-03	Leaderboards	Individual, team, department and location boards for the metrics in sheet 11, with time windows (today, week, month, quarter, all time).	After a lesson is completed, the board changes within 5 seconds without refreshing.	MVP	L-08
ENG-04	Leaderboards	Name display setting: full name, first name and initial, or anonymous; individual opt-out of public display.	An opted-out person still counts in team totals but shows as "A colleague".	MVP	L-08
ENG-05	Leaderboards	Fairness: boards by role family, a "most improved" board, and department-level only for compliance (no individual shaming).	The compliance board shows no individual names.	MVP	L-08
ENG-06	Leaderboards	Admin live dashboard of critical L&D metrics that refreshes automatically.	Tiles update within 5 seconds of an event.	MVP	A-01
ENG-07	Gamification	Admin settings: points values, badge rules, switch off per course or team.	Turning gamification off for a course removes its points and badges.	MVP	A-10
ENG-08	Gamification	Rewards catalogue: redeem points for admin-defined rewards.	Redeeming deducts points and records the reward.	V2	L-09
ENG-09	Leaderboards	Manager can cheer or nudge a team member from the team board.	The message reaches the person once and is logged.	V2	M-01
CMP-01	Compliance	Mandatory programmes (POSH, DPDP, information security, code of conduct, safety) assigned by rule at joining and every year.	A new joiner is assigned all mandatory programmes within 1 day; due dates follow the rule.	MVP	A-07
CMP-02	Proctoring	Three proctoring levels (Basic, Standard, Strict) chosen per test (sheet 09).	Each level turns on exactly the checks listed for it.	MVP	A-09
CMP-03	Proctoring	Notice and consent screen before proctoring; an in-person alternative for anyone who cannot or will not use the camera.	A person who declines consent is offered the alternative and is not penalised.	MVP	L-06
CMP-04	Proctoring	Device and camera check before the test; ID check later.	The check blocks the test if the camera is unavailable (Standard and Strict).	MVP	L-06
CMP-05	Proctoring	Integrity signals create flags with timestamp and snapshot: tab switch, copy and paste, extra face, no face, device change, long idle.	Each signal appears in the review queue with its evidence.	MVP	A-09
CMP-06	Proctoring	A person reviews flags; the system never fails someone on an automatic flag alone; the learner can appeal.	A flagged attempt stays "Pending review" until a reviewer decides.	MVP	A-09
CMP-07	Proctoring	Proctoring images and video are deleted after 30 days (setting); evidence for open cases is kept until closed; access is restricted and logged.	A scheduled job removes expired media and logs the deletion.	MVP	A-09
CMP-08	Proctoring	Question pool at least twice the test length; random order; no repeats across attempts.	Two attempts never share more than 20% of questions.	MVP	A-04
CMP-09	Certification	On passing a certification course, issue a PDF certificate and a verifiable digital credential (Open Badges 3.0) with a QR verification page, validity and expiry.	Scanning the QR code opens a page showing name, course, date, validity and status.	MVP	L-06
CMP-10	Certification	Renewal: reminders at 60, 30 and 7 days before expiry and automatic assignment of the renewal course.	An expiring certificate triggers all three reminders and the assignment.	MVP	L-06
CMP-11	Compliance	Audit pack export for POSH and other mandatory programmes: programmes held, dates, attendance, completion, certificates.	The export opens in Excel and totals match on-screen numbers.	MVP	A-08
CMP-12	Compliance	Non-completion escalation: learner, then manager, then department head, by rules.	Escalation steps and dates follow the rule set and are logged.	MVP	A-07
WFL-01	Workflows	Every workflow has a mode: Manual, Automated or Hybrid (automatic with human approval). The admin switches it per workflow.	Changing a workflow to Manual stops all automatic sends within 1 minute.	MVP	A-07
WFL-02	Workflows	Simple builder: When (trigger), If (conditions), Then (actions), Approval (optional).	An admin with no training builds the "new joiner" workflow in under 5 minutes.	MVP	A-07
WFL-03	Workflows	Triggers: new joiner, role change, test completed, level changed, due date near or passed, course completed, certificate expiring, session scheduled, a schedule, a button.	Each trigger can start a workflow in testing.	MVP	A-07

WFL-04	Workflows	Actions: assign, remind, notify manager, create pathway, schedule session, issue certificate, award points, create report, escalate, call a web address.	Each action runs and is logged.	MVP	A-07
WFL-05	Workflows	"Run now" for any workflow on chosen people, with a preview before anything is sent.	The preview lists who gets what; nothing is sent until the admin confirms.	MVP	A-07
WFL-06	Workflows	Safeguards: dry run, daily send caps, quiet hours, 10-minute undo for assignments, kill switch.	Pressing the kill switch stops all queued messages.	MVP	A-07
WFL-07	Workflows	Run history and audit log; failed steps can be retried.	A failed step shows the reason and a Retry button.	MVP	A-07
WFL-08	Workflows	Ready-made templates for every workflow in sheet 03.	Each template can be turned on with default settings in one click.	MVP	A-07
RPT-01	Reports	Reports centre with at least 25 standard reports (sheet 13).	Every report in sheet 13 opens with demo data.	MVP	A-08
RPT-02	Reports	Export to Excel, CSV and PDF; large exports run in the background and email a link.	A 100,000-row export finishes without timing out.	MVP	A-08
RPT-03	Reports	Filters, saved views and schedules (daily, weekly, monthly).	A scheduled report arrives at the set time with the saved filters.	MVP	A-08
RPT-04	Reports	Access by role: managers see their team, admins see all, auditors read only.	A manager cannot open another team's report even with the link.	MVP	A-08
RPT-05	Reports	Real-time dashboards with drill-down to the list of people.	Clicking a tile shows the people behind the number.	MVP	A-01
RPT-06	Reports	Custom report builder: choose fields, filters and grouping.	A report built by choosing fields can be saved and scheduled.	V2	A-08
RPT-07	Reports	Every export carries who generated it, when, filters used and a data dictionary.	The first sheet of every Excel export has these details.	MVP	A-08
RPT-08	Reports	Exports containing personal data are watermarked and logged.	The export log lists each export with user and time.	MVP	A-08
ADM-01	Admin	Roles: learner, manager, L&D admin, content author, expert reviewer, proctor reviewer, report viewer, super admin; MFA for admin roles.	A learner cannot open any admin page by typing the address.	MVP	A-11
ADM-02	Admin	Multi-company setup with branding and separate data per company.	A user from company A can never see company B data.	MVP	A-11
ADM-03	Admin	Notification settings: templates, quiet hours, channels, languages.	A change to quiet hours applies to the next send.	MVP	A-11
ADM-04	Admin	Integrations: calendar, meeting tools, email, WhatsApp provider; HR system sync and single sign-on later; open API and webhooks.	A webhook fires on course completion in testing.	V2	A-11
ADM-05	Admin	Audit log of important actions.	Role changes, overrides, exports and deletions all appear with user and time.	MVP	A-11
ADM-06	Admin	Data export, deletion and anonymisation on request.	A deletion request removes personal data but keeps anonymous totals.	MVP	A-11
ADM-07	Admin	Settings page for thresholds, planning defaults, points, proctoring defaults and retention.	Every default named in this workbook is editable here.	MVP	A-11
ADM-08	Admin	Usage and health monitoring.	An admin sees errors and slow screens for the last 24 hours.	V2	A-11

108 requirements: 92 MVP, 15 V2, 1 V3 (or mixed phases such as CRS-07). Filter by Priority to plan sprints. Screen IDs match sheet 22 and the UI deck.

Workflows

25 workflows. Each has a default mode and a manual way. AI never approves its own work.

A. Modes (set per workflow in the admin screen)

Manual: a person does every step from the screen; the system only records. Automated: the system does every automatic step without waiting; people are only notified. Hybrid: the system prepares and runs steps but pauses at each Review or Approve step for a person (default for most workflows). Every automatic step can also be done by hand, and a kill switch stops all automatic sends.

B. Workflow summary

ID	Workflow	Steps	How it runs	Default mode	Module
W-01	Employee upload and role mapping	8	Manual: Admin uploads a file and fixes errors on screen; roles are chosen by hand from the list. Automatic: System checks every row, suggests roles for unknown titles, and creates users; admin only confirms.	Hybrid	Skills and tests
W-02	Role skill profile setup	7	Manual: Admin picks a role and edits skills and levels by hand. Automatic: AI proposes the profile from the job description; manager and HR approve.	Hybrid	Skills and tests
W-03	Skill assessment campaign: test, level, stack rank	13	Manual: Admin chooses people and skills and sends the campaign; experts and managers confirm results. Automatic: System builds tests, invites, scores, converts scores to levels and ranks employees; humans review exceptions.	Hybrid	Skills and tests
W-04	Learning pathway: create, track and complete	13	Manual: Admin or manager builds or edits a pathway by hand; steps are marked complete by the person or the trainer. Automatic: System builds the pathway from gaps, tracks every step from learning events and reminds until done.	Hybrid	Pathways
W-05	AI course creation (with simulation option)	11	Manual: Author builds or edits the course by hand and uses AI only for single pieces. Automatic: AI drafts outline, lessons, quiz and simulation from a source; experts approve.	Hybrid	AI courses
W-06	AI video from a lesson	10	Manual: Admin writes the script and uploads a video by hand. Automatic: AI writes the script, builds slides, voice and captions; experts approve.	Hybrid	AI courses
W-07	Live session: schedule and invitations	12	Manual: Admin creates the session and sends invitations by hand. Automatic: System creates the meeting, invites the audience, tracks RSVPs, reminds, records attendance and creates the follow-up.	Hybrid	Sessions
W-08	Self-paced assignment (rule-based)	8	Manual: Admin picks people and assigns by hand. Automatic: Rules assign by role, team, joining date, skill gap or compliance renewal.	Hybrid	Learner app
W-09	Completion reminders at a convenient time, and escalation	9	Manual: Admin or manager sends a reminder to chosen people from the Run now button. Automatic: System sends one short reminder a day inside each person's convenient window until the item is complete.	Automated	Learner app
W-10	Course assessment and evaluation	9	Manual: Trainer scores answers by hand. Automatic: Closed answers are scored by the system and written answers by AI with expert sampling.	Hybrid	Learner app
W-11	Proctored mandatory training (POSH, DPDP and similar)	13	Manual: HR assigns the programme and an invigilator runs the test in person. Automatic: System assigns by rule, runs the proctored test, collects flags for a human reviewer and issues the certificate.	Hybrid	Compliance
W-12	Certificate issue, renewal and revocation	7	Manual: Admin issues, renews or revokes a certificate from the certificate screen. Automatic: System issues on pass, reminds before expiry, assigns the renewal course and marks expired certificates.	Automated	Compliance
W-13	Career map and internal opportunities	10	Manual: Manager and employee choose a target role in a 1:1 and add it to the pathway by hand. Automatic: System ranks next roles by readiness, builds the pathway and tells ready people about openings.	Hybrid	Pathways
W-14	Skills availability review (quarterly)	10	Manual: Leaders review the sheet and decide by hand. Automatic: System calculates supply, demand, risk and a suggested route; leaders decide.	Hybrid	Skills and tests
W-15	Points, badges and leaderboard update	9	Manual: Admin can award or remove points and badges with a reason. Automatic: System turns every learning event into points, badges and updated boards within 5 seconds.	Automated	Gamification
W-16	Report: generate, export and schedule	9	Manual: User opens a report, sets filters and downloads it. Automatic: System runs saved reports on a schedule and emails a link.	Hybrid	Reports
W-17	Knowledge article lifecycle (Knowledge Hub)	10	Manual: Author writes and owner approves by hand. Automatic: AI drafts and tags; reminders and expiry run automatically.	Hybrid	Knowledge Hub
W-18	Knowledge search and AI answer (Knowledge Hub)	10	Manual: Person browses spaces and asks an expert. Automatic: System searches, answers with sources and logs misses.	Automated	Knowledge Hub
W-19	Knowledge capture at exit or role change (Knowledge Hub)	10	Manual: Manager runs the handover checklist by hand. Automatic: System triggers capture and drafts articles from recordings.	Hybrid	Knowledge Hub

W-20	Turn a knowledge article into a course	6	Manual: Owner asks L&D by hand. Automatic: One click creates the course request.	Hybrid	Knowledge Hub
W-21	Review cycle: reminders and escalation (Knowledge Hub)	10	Manual: Owners review from My items; a function head or admin sends reminders with Run now. Automatic: System scans review dates daily, reminds owners, escalates, and updates statuses.	Automated	Knowledge Hub
W-22	Revise a published item: new version (Knowledge Hub)	9	Manual: Editor edits and the owner approves by hand. Automatic: System keeps the old version live, records every revision, writes the comparison, routes approval and publishes.	Hybrid	Knowledge Hub
W-23	Access request and owner control (Knowledge Hub)	6	Manual: Owner grants access from the item's Access panel. Automatic: System routes requests to the owner, reminds, applies the decision and logs it.	Hybrid	Knowledge Hub
W-24	Owner change and orphan prevention (Knowledge Hub)	6	Manual: Function head reassigns items from the Admin screen. Automatic: System reacts to HR events and checks every month for items without an owner.	Automated	Knowledge Hub
W-25	Knowledge health reporting to leaders (Knowledge Hub)	6	Manual: Leaders open the dashboard whenever they like. Automatic: System calculates scores weekly and sends digests.	Automated	Knowledge Hub

C. Steps (colour shows the role type)

Initiate	Starts the work
Review	Checks and can send back
Approve	Final yes or no
Coordinate	Takes part or follows up
Execute (AI)	AI does the work
Execute (System)	Software does it automatically

Workflow	Name	Step	What happens	Done by	Role type	System	Automatic or manual	Needs	Produces
W-01	Employee upload and role mapping	1	Upload the employee file (name, work email or mobile, role, manager, location, joining date).	L&D Admin	Initiate	People & roles	Manual (a person)	File in the template	Upload preview
W-01		2	Check every row; match each role to the role library; flag missing or unknown roles and duplicates.	System	Execute (System)	People & roles	Automatic (manual override allowed)	Upload preview; role library	Error and warning list with row numbers
W-01		3	Suggest the closest role for each unknown job title, with a reason.	AI Agent	Execute (AI)	People & roles	Automatic (manual override allowed)	Unknown titles; role library	Role suggestions
W-01		4	Accept or change each suggestion; fix errors.	L&D Admin	Review	People & roles	Manual (a person)	Suggestions	Clean file
W-01		5	Confirm the import.	L&D Admin	Approve	People & roles	Manual (a person)	Clean file	Approved import
W-01		6	Create or update users; link each to one primary role and a manager; send a welcome message with the login link.	System	Execute (System)	People & roles	Automatic (manual override allowed)	Approved import	Users with roles
W-01		7	Create each person's skill profile from the role's required skills and list people not yet tested.	System	Execute (System)	Skills engine	Automatic (manual override allowed)	Users with roles	Skill profiles; to-be-tested list
W-01		8	Tell managers who is in their team and prompt the first skill test (W-03).	AI Agent	Execute (AI)	Notification service	Automatic (manual override allowed)	To-be-tested list	Manager messages
W-02	Role skill profile setup	1	Pick the role and upload the job description.	HR	Initiate	Skills engine	Manual (a person)	Job description	Role profile request
W-02		2	Suggest skills and required levels using the job description, the skill library and similar roles. Show the reason for each.	AI Agent	Execute (AI)	Skills engine	Automatic (manual override allowed)	Job description; library	Draft profile (10 to 15 skills)
W-02		3	Adjust skills and levels; remove anything not truly needed.	Manager	Review	Skills engine	Manual (a person)	Draft profile	Reviewed profile
W-02		4	Check that Level 3 and 4 requirements are realistic for the role.	Subject Expert	Review	Skills engine	Manual (a person)	Reviewed profile	Expert comments
W-02		5	Approve and publish version 1.0; the profile is versioned.	HR	Approve	Skills engine	Manual (a person)	Expert comments	Published role profile
W-02		6	List employees affected and refresh their gaps and learning maps.	AI Agent	Execute (AI)	Skills engine	Automatic (manual override allowed)	Published profile	Impact list
W-02		7	Review each profile every 12 months or when the role changes.	HR	Review	Skills engine	Manual (a person)	Role changes	Profile update
W-03	Skill assessment campaign: test, level, stack rank	1	Choose who (role, team or everyone), which skills (default: the role's skills), start and end dates and the proctoring level.	L&D Admin	Initiate	Skill tests	Manual (a person)	People; skills; dates	Campaign
W-03		2	Build each person's test from the approved question banks: random questions, mixed types, time limit.	System	Execute (System)	Skill tests	Automatic (manual override allowed)	Campaign; question banks	Personal tests

W-03		3	Send invitations with a direct link and a short "what to expect" note; remind at the person's convenient time until done (W-09).	AI Agent	Execute (AI)	Notification service	Automatic (manual override allowed)	Campaign	Invitations and reminders
W-03		4	Take the test: one question per screen with a progress bar; pause between skills if needed.	Employee	Coordinate	Skill tests	Manual (a person)	Personal test	Completed answers
W-03		5	Score closed questions immediately.	System	Execute (System)	Skill tests	Automatic (manual override allowed)	Answer key	Scores for closed questions
W-03		6	Score written and scenario answers against rubrics with a confidence level.	AI Agent	Execute (AI)	Skill tests	Automatic (manual override allowed)	Rubrics	Draft scores
W-03		7	Review low-confidence scores, appeals and a 10% sample.	Subject Expert	Review	Skill tests	Manual (a person)	Draft scores	Confirmed scores
W-03		8	Convert each skill score to a level from 0 to 5 using the score table.	System	Execute (System)	Skills engine	Automatic (manual override allowed)	Confirmed scores; score table	Levels
W-03		9	Confirm levels; change by at most one level with a reason and evidence.	Manager	Review	Skills engine	Manual (a person)	Levels	Confirmed levels
W-03		10	Stack-rank employees for every skill (rank, out of how many, percentile); update gaps and availability.	System	Execute (System)	Skills engine	Automatic (manual override allowed)	Confirmed levels	Rankings, gaps, availability
W-03		11	Create or refresh every person's learning pathway (W-04) and update leaderboards (W-15).	AI Agent	Execute (AI)	Learning platform	Automatic (manual override allowed)	Gaps	Pathways; boards
W-03		12	Send each person their result: level, rank band and the next step.	AI Agent	Execute (AI)	Notification service	Automatic (manual override allowed)	Levels; pathway	Result message
W-03		13	Review campaign completion and results; follow up with anyone not finished.	L&D Admin	Review	Reports	Manual (a person)	Campaign report	Follow-ups
W-04	Learning pathway: create, track and complete	1	Start when levels are confirmed, a role changes, a person joins or a role profile changes.	System	Execute (System)	Skills engine	Automatic (manual override allowed)	Trigger	Pathway request
W-04		2	Calculate the gap for every skill: required level minus current level.	AI Agent	Execute (AI)	Skills engine	Automatic (manual override allowed)	Role profile; levels	Gap list
W-04		3	Rank by priority (gap times criticality) and group the top three skills into each wave.	AI Agent	Execute (AI)	Skills engine	Automatic (manual override allowed)	Gap list	Ranked waves
W-04		4	For each skill choose four steps: learn (catalogue content; a certification course for compliance skills), practise (a real task), connect (in-house expert at level 4 or above, else an external mentor) and prove (re-test).	AI Agent	Execute (AI)	Learning platform	Automatic (manual override allowed)	Catalogue; levels	Draft pathway
W-04		5	Estimate hours and weeks at the learner's weekly time (default 3 hours); later waves go to the next cycle after 26 weeks.	AI Agent	Execute (AI)	Skills engine	Automatic (manual override allowed)	Defaults	Timeline
W-04		6	Add any missing content (no item for that skill and level) to the content backlog.	AI Agent	Execute (AI)	AI studio	Automatic (manual override allowed)	Catalogue gaps	Content backlog
W-04		7	Approve or reorder (when approval is on); compliance pathways are auto-approved.	Manager	Approve	Learning platform	Manual (a person)	Draft pathway	Approved pathway
W-04		8	Accept the plan and set start dates; ask for changes with a reason.	Employee	Coordinate	Learning platform	Manual (a person)	Approved pathway	Committed plan
W-04		9	Track every step from learning events: started, percent complete, time spent, last active, passed.	System	Execute (System)	Learning platform	Automatic (manual override allowed)	Learning events	Live progress
W-04		10	Remind at the person's convenient time until each step is done (W-09).	AI Agent	Execute (AI)	Notification service	Automatic (manual override allowed)	Progress	Reminders
W-04		11	After the learning steps, offer the re-test; if the level is reached update the level, rank, badges and leaderboards.	System	Execute (System)	Skill tests	Automatic (manual override allowed)	Completed steps	New level
W-04		12	If the level was not reached, agree extra practice or coaching.	Manager	Review	Skills engine	Manual (a person)	Re-test result	Extra support plan
W-04		13	Refresh career readiness (W-13).	AI Agent	Execute (AI)	Skills engine	Automatic (manual override allowed)	New level	Updated career map
W-05	AI course creation (with simulation option)	1	Choose the source (SOP, deck, PDF, web page or recording), the target skill and level, audience, language, length, and the type (self-paced, certification or simulation).	L&D Admin	Initiate	AI studio	Manual (a person)	Source; skill and level	Course request
W-05		2	Read and clean the source, split it into topics and compare with the skill's level descriptors to find gaps.	AI Agent	Execute (AI)	AI studio	Automatic (manual override allowed)	Course request; skill definition	Topic map

W-05		3	Draft the outline: learning objectives, modules, minutes, tagged to the skill and level.	AI Agent	Execute (AI)	AI studio	Automatic (manual override allowed)	Topic map	Draft outline
W-05		4	Review the outline; add, remove or correct topics.	Subject Expert	Review	AI studio	Manual (a person)	Draft outline	Reviewed outline
W-05		5	Write lessons with examples and practice; attach the source passage behind every fact.	AI Agent	Execute (AI)	AI studio	Automatic (manual override allowed)	Reviewed outline	Draft lessons with citations
W-05		6	Generate quiz questions (3 or more per objective) with answers and reasons, and suggest a pass mark.	AI Agent	Execute (AI)	AI studio	Automatic (manual override allowed)	Draft lessons	Question bank
W-05		7	If a simulation is chosen, draft the scenario file: steps, objects, correct actions, common mistakes and scoring; build the 2D interactive mode (and 3D or AR assets if enabled).	AI Agent	Execute (AI)	AI studio	Automatic (manual override allowed)	Approved process steps	Draft simulation
W-05		8	Check facts, tone and local context; run the simulation once; reject anything wrong.	Subject Expert	Approve	AI studio	Manual (a person)	Lessons; questions; simulation	Approved content
W-05		9	Run quality checks: citations, reading level, captions, contrast and banned claims.	AI Agent	Execute (AI)	AI studio	Automatic (manual override allowed)	Approved content	Quality report
W-05		10	For a certification course set pass mark, proctoring level, certificate template and validity; approve publishing and set owner and review date.	L&D Admin	Approve	Learning platform	Manual (a person)	Quality report	Publish decision
W-05		11	Publish, tag skills and run a learner-view test.	AI Agent	Execute (AI)	Learning platform	Automatic (manual override allowed)	Publish decision	Live course
W-06	AI video from a lesson	1	Select approved lessons; choose the video mode (narrated slides, avatar presenter or session recording) and language(s).	L&D Admin	Initiate	AI studio	Manual (a person)	Approved lesson; mode; language	Video request
W-06		2	Write the video script: one idea per video, six minutes or less, plain spoken language.	AI Agent	Execute (AI)	AI studio	Automatic (manual override allowed)	Approved lesson	Draft script
W-06		3	Approve the script for accuracy.	Subject Expert	Review	AI studio	Manual (a person)	Draft script	Approved script
W-06		4	Create slides and visuals from the brand template. For avatar mode, use only an avatar whose consent record is on file.	AI Agent	Execute (AI)	AI studio	Automatic (manual override allowed)	Approved script; brand template; consent record	Slides or avatar scene
W-06		5	Generate the voice in the chosen language, align timing and create captions.	AI Agent	Execute (AI)	Video provider	Automatic (manual override allowed)	Script; voice choice	Audio and captions
W-06		6	Render the video. Add the visible "AI-generated" label and embed provenance data in the file.	AI Agent	Execute (AI)	Video provider	Automatic (manual override allowed)	Slides; audio	Labelled draft video
W-06		7	Watch the full video: pronunciation, visuals, brand, captions and contrast.	L&D Admin	Review	AI studio	Manual (a person)	Draft video	Review notes
W-06		8	Approve and publish.	L&D Admin	Approve	Learning platform	Manual (a person)	Review notes	Published video
W-06		9	For each extra language, a reviewer who knows the language checks the translated or dubbed version before release.	Subject Expert	Review	AI studio	Manual (a person)	Translated version	Approved language version
W-06		10	Attach the video to its lesson and track watch time and drop-off points.	AI Agent	Execute (AI)	Learning platform	Automatic (manual override allowed)	Published video	Viewing analytics
W-07	Live session: schedule and invitations	1	Create the session: topic, linked skill or pathway, date and time, length, capacity, audience, mode and trainer.	L&D Admin	Initiate	Learning platform	Manual (a person)	Topic; trainer; audience	Session draft
W-07		2	Suggest an agenda, short pre-reading and a quick pre-check; suggest time slots from calendars where connected.	AI Agent	Execute (AI)	AI studio	Automatic (manual override allowed)	Session draft	Agenda and slot options
W-07		3	Confirm availability and agenda.	Trainer	Review	Learning platform	Manual (a person)	Agenda	Confirmed plan
W-07		4	Create the meeting in Zoom, Teams or Google Meet (or accept a pasted link); add join link to the session.	System	Execute (System)	Meeting integration	Automatic (manual override allowed)	Confirmed plan	Join link
W-07		5	Send the invitation with date, time, link, calendar file and Accept or Decline; this is an invitation, not a reminder.	AI Agent	Execute (AI)	Notification service	Automatic (manual override allowed)	Audience; join link	Invitations
W-07		6	Record replies; offer seats to the waitlist when someone declines.	System	Execute (System)	Learning platform	Automatic (manual override allowed)	Replies	Attendee list; waitlist
W-07		7	Remind only people who accepted: 7 days, 1 day and 1 hour before (email, app, WhatsApp if opted in).	AI Agent	Execute (AI)	Notification service	Automatic (manual override allowed)	Attendee list	Reminders
W-07		8	Run the session with polls and Q&A; for in-person sessions scan QR check-in.	Trainer	Coordinate	Meeting integration	Manual (a person)	Agenda	Session delivered

W-07		9	Capture attendance and credit it when it meets the threshold (default 75%).	System	Execute (System)	Meeting integration	Automatic (manual override allowed)	Join and leave times	Attendance record
W-07		10	Fetch the recording and transcript; create summary, chapters, key Q&A and a quiz.	AI Agent	Execute (AI)	AI studio	Automatic (manual override allowed)	Recording	Draft on-demand lesson
W-07		11	Correct the summary and quiz.	Trainer	Review	AI studio	Manual (a person)	Draft lesson	Reviewed lesson
W-07		12	Publish the lesson; mark attendees complete; issue certificates where the session is a certification.	L&D Admin	Approve	Learning platform	Manual (a person)	Reviewed lesson	Lesson; completions
W-08	Self-paced assignment (rule-based)	1	Choose the training and the rule: who (role, team, new joiner or skill gap) and the due-date policy.	L&D Admin	Initiate	Learning platform	Manual (a person)	Training; rule; due-date policy	Assignment rule
W-08		2	Find everyone who matches the rule today and re-check daily for new joiners and role changes.	System	Execute (System)	Learning platform	Automatic (manual override allowed)	User list with roles	People to assign
W-08		3	Set each person's due date; skip anyone who already holds a valid certificate and record the reason.	AI Agent	Execute (AI)	Learning platform	Automatic (manual override allowed)	Due-date policy; certificates	Due dates; skipped list
W-08		4	Assign and notify by email, WhatsApp or app, with a direct link.	System	Execute (System)	Notification service	Automatic (manual override allowed)	Assignments	Assignments and notification log
W-08		5	Confirm the course shows for each person and fix failures.	AI Agent	Execute (AI)	Learning platform	Automatic (manual override allowed)	Assignments	Assignment check report
W-08		6	Receive a team summary; request an exception for someone on leave.	Manager	Coordinate	Learning platform	Manual (a person)	Team summary	Exception requests
W-08		7	Approve or decline exceptions; the reason is recorded.	L&D Admin	Approve	Learning platform	Manual (a person)	Exception requests	Approved exceptions
W-08		8	Record every assignment with date, rule and due date.	System	Execute (System)	Audit log	Automatic (manual override allowed)	Assignments	Assignment record
W-09	Completion reminders at a convenient time, and escalation	1	Every day list people with unfinished self-paced items; skip people on leave, on a non-working day or in quiet hours.	System	Execute (System)	Notification service	Automatic (manual override allowed)	Assignments; leave and holiday data	Daily list
W-09		2	Pick each person's convenient time: their saved preference, else the 2-hour window when they usually open the app on working days, else 11:00.	AI Agent	Execute (AI)	Notification service	Automatic (manual override allowed)	Preference; app-open history	Send window
W-09		3	Choose a short message by status (not started, in progress, due soon, overdue) with the link and the time left to finish.	AI Agent	Execute (AI)	Notification service	Automatic (manual override allowed)	Status	Message
W-09		4	Send inside the window by the person's channel (app, email, WhatsApp if opted in); at most one a day and three a week; offer "Remind me tomorrow".	System	Execute (System)	Notification service	Automatic (manual override allowed)	Message; window	Reminder sent
W-09		5	Stop at once when the item is complete.	System	Execute (System)	Learning platform	Automatic (manual override allowed)	Completion event	Reminders stopped
W-09		6	After the due date send a final notice to the learner and a list of overdue people to the manager.	AI Agent	Execute (AI)	Notification service	Automatic (manual override allowed)	Overdue list	Notices
W-09		7	Speak to overdue people; agree a new date or remove the blocker.	Manager	Coordinate	Learning platform	Manual (a person)	Overdue list	New date or note
W-09		8	Review the weekly overdue summary; escalate compliance items overdue more than 14 days to the department head.	L&D Admin	Review	Reports	Manual (a person)	Overdue summary	Escalations
W-09		9	Record every reminder and outcome for the audit pack.	System	Execute (System)	Audit log	Automatic (manual override allowed)	Reminder log	Audit record
W-10	Course assessment and evaluation	1	Take the assessment: quiz, scenario, written answer or practical upload.	Employee	Initiate	Learning platform	Manual (a person)	Assessment; time limit	Completed attempt
W-10		2	Score closed questions immediately.	System	Execute (System)	Learning platform	Automatic (manual override allowed)	Answer key	Score for closed questions
W-10		3	Score written and scenario answers against the rubric; give reasons and a confidence level.	AI Agent	Execute (AI)	AI studio	Automatic (manual override allowed)	Rubric; model answers	Draft score and feedback
W-10		4	Review every low-confidence AI score, any learner appeal, and a random 10% sample of the rest.	Subject Expert	Review	Learning platform	Manual (a person)	Draft scores	Confirmed scores
W-10		5	Apply the pass mark; mark Pass or Fail; record the attempt.	System	Execute (System)	Learning platform	Automatic (manual override allowed)	Confirmed scores	Result

W-10		6	Send the result and specific feedback; suggest the next lesson for missed objectives.	AI Agent	Execute (AI)	Notification service	Automatic (manual override allowed)	Result	Feedback message
W-10		7	See team results and coach on weak areas.	Manager	Coordinate	Learning platform	Manual (a person)	Team results	Coaching actions
W-10		8	Share summary with HR; offer a retake if policy allows, after a cooling-off period.	L&D Admin	Coordinate	Learning platform	Manual (a person)	Results	Retake decisions
W-10		9	Record the score as skill evidence for the next skill-level update (W-03).	System	Execute (System)	Skills engine	Automatic (manual override allowed)	Result	Skill evidence record
W-11	Proctored mandatory training (POSH, DPDP and similar)	1	Pick the mandatory programme, the proctoring level, the due date and the cycle (at joining and yearly).	HR	Initiate	Learning platform	Manual (a person)	Programme; level; cycle	Compliance plan
W-11		2	With legal, confirm the content is current for the law and policy; approve the version.	HR	Approve	Learning platform	Manual (a person)	Content version	Approved version
W-11		3	Assign by rule: joiners within 1 day; everyone yearly; ICC members get the separate track.	System	Execute (System)	Learning platform	Automatic (manual override allowed)	Rule; HR data	Assignments
W-11		4	Read the notice and give consent. If consent is declined, an in-person invigilated test is booked.	Employee	Coordinate	Proctoring	Manual (a person)	Notice	Consent or alternative
W-11		5	Check camera, microphone and browser (Standard and Strict levels).	System	Execute (System)	Proctoring	Automatic (manual override allowed)	Device	Ready or fix-it message
W-11		6	Complete the training and take the test; questions are random and timed.	Employee	Coordinate	Learning platform	Manual (a person)	Training; test	Attempt
W-11		7	Record integrity signals with time and snapshot: tab switch, copy and paste, extra face, no face, device change, long idle.	System	Execute (System)	Proctoring	Automatic (manual override allowed)	Attempt	Flags
W-11		8	Summarise the flags for the attempt; never fail anyone automatically.	AI Agent	Execute (AI)	Proctoring	Automatic (manual override allowed)	Flags	Flag summary
W-11		9	Review flagged attempts; decide valid, invalid or retest; the learner can appeal.	Proctor Reviewer	Review	Proctoring	Manual (a person)	Flag summary	Decision
W-11		10	Apply the pass mark (default 80%) and record the result.	System	Execute (System)	Learning platform	Automatic (manual override allowed)	Decision; score	Result
W-11		11	On a pass, issue the certificate (W-12).	System	Execute (System)	Certificates	Automatic (manual override allowed)	Result	Certificate
W-11		12	Delete proctoring images and video after the retention period (default 30 days).	System	Execute (System)	Proctoring	Automatic (manual override allowed)	Retention rule	Deletion log
W-11		13	Review completion and the audit-ready report; follow up on non-completion.	HR	Review	Reports	Manual (a person)	Audit report	Follow-ups
W-12	Certificate issue, renewal and revocation	1	When the pass rules are met (course complete, test passed, proctor clear) create the certificate record with ID, issue date and expiry.	System	Execute (System)	Certificates	Automatic (manual override allowed)	Pass event	Certificate record
W-12		2	Create the PDF from the template and a signed digital credential (Open Badges 3.0) with a QR code to a verification page.	System	Execute (System)	Certificates	Automatic (manual override allowed)	Certificate record	PDF and credential
W-12		3	Send to the learner and add to the profile; offer sharing.	System	Execute (System)	Notification service	Automatic (manual override allowed)	Certificate	Delivered certificate
W-12		4	Remind 60, 30 and 7 days before expiry and assign the renewal course.	System	Execute (System)	Learning platform	Automatic (manual override allowed)	Expiry date	Reminders; renewal assignment
W-12		5	On expiry mark the certificate expired and tell the manager; apply any rule that limits regulated work.	System	Execute (System)	Certificates	Automatic (manual override allowed)	Expiry	Expired status
W-12		6	Review the monthly certificate summary.	HR	Review	Reports	Manual (a person)	Summary	Actions
W-12		7	Revoke a certificate issued in error or after misconduct; the credential and verification page show revoked.	L&D Admin	Approve	Certificates	Manual (a person)	Request	Revoked certificate
W-13	Career map and internal opportunities	1	After levels are confirmed, compute readiness for each next role (vertical and lateral) from career paths, using tested skills only.	System	Execute (System)	Skills engine	Automatic (manual override allowed)	Levels; career paths	Readiness list
W-13		2	Rank the options; list the top skills to close, skills still to test and estimated weeks.	AI Agent	Execute (AI)	Skills engine	Automatic (manual override allowed)	Readiness list	Career options
W-13		3	Open the career map and a role to see what it needs.	Employee	Coordinate	Learning platform	Manual (a person)	Career options	Chosen role

W-13		4	Choose "Add to my pathway".	Employee	Initiate	Learning platform	Manual (a person)	Chosen role	Request
W-13		5	Build the pathway for the target role and merge it with the current one (W-04).	AI Agent	Execute (AI)	Learning platform	Automatic (manual override allowed)	Request	Merged pathway
W-13		6	Approve the career pathway; discuss in the next 1:1.	Manager	Approve	Learning platform	Manual (a person)	Merged pathway	Approved pathway
W-13		7	Publish an internal role opening (optional).	HR	Initiate	Learning platform	Manual (a person)	Role; requirements	Opening
W-13		8	Tell employees at or above the readiness threshold (default 70%) that they may be a fit.	AI Agent	Execute (AI)	Notification service	Automatic (manual override allowed)	Readiness list	Messages
W-13		9	Express interest.	Employee	Coordinate	Learning platform	Manual (a person)	Message	Interest recorded
W-13		10	Review interested employees; run selection outside the platform; record the outcome. A move updates the role, requirements and pathway.	HR	Review	Reports	Manual (a person)	Interested list	Outcome
W-14	Skills availability review (quarterly)	1	Schedule the review and choose scope (company or department).	L&D Admin	Initiate	Skills engine	Manual (a person)	Scope	Review run
W-14		2	Calculate demand, qualified people, experts, near-ready people and coverage for every skill; flag single points of failure and coverage risks.	AI Agent	Execute (AI)	Skills engine	Automatic (manual override allowed)	Skill profiles; role profiles	Availability report
W-14		3	Suggest a route for each skill: maintain, build (train), buy or borrow (hire or contract).	AI Agent	Execute (AI)	Skills engine	Automatic (manual override allowed)	Availability report	Suggested routes with reasons
W-14		4	Business heads decide which risks matter for the next two quarters and override suggestions.	Manager	Review	Skills engine	Manual (a person)	Suggested routes	Agreed priorities
W-14		5	Create build plans: programmes, cohorts and coaching.	L&D Admin	Coordinate	Learning platform	Manual (a person)	Agreed priorities	Build plans
W-14		6	Raise hiring or contractor requests for "buy or borrow" skills.	HR	Coordinate	Hiring workflow	Manual (a person)	Agreed priorities	Hiring requests
W-14		7	Approve budget and priorities.	Leadership	Approve	Skills engine	Manual (a person)	Plans and requests	Approved plan
W-14		8	Create actions with owners and due dates.	AI Agent	Execute (AI)	Action tracker	Automatic (manual override allowed)	Approved plan	Action list
W-14		9	For single-point-of-failure skills, start knowledge capture (W-19) so know-how is documented.	AI Agent	Execute (AI)	Knowledge base	Automatic (manual override allowed)	Single-point-of-failure list	Capture tasks
W-14		10	At the next review, compare coverage with this one.	L&D Admin	Review	Skills engine	Manual (a person)	Next availability report	Change in coverage
W-15	Points, badges and leaderboard update	1	Receive a learning event (lesson done, test passed, session attended, article verified).	System	Execute (System)	Leaderboards	Automatic (manual override allowed)	Event	Event
W-15		2	Check the event is valid: minimum watch time, no duplicate, not blocked for this course.	System	Execute (System)	Leaderboards	Automatic (manual override allowed)	Event; rules	Valid event
W-15		3	Award points under the rules and apply daily caps.	System	Execute (System)	Leaderboards	Automatic (manual override allowed)	Valid event	Points
W-15		4	Check badge rules and level thresholds; award new badges and levels.	System	Execute (System)	Leaderboards	Automatic (manual override allowed)	Points	Badges; level
W-15		5	Update individual, team and department boards within 5 seconds.	System	Execute (System)	Leaderboards	Automatic (manual override allowed)	Points	Updated boards
W-15		6	Send a short celebration to the learner in the app.	AI Agent	Execute (AI)	Notification service	Automatic (manual override allowed)	Badge or level	Message
W-15		7	See the team board; send a cheer or a nudge.	Manager	Coordinate	Leaderboards	Manual (a person)	Team board	Cheer or nudge
W-15		8	Check the weekly report that flags unusual point spikes.	L&D Admin	Review	Reports	Manual (a person)	Spike report	Actions
W-15		9	Write a weekly "what changed" summary of the boards.	AI Agent	Execute (AI)	Reports	Automatic (manual override allowed)	Board history	Weekly summary
W-16	Report: generate, export and schedule	1	Pick a report, filters and date range.	User	Initiate	Reports	Manual (a person)	Report; filters	Report request
W-16		2	Check the user's access; apply row-level rules (managers see only their team).	System	Execute (System)	Reports	Automatic (manual override allowed)	Request; roles	Allowed data

W-16		3	Run the report; show it on screen, or in the background if it is large.	System	Execute (System)	Reports	Automatic (manual override allowed)	Allowed data	Report
W-16		4	Check the numbers on screen and click a number to see the people behind it.	User	Review	Reports	Manual (a person)	Report	Understanding
W-16		5	Export to Excel, CSV or PDF.	User	Coordinate	Reports	Manual (a person)	Report	Exported file
W-16		6	Log the export; watermark files that contain personal data; add who, when, filters and a data dictionary.	System	Execute (System)	Audit log	Automatic (manual override allowed)	Exported file	Export log
W-16		7	Schedule it (daily, weekly or monthly) and choose recipients.	User	Coordinate	Reports	Manual (a person)	Schedule	Saved schedule
W-16		8	Run on schedule and email a link.	System	Execute (System)	Reports	Automatic (manual override allowed)	Schedule	Delivered report
W-16		9	Each month review schedules and remove unused ones.	L&D Admin	Review	Reports	Manual (a person)	Schedule list	Clean list
W-17	Knowledge article lifecycle (Knowledge Hub)	1	Write an article, or paste a source (document, ticket or transcript); choose topic, audience and type.	Contributor	Initiate	Knowledge base	Manual (a person)	Topic; source	Article request
W-17		2	Draft and structure it: title, summary, steps, FAQs, skill tags and related courses; flag missing information.	AI Agent	Execute (AI)	Knowledge base	Automatic (manual override allowed)	Article request	Draft article
W-17		3	Edit the draft and confirm the facts.	Contributor	Review	Knowledge base	Manual (a person)	Draft article	Edited article
W-17		4	Check accuracy; request changes.	Subject Expert	Review	Knowledge base	Manual (a person)	Edited article	Expert review
W-17		5	Set who can see it and the review date by type; approve.	Owner	Approve	Knowledge base	Manual (a person)	Expert review	Approved article
W-17		6	Publish, index for search and notify subscribers.	AI Agent	Execute (AI)	Knowledge base	Automatic (manual override allowed)	Approved article	Published article
W-17		7	Remind the owner 14 days before the review date.	System	Execute (System)	Knowledge base	Automatic (manual override allowed)	Review date	Reminder
W-17		8	Re-verify (one click if unchanged) or update.	Owner	Review	Knowledge base	Manual (a person)	Reminder	Verified article
W-17		9	If overdue: show a warning label; after 30 days remove from AI answers; after 90 days suggest archiving.	System	Execute (System)	Knowledge base	Automatic (manual override allowed)	Overdue status	Warning, removal or archive suggestion
W-17		10	Archive or delete retired content and keep its history.	L&D Admin	Approve	Knowledge base	Manual (a person)	Archive suggestion	Archived article
W-18	Knowledge search and AI answer (Knowledge Hub)	1	Ask a question or search.	Employee	Initiate	Knowledge base	Manual (a person)	Question	Query
W-18		2	Identify the person and limit results to content they are allowed to see.	System	Execute (System)	Knowledge base	Automatic (manual override allowed)	User roles	Allowed content set
W-18		3	Find the best verified articles by keyword and meaning; ignore overdue content.	AI Agent	Execute (AI)	Knowledge base	Automatic (manual override allowed)	Query; allowed set	Ranked articles
W-18		4	Write a short answer using only those articles; show citations and the last-verified date.	AI Agent	Execute (AI)	Knowledge base	Automatic (manual override allowed)	Ranked articles	Cited answer
W-18		5	If there is no good match, say so and do not guess; offer Ask an expert, showing people with high levels in the related skill.	AI Agent	Execute (AI)	Knowledge base	Automatic (manual override allowed)	Query; skill profiles	No-answer message and expert list
W-18		6	Answer within the agreed time (default 2 working days).	Subject Expert	Coordinate	Knowledge base	Manual (a person)	Question	Expert answer
W-18		7	Draft a new article from the expert's answer (goes to W-17).	AI Agent	Execute (AI)	Knowledge base	Automatic (manual override allowed)	Expert answer	Draft article
W-18		8	Rate the answer; report anything wrong or outdated.	Employee	Coordinate	Knowledge base	Manual (a person)	Answer	Feedback
W-18		9	Log unanswered questions; send flagged articles to their owners.	System	Execute (System)	Knowledge base	Automatic (manual override allowed)	Feedback; no-answer log	Backlog and review tasks
W-18		10	Review the weekly search-gap report and assign articles to write.	L&D Admin	Review	Knowledge base	Manual (a person)	Search-gap report	Article assignments
W-19	Knowledge capture at exit or role change (Knowledge Hub)	1	Record the resignation or transfer; the system checks the person's high-criticality and single-point-of-failure skills.	HR	Initiate	Skills engine	Manual (a person)	Exit or move record	Handover trigger

W-19		2	List what they know and own: expert skills, articles, courses and open tasks; propose a handover plan and checklist.	AI Agent	Execute (AI)	Knowledge base	Automatic (manual override allowed)	Skill profile; ownership data	Handover plan
W-19		3	Confirm priorities and name successors, using the near-ready list.	Manager	Review	Knowledge base	Manual (a person)	Handover plan	Successors named
W-19		4	Record short walk-through sessions or answer guided questions; sessions are auto-transcribed.	Departing employee	Coordinate	Knowledge base	Manual (a person)	Guided questions	Recordings and transcripts
W-19		5	Draft SOPs and FAQs from the recordings, citing the transcript.	AI Agent	Execute (AI)	Knowledge base	Automatic (manual override allowed)	Transcripts	Draft articles
W-19		6	Check the drafts for accuracy.	Departing employee	Review	Knowledge base	Manual (a person)	Draft articles	Checked drafts
W-19		7	Test by following the SOP; note anything missing.	Successor	Review	Knowledge base	Manual (a person)	Checked drafts	Test comments
W-19		8	Approve the articles and transfer ownership to the successor.	Manager	Approve	Knowledge base	Manual (a person)	Test comments	Approved articles; new owners
W-19		9	Create a learning map for the successor and update the skills inventory.	System	Execute (System)	Skills engine	Automatic (manual override allowed)	Successors	Learning maps
W-19		10	Close the handover checklist before the last working day.	HR	Coordinate	Knowledge base	Manual (a person)	Checklist	Handover closed
W-20	Turn a knowledge article into a course	1	Click "Turn into course" on a verified article.	Article Owner	Initiate	Knowledge base	Manual (a person)	Verified article	Course request
W-20		2	Create the request with the article as the source and its skill tags.	System	Execute (System)	AI studio	Automatic (manual override allowed)	Request	Course request in studio
W-20		3	Draft the course (steps 2 to 9 of W-05).	AI Agent	Execute (AI)	AI studio	Automatic (manual override allowed)	Course request	Draft course
W-20		4	Approve the course content as the subject expert.	Article Owner	Approve	AI studio	Manual (a person)	Draft course	Approved content
W-20		5	Publish and assign to the roles that need the skill.	L&D Admin	Approve	Learning platform	Manual (a person)	Approved content	Live course and assignments
W-20		6	Link the article and the course; if the article changes later, flag the course "needs update".	System	Execute (System)	Knowledge base	Automatic (manual override allowed)	Links	Linked records
W-21	Review cycle: reminders and escalation (Knowledge Hub)	1	Every day check each published item's next review date against its review cycle.	System	Execute (System)	Knowledge base	Automatic (manual override allowed)	Items; review cycles	Items due soon or overdue
W-21		2	Remind the owner 30, 14 and 7 days before and on the due date; copy the backup owner from 14 days; combine everything due for one person into one message.	System	Execute (System)	Notification service	Automatic (manual override allowed)	Due list; owners	Reminders sent
W-21		3	Choose one: Still correct (verify), Update (start a new draft), Hand over, or Snooze (twice, 7 days, with a reason).	Owner	Review	Knowledge base	Manual (a person)	Reminder	Owner decision
W-21		4	If Still correct: write a review-log line (who, when, outcome), reset the next review date, show the Verified status. No new version.	System	Execute (System)	Knowledge base	Automatic (manual override allowed)	Owner decision	Review log; new date
W-21		5	If no action: remind weekly while overdue and show the Overdue label.	System	Execute (System)	Notification service	Automatic (manual override allowed)	Overdue items	Weekly reminders
W-21		6	At 14 days overdue send the function head a list of overdue items with owners.	System	Execute (System)	Notification service	Automatic (manual override allowed)	Overdue list	Function head digest
W-21		7	Ask the owner to act, or reassign the item to another owner.	Function Head	Coordinate	Knowledge base	Manual (a person)	Digest	Action or new owner
W-21		8	At 30 days overdue tell the knowledge admin and leave the item out of AI answers.	System	Execute (System)	Knowledge base	Automatic (manual override allowed)	Overdue 30 days	Admin alert; item excluded
W-21		9	At 90 days overdue suggest archiving to the owner and the knowledge admin.	System	Execute (System)	Notification service	Automatic (manual override allowed)	Overdue 90 days	Archive suggestion
W-21		10	Approve archiving or give the item a new owner.	Knowledge Admin	Approve	Knowledge base	Manual (a person)	Archive suggestion	Archived or reassigned item
W-22	Revise a published item: new version (Knowledge Hub)	1	Choose Update on a published item.	Owner	Initiate	Knowledge base	Manual (a person)	Published item	Update request
W-22		2	Create a draft copy; the published version stays live with an Update in progress tag.	System	Execute (System)	Knowledge base	Automatic (manual override allowed)	Update request	Draft copy
W-22		3	Edit the draft. Every save is stored as a revision (who, when, what changed).	Editor	Coordinate	Knowledge base	Manual (a person)	Draft copy	Revisions

W-22		4	Write a one-line change note: what changed and why.	Editor	Coordinate	Knowledge base	Manual (a person)	Revisions	Change note
W-22		5	Summarise the differences and suggest minor or major; flag steps that now conflict with other items.	AI Agent	Execute (AI)	Knowledge base	Automatic (manual override allowed)	Draft; published version	Change summary and suggestion
W-22		6	Read the comparison; approve or send back with comments.	Approver	Review	Knowledge base	Manual (a person)	Change summary	Review decision
W-22		7	Approve a major version (a minor edit can publish on owner confirmation).	Owner	Approve	Knowledge base	Manual (a person)	Review decision	Approved version
W-22		8	Publish the new version number, reset the review date, add a line to the history and tell subscribers and the owners of linked courses.	System	Execute (System)	Knowledge base	Automatic (manual override allowed)	Approved version	New version live
W-22		9	Remove the Update in progress tag and keep every older version for comparison or restore.	System	Execute (System)	Knowledge base	Automatic (manual override allowed)	New version	Clean history
W-23	Access request and owner control (Knowledge Hub)	1	Click Request access on an item or space that is hidden or read-only.	Employee	Initiate	Knowledge base	Manual (a person)	Item	Access request
W-23		2	Send the request to the owner with Approve and Decline buttons; show the request in My items.	System	Execute (System)	Notification service	Automatic (manual override allowed)	Request	Owner notification
W-23		3	Approve (choose viewer, commenter or editor) or decline with a reason.	Owner	Approve	Knowledge base	Manual (a person)	Request	Decision
W-23		4	If there is no answer in 2 days remind the owner once, then the backup owner.	System	Execute (System)	Notification service	Automatic (manual override allowed)	Open request	Reminder
W-23		5	Apply the decision, tell the requester and write the audit line (who, what, when).	System	Execute (System)	Audit log	Automatic (manual override allowed)	Decision	Access change; log
W-23		6	Each quarter review the list of people with access to Restricted and Confidential items and remove what is not needed.	Knowledge Admin	Review	Reports	Manual (a person)	Access list	Cleaned access
W-24	Owner change and orphan prevention (Knowledge Hub)	1	Detect an exit, transfer or role change for any owner.	System	Execute (System)	HRMS sync	Automatic (manual override allowed)	HR event	Owner change trigger
W-24		2	List the person's items and move them to the backup owner at once.	System	Execute (System)	Knowledge base	Automatic (manual override allowed)	Trigger; items	Items with backup owner
W-24		3	Confirm a new owner and a new backup within 7 days.	Function Head	Approve	Knowledge base	Manual (a person)	Item list	New owners
W-24		4	Tell new owners what they now own and when the next reviews are due.	AI Agent	Execute (AI)	Notification service	Automatic (manual override allowed)	New owners	Hand-over messages
W-24		5	Every month list published items with no owner or no backup and send them to the function head.	System	Execute (System)	Knowledge base	Automatic (manual override allowed)	All items	Orphan list
W-24		6	Check that the orphan list is empty; follow up with function heads.	Knowledge Admin	Review	Reports	Manual (a person)	Orphan list	Follow-ups
W-25	Knowledge health reporting to leaders (Knowledge Hub)	1	Each week calculate the measures for every function and for the whole company, and the knowledge health score.	System	Execute (System)	Reports	Automatic (manual override allowed)	Items; logs; search data	Measures and score
W-25		2	Save a snapshot so the trend can be shown.	System	Execute (System)	Reports	Automatic (manual override allowed)	Measures	Snapshot
W-25		3	Write a short digest for each function head: what is overdue, which items have no owner, what changed.	AI Agent	Execute (AI)	Notification service	Automatic (manual override allowed)	Measures	Function digests
W-25		4	Read the digest; send reminders or reassign items.	Function Head	Review	Reports	Manual (a person)	Digest	Actions
W-25		5	Each month write a leader summary: health score, the weakest functions and the three actions that would help most.	AI Agent	Execute (AI)	Notification service	Automatic (manual override allowed)	Snapshots	Leader digest
W-25		6	Open the dashboard, click any number to see the list, and agree actions with function heads.	Leadership	Review	Reports	Manual (a person)	Dashboard	Agreed actions

231 steps. 61 are done by the AI Agent and 59 are human Review or Approve gates. Step references like (W-04) point to other workflows in this sheet.

Skills Rules: the maths

These rules are used by the code and by the demo formulas. The score table is a setting; the demo sheets read it from here.

A. Score to level (SETTING: the demo reads cells B6 to B11)

Level	Minimum score (0-100)	Name	What it looks like
0	0	No exposure	Has not used or learned this skill.
1	20	Awareness	Can explain basic ideas; works only with step-by-step guidance.
2	40	Working	Does routine tasks with some supervision.
3	60	Proficient	Works independently on standard and some non-standard tasks. Role-ready for most roles.
4	75	Advanced	Handles complex problems; reviews others' work; coaches peers.
5	90	Expert	Recognised authority; sets standards; teaches others.

Blue cells are inputs. Level = the highest row whose minimum score is at or below the score. Compliance tests use a pass mark of 80% on top of this table.

B. Confirming levels (defaults)

Rule	Detail	Status
Test result	The test gives the level. It is the main evidence.	Default
Manager confirmation	A manager can confirm the level or change it by at most one level, with a written reason and evidence.	Default
Practical and work-sample skills	Level comes from a practical task or work sample reviewed by an expert; the written test alone is not enough for technical skills at level 4 or above.	Default
Dispute	A person can dispute a level with evidence; the manager reviews; an expert breaks a tie.	Default
Shelf life	Re-test every 12 months, on role change, and after finishing a pathway for that skill. Compliance skills renew on the legal cycle.	Default
Retakes	One retake after 7 days; best score counts; at most 3 attempts a quarter.	Default

C. Stack ranking

Term	Rule	Note
Scope	Rank everyone tested on the same skill, whatever their role. Filters: team, location, role family.	Rank is by test score
Rank	1 plus the number of people with a higher score. Equal scores share a rank.	Matches the demo formula
Out of	Number of people tested on the skill.	
Percentile	Top 10% means rank divided by number tested is 0.10 or less.	

Who sees what	Admin and manager see names for their scope. A learner sees their own rank band by default (for example Top 25%). Names on public boards follow the privacy setting.	Privacy default

D. Gap and priority

Term	Rule	Note
Gap	Required level minus current level, never below zero.	Per skill and person
Skill criticality	1 nice to have, 2 important, 3 business-critical or legally required (stored on the skill).	Setting per skill
Priority score	Gap multiplied by criticality. Ties: larger gap first, then lower current level.	Ranks the pathway
Status	Meets (gap 0), Close (1), Gap (2), Critical gap (3 or more).	Colours and filters

E. Skills availability (company view)

Term	Rule	Note
Demand	People whose role needs the skill (tested records).	
Qualified	People with gap 0.	
Experts	People at level 4 or 5.	
Near-ready	People with gap 1.	
Coverage	Qualified divided by demand. Healthy 80% or more; Watch 50% to 79%; Coverage risk below 50%.	
Single point of failure	Criticality 3, needed by 3 or more people, with one expert or none.	Shown first
Route	Maintain if all qualified. Buy or borrow if criticality is 2 or 3 and there is no expert to coach. Build if qualified plus near-ready cover 60% or more of demand. Otherwise build and borrow.	Leaders can override

F. Pathway rules (settings in brackets)

Rule	Detail	Note
Waves	Work on 3 skills at a time. Wave 1 is the top 3 priorities. (wave size = 3)	
Four steps per skill	Learn: catalogue content (a certification course for compliance skills). Practise: a real work task. Connect: an in-house expert at level 4 or above, otherwise an external mentor. Prove: re-test.	Applies the idea that most learning happens on the job
Hours to gain one level	0 to 1: 4 h; 1 to 2: 8 h; 2 to 3: 16 h; 3 to 4: 24 h; 4 to 5: 40 h. (setting)	Starting values; calibrate from real data
Weekly learning time	3 hours a week per person. (setting)	
Planning horizon	26 weeks. Later waves are marked next cycle. (setting)	
Missing content	If no catalogue item covers a needed skill and level band, add it to the content backlog for the AI studio.	
Max skills in a pathway	8 skills at a time. (setting)	Avoids overload

G. Career readiness

Term	Rule	Note
Readiness	For a target role: sum of the person's current level (capped at the required level) divided by the sum of required levels, using only skills the person has been tested on.	Fair to people not yet tested
Tested count	Show how many of the target role's skills have been tested (for example 8 of 10).	Encourages testing
Skills to close	Top 3 gaps by priority score, shown with the levels needed.	
Skills to test next	Target-role skills the person has not been tested on.	
Weeks	Hours to close assessed gaps divided by weekly learning time.	Shown as an estimate
Opportunity threshold	Readiness of 70% or more makes a person a candidate for an internal opening. (setting)	V2
Career paths	Vertical (promotion) and lateral (sideways) moves are stored as from-role to to-role pairs (sheet 08) and are editable.	

Skill Library

247 skills in 25 domains, for every service industry listed in sheet 06. Blue cells are editable seed data.

Skill ID	Domain	Applies to	Skill	Type	Criticality (1-3)	Definition	What Level 3 looks like	How it is tested	Roles using it
SK-CORE-01	Core & Behavioural	All industries	Written communication	Behavioural	3	Writing clearly and concisely for the reader.	Emails and documents are clear and need little rework.	Situational judgement test + 360 feedback	44
SK-CORE-02	Core & Behavioural	All industries	Verbal communication & presentation	Behavioural	2	Explaining ideas clearly to individuals and groups.	Presents with structure and handles questions well.	Situational judgement test + 360 feedback	21
SK-CORE-03	Core & Behavioural	All industries	Problem solving	Behavioural	3	Breaking down and solving unfamiliar problems.	Finds root causes and proposes workable fixes.	Situational judgement test + 360 feedback	10
SK-CORE-04	Core & Behavioural	All industries	Time & priority management	Behavioural	2	Managing own time and priorities.	Meets commitments and re-plans when priorities change.	Situational judgement test + 360 feedback	19
SK-CORE-05	Core & Behavioural	All industries	Collaboration & teamwork	Behavioural	2	Working with others toward shared goals.	Shares information and resolves friction early.	Situational judgement test + 360 feedback	10
SK-CORE-06	Core & Behavioural	All industries	Learning agility	Behavioural	2	Picking up new skills fast and applying them.	Learns new tools and methods quickly and uses them.	Situational judgement test + 360 feedback	1
SK-CORE-07	Core & Behavioural	All industries	Digital & AI literacy	Behavioural	2	Using everyday digital tools and AI safely.	Uses core tools confidently and checks AI output.	Situational judgement test + 360 feedback	1
SK-CORE-08	Core & Behavioural	All industries	Information security awareness	Compliance	3	Protecting company and personal data in daily work.	Follows policy, spots phishing and reports incidents.	Knowledge test (pass mark 80%) + scenario check	187
SK-CORE-09	Core & Behavioural	All industries	Ethics & code of conduct	Compliance	3	Acting with integrity and following the code.	Applies the code to real situations and speaks up.	Knowledge test (pass mark 80%) + scenario check	187
SK-CORE-10	Core & Behavioural	All industries	Customer orientation	Behavioural	2	Putting the customer's need at the centre of work.	Anticipates needs and follows through on promises.	Situational judgement test + 360 feedback	7
SK-CORE-11	Core & Behavioural	All industries	Numeracy & data reading	Behavioural	2	Using numbers, tables and charts to decide.	Reads reports correctly and spots errors.	Situational judgement test + 360 feedback	5
SK-CORE-12	Core & Behavioural	All industries	Adaptability & resilience	Behavioural	2	Staying effective under change and pressure.	Keeps quality under pressure and adapts to change.	Situational judgement test + 360 feedback	2
SK-CORE-13	Core & Behavioural	All industries	Ownership & accountability	Behavioural	2	Taking responsibility for outcomes.	Delivers on commitments and flags risks early.	Situational judgement test + 360 feedback	2
SK-LDR-01	Leadership & Management	All industries	Team leadership	Leadership	3	Setting direction and getting results through a team.	Team meets goals; engagement and retention are healthy.	Situational judgement test + 360 feedback	39
SK-LDR-02	Leadership & Management	All industries	Coaching & feedback	Leadership	3	Helping others improve with timely, specific feedback.	Gives regular useful feedback; people improve.	Situational judgement test + 360 feedback	23

SK-LDR-03	Leadership & Management	All industries	Delegation & accountability	Leadership	2	Assigning work clearly and following up fairly.	Delegates with clear outcomes and checks progress.	Situational judgement test + 360 feedback	1
SK-LDR-04	Leadership & Management	All industries	Decision making	Leadership	2	Making timely, well-reasoned decisions.	Decides with available facts and owns the result.	Situational judgement test + 360 feedback	7
SK-LDR-05	Leadership & Management	All industries	Stakeholder management	Leadership	2	Managing relationships across groups.	Keeps stakeholders aligned without escalation.	Situational judgement test + 360 feedback	42
SK-LDR-06	Leadership & Management	All industries	Conflict management	Leadership	2	Resolving disagreements constructively.	Resolves team conflicts early and fairly.	Situational judgement test + 360 feedback	3
SK-LDR-07	Leadership & Management	All industries	Change management	Leadership	2	Helping people adopt new ways of working.	Plans communication and support; adoption is smooth.	Situational judgement test + 360 feedback	4
SK-LDR-08	Leadership & Management	All industries	Strategic thinking	Leadership	2	Linking daily work to long-term goals.	Connects team priorities to business strategy.	Situational judgement test + 360 feedback	7
SK-LDR-09	Leadership & Management	All industries	Hiring & team building (as a manager)	Leadership	2	Choosing and onboarding the right people.	Runs structured hiring and onboards new joiners well.	Situational judgement test + 360 feedback	3
SK-LDR-10	Leadership & Management	All industries	Budget & P&L ownership	Leadership	2	Owning cost, revenue and margin for a unit.	Plans and tracks a budget and explains variances.	Situational judgement test + 360 feedback	18
SK-HR-01	People & HR	All industries	Talent acquisition & sourcing	Functional	2	Finding, screening and closing candidates.	Runs a full requisition alone and meets time-to-fill.	Scenario test + manager rating	2
SK-HR-02	People & HR	All industries	Structured interviewing	Functional	2	Running consistent, evidence-based interviews.	Uses scorecards and probing questions.	Scenario test + manager rating	2
SK-HR-03	People & HR	All industries	HR business partnering	Functional	2	Advising managers on people matters.	Resolves recurring people issues with managers.	Scenario test + manager rating	3
SK-HR-04	People & HR	All industries	Employee relations & grievance handling	Functional	3	Handling complaints and discipline fairly.	Closes cases on time with defensible records.	Scenario test + manager rating	2
SK-HR-05	People & HR	All industries	Payroll processing	Technical	3	Preparing accurate monthly payroll.	Runs payroll on time with variance checks.	Practical task or timed test	1
SK-HR-06	People & HR	All industries	Statutory compliance (PF, ESI, PT, TDS)	Compliance	3	Calculating and filing statutory contributions and returns.	Files returns on schedule and resolves routine notices.	Knowledge test (pass mark 80%) + scenario check	3
SK-HR-07	People & HR	All industries	Compensation & benefits	Functional	2	Designing and running pay and benefits.	Benchmarks roles and builds clear pay proposals.	Scenario test + manager rating	4
SK-HR-08	People & HR	All industries	Performance management	Functional	2	Running goal-setting, review and calibration.	Runs a full cycle and coaches managers on fair ratings.	Scenario test + manager rating	4

SK-HR-09	People & HR	All industries	Learning & development design	Functional	2	Designing learning that closes a skill gap.	Designs a path with objectives, practice and measures.	Scenario test + manager rating	3
SK-HR-10	People & HR	All industries	HR analytics	Technical	2	Using people data to answer business questions.	Builds attrition and hiring dashboards and explains drivers.	Practical task or timed test	4
SK-HR-11	People & HR	All industries	Labour law fundamentals	Compliance	2	Knowing core Indian employment rules for the role.	Applies rules to routine cases and escalates correctly.	Knowledge test (pass mark 80%) + scenario check	5
SK-HR-12	People & HR	All industries	Onboarding & employee lifecycle	Functional	2	Running joining, confirmation and exit smoothly.	Onboards new joiners with no missed steps.	Scenario test + manager rating	1
SK-HR-13	People & HR	All industries	HRIS administration	Technical	2	Maintaining the HR system and records.	Keeps records accurate and runs standard reports.	Practical task or timed test	1
SK-HR-14	People & HR	All industries	Employee engagement & culture	Functional	2	Building engagement and a healthy culture.	Runs pulse surveys and acts on the results.	Scenario test + manager rating	2
SK-HR-15	People & HR	All industries	Workforce planning	Functional	2	Matching headcount to business demand.	Builds a headcount plan tied to the business plan.	Scenario test + manager rating	1
SK-FIN-01	Finance & Accounting	All industries	Accounting & bookkeeping	Functional	3	Recording transactions accurately.	Posts entries correctly and closes on time.	Scenario test + manager rating	1
SK-FIN-02	Finance & Accounting	All industries	Accounts payable & receivable	Functional	2	Paying vendors and collecting dues on time.	Processes invoices accurately; ageing is under control.	Scenario test + manager rating	2
SK-FIN-03	Finance & Accounting	All industries	Month-end close & reconciliation	Functional	3	Closing books and reconciling balances.	Closes on schedule with reconciled balances.	Scenario test + manager rating	3
SK-FIN-04	Finance & Accounting	All industries	GST & tax compliance	Compliance	3	Filing indirect and direct taxes correctly.	Files returns on time and resolves routine queries.	Knowledge test (pass mark 80%) + scenario check	2
SK-FIN-05	Finance & Accounting	All industries	Budgeting & forecasting	Functional	2	Planning budgets and forecasts.	Builds budgets and explains variances.	Scenario test + manager rating	3
SK-FIN-06	Finance & Accounting	All industries	Financial analysis & reporting	Functional	2	Analysing results and reporting to leaders.	Produces accurate MIS with clear commentary.	Scenario test + manager rating	6
SK-FIN-07	Finance & Accounting	All industries	Financial modelling	Technical	2	Building models to test decisions.	Builds a working model with checked assumptions.	Practical task or timed test	3
SK-FIN-08	Finance & Accounting	All industries	Cash & treasury management	Functional	2	Managing cash, banking and liquidity.	Forecasts cash and manages bank relationships.	Scenario test + manager rating	2
SK-FIN-09	Finance & Accounting	All industries	Internal audit & controls	Functional	2	Testing that controls work.	Plans and completes audits with clear findings.	Scenario test + manager rating	5

SK-FIN-10	Finance & Accounting	All industries	Costing & margin analysis	Functional	2	Understanding cost and margin by product or service.	Builds unit costing and explains margin drivers.	Scenario test + manager rating	1
SK-SAL-01	Sales & Business Development	All industries	Prospecting & lead generation	Functional	2	Finding and qualifying new customers.	Builds a steady qualified pipeline.	Scenario test + manager rating	6
SK-SAL-02	Sales & Business Development	All industries	Consultative selling	Functional	3	Understanding needs and shaping a fitting solution.	Discovery calls lead to qualified proposals.	Scenario test + manager rating	7
SK-SAL-03	Sales & Business Development	All industries	Negotiation	Functional	2	Reaching agreements that protect value.	Closes without needless discounting.	Scenario test + manager rating	23
SK-SAL-04	Sales & Business Development	All industries	CRM discipline	Technical	2	Keeping customer records current.	Updates records the same day; data is trusted.	Practical task or timed test	29
SK-SAL-05	Sales & Business Development	All industries	Account management	Functional	2	Growing and retaining existing customers.	Holds regular reviews and spots renewal risks.	Scenario test + manager rating	10
SK-SAL-06	Sales & Business Development	All industries	Telesales & outbound calling	Functional	2	Selling by phone with structure.	Meets call and conversion targets.	Scenario test + manager rating	3
SK-SAL-07	Sales & Business Development	All industries	Field sales & beat management	Functional	2	Covering a territory or beat effectively.	Follows the route plan and hits coverage and sales.	Scenario test + manager rating	3
SK-SAL-08	Sales & Business Development	All industries	Pipeline & forecast management	Functional	2	Tracking deals and forecasting accurately.	Forecasts within an agreed margin.	Scenario test + manager rating	12
SK-MKT-01	Marketing & Growth	All industries	Digital marketing	Functional	2	Planning and running online campaigns.	Runs multi-channel campaigns to target.	Scenario test + manager rating	4
SK-MKT-02	Marketing & Growth	All industries	SEO & content marketing	Functional	2	Earning organic traffic with useful content.	Grows organic traffic with a content plan.	Scenario test + manager rating	3
SK-MKT-03	Marketing & Growth	All industries	Paid media & performance marketing	Functional	2	Running paid campaigns to cost and return targets.	Meets cost-per-acquisition and return targets.	Scenario test + manager rating	2
SK-MKT-04	Marketing & Growth	All industries	Social media management	Functional	2	Building audience and engagement on social channels.	Runs a content calendar and grows engagement.	Scenario test + manager rating	2
SK-MKT-05	Marketing & Growth	All industries	Brand management	Functional	2	Building and protecting the brand.	Keeps messaging consistent and tracks brand health.	Scenario test + manager rating	2
SK-MKT-06	Marketing & Growth	All industries	Marketing analytics & attribution	Technical	2	Measuring what marketing delivers.	Builds funnel reports and explains channel return.	Practical task or timed test	8
SK-MKT-07	Marketing & Growth	All industries	Email & lifecycle marketing	Functional	2	Engaging customers across their lifecycle.	Runs segmented journeys with measured lift.	Scenario test + manager rating	2

SK-MKT-08	Marketing & Growth	All industries	Copywriting	Functional	2	Writing persuasive, clear copy.	Writes copy that meets the brief and converts.	Scenario test + manager rating	5
SK-MKT-09	Marketing & Growth	All industries	Events & field marketing	Functional	2	Planning and running events and activations.	Delivers events on budget with measured leads.	Scenario test + manager rating	1
SK-MKT-10	Marketing & Growth	All industries	Public relations & communications	Functional	1	Managing media and public messages.	Handles media queries and releases well.	Scenario test + manager rating	1
SK-CX-01	Customer Service & Support	All industries	Customer communication	Behavioural	3	Communicating clearly, politely and promptly.	Customers rate interactions positively.	Situational judgement test + 360 feedback	29
SK-CX-02	Customer Service & Support	All industries	Complaint resolution & service recovery	Functional	3	Turning a failure into a resolved customer.	Resolves within SLA and leaves the customer satisfied.	Scenario test + manager rating	10
SK-CX-03	Customer Service & Support	All industries	Product & service knowledge	Functional	3	Knowing what is offered and how it works.	Answers most questions without escalation.	Scenario test + manager rating	6
SK-CX-04	Customer Service & Support	All industries	SLA & service quality management	Functional	2	Meeting response and resolution standards.	Meets SLA consistently and explains misses.	Scenario test + manager rating	5
SK-CX-05	Customer Service & Support	All industries	Voice support handling	Functional	3	Handling customer calls with control and empathy.	Meets quality, handle time and resolution targets.	Scenario test + manager rating	3
SK-CX-06	Customer Service & Support	All industries	Chat & email support	Functional	3	Resolving queries in writing quickly and well.	Meets quality, response time and resolution targets.	Scenario test + manager rating	3
SK-CX-07	Customer Service & Support	All industries	Escalation handling	Functional	2	Managing difficult and escalated cases.	Defuses escalations and closes with ownership.	Scenario test + manager rating	2
SK-CX-08	Customer Service & Support	All industries	Customer success & retention	Functional	2	Helping customers get value and stay.	Keeps churn low and expands usage.	Scenario test + manager rating	1
SK-OPS-01	Operations & Process	All industries	Process improvement	Functional	2	Removing waste from how work gets done.	Maps a process and delivers measurable gains.	Scenario test + manager rating	3
SK-OPS-02	Operations & Process	All industries	Vendor management	Functional	2	Selecting and managing suppliers.	Tracks performance and resolves vendor issues.	Scenario test + manager rating	12
SK-OPS-03	Operations & Process	All industries	Project management	Functional	2	Delivering work on time, scope and budget.	Plans, tracks risks and delivers small projects.	Scenario test + manager rating	9
SK-OPS-04	Operations & Process	All industries	SOP & documentation writing	Functional	2	Writing clear procedures others can follow.	Documents a process so a new person can run it.	Scenario test + manager rating	11
SK-OPS-05	Operations & Process	All industries	MIS & reporting	Functional	2	Producing accurate management reports.	Delivers reports on time with checked numbers.	Scenario test + manager rating	29

SK-OPS-06	Operations & Process	All industries	Quality management	Functional	2	Keeping output within quality standards.	Runs checks and drives down defects.	Scenario test + manager rating	2
SK-OPS-07	Operations & Process	All industries	Lean & Six Sigma methods	Functional	2	Using structured methods to improve processes.	Leads a small improvement project to a result.	Scenario test + manager rating	1
SK-OPS-08	Operations & Process	All industries	Capacity & resource planning	Functional	2	Matching resources to demand.	Plans capacity and avoids over or under staffing.	Scenario test + manager rating	3
SK-OPS-09	Operations & Process	All industries	Office & administration management	Functional	1	Running office services and records.	Keeps admin tasks accurate and on time.	Scenario test + manager rating	1
SK-SCM-01	Supply Chain & Logistics	Logistics & Supply Chain	Procurement & sourcing	Functional	2	Buying the right goods and services at the right cost.	Runs sourcing events and negotiates savings.	Scenario test + manager rating	2
SK-SCM-02	Supply Chain & Logistics	Logistics & Supply Chain	Inventory management	Functional	3	Keeping stock accurate and available.	Keeps stock accuracy and availability on target.	Scenario test + manager rating	8
SK-SCM-03	Supply Chain & Logistics	Logistics & Supply Chain	Warehouse operations	Functional	3	Receiving, storing and dispatching safely and accurately.	Runs shifts with accuracy and safety targets.	Scenario test + manager rating	3
SK-SCM-04	Supply Chain & Logistics	Logistics & Supply Chain	Transport & fleet management	Functional	2	Planning and managing vehicles and routes.	Meets on-time delivery and cost targets.	Scenario test + manager rating	2
SK-SCM-05	Supply Chain & Logistics	Logistics & Supply Chain	Last-mile delivery operations	Functional	2	Delivering to customers quickly and correctly.	Hits delivery success and on-time targets.	Scenario test + manager rating	3
SK-SCM-06	Supply Chain & Logistics	Logistics & Supply Chain	Demand & supply planning	Functional	2	Forecasting demand and planning supply.	Forecast accuracy meets the target.	Scenario test + manager rating	2
SK-SCM-07	Supply Chain & Logistics	Logistics & Supply Chain	Export-import & customs documentation	Compliance	2	Handling trade documents and customs rules.	Files accurate documents with few holds.	Knowledge test (pass mark 80%) + scenario check	1
SK-SCM-08	Supply Chain & Logistics	Logistics & Supply Chain	Supplier quality & audit	Functional	2	Making sure suppliers meet standards.	Audits suppliers and closes findings.	Scenario test + manager rating	1
SK-TEC-01	IT, Software & Engineering	IT / Software	Python programming	Technical	2	Writing clear, working Python.	Builds and maintains scripts or services with tests.	Practical task or timed test	6
SK-TEC-02	IT, Software & Engineering	IT / Software	JavaScript / TypeScript	Technical	2	Building web features in JS or TS.	Delivers front-end or Node features independently.	Practical task or timed test	3
SK-TEC-03	IT, Software & Engineering	IT / Software	Java & backend services	Technical	2	Building backend services in Java or similar.	Delivers reliable services with tests.	Practical task or timed test	3
SK-TEC-04	IT, Software & Engineering	IT / Software	SQL & databases	Technical	3	Querying and designing relational data.	Writes joins and aggregates; reads query plans.	Practical task or timed test	18

SK-TEC-05	IT, Software & Engineering	IT / Software	API design & integration	Technical	2	Designing and connecting services by API.	Designs consistent endpoints with error handling.	Practical task or timed test	8
SK-TEC-06	IT, Software & Engineering	IT / Software	Software testing & QA	Technical	3	Verifying software before and after release.	Writes tests and finds defects before release.	Practical task or timed test	6
SK-TEC-07	IT, Software & Engineering	IT / Software	Test automation	Technical	2	Automating tests in a pipeline.	Maintains reliable automated suites.	Practical task or timed test	1
SK-TEC-08	IT, Software & Engineering	IT / Software	Version control & code review	Technical	2	Using Git and reviewing code well.	Works with branches cleanly and reviews usefully.	Practical task or timed test	8
SK-TEC-09	IT, Software & Engineering	IT / Software	Cloud infrastructure (AWS or equivalent)	Technical	3	Running workloads on cloud safely and economically.	Deploys and operates services with sensible cost and security.	Practical task or timed test	10
SK-TEC-10	IT, Software & Engineering	IT / Software	CI/CD & release management	Technical	3	Automating build, test and release.	Maintains pipelines; releases are repeatable and reversible.	Practical task or timed test	3
SK-TEC-11	IT, Software & Engineering	IT / Software	Containers & orchestration	Technical	2	Packaging and running apps in containers.	Builds images and runs multi-service setups reliably.	Practical task or timed test	2
SK-TEC-12	IT, Software & Engineering	IT / Software	Monitoring & incident response	Technical	3	Detecting and handling production issues.	Responds to incidents calmly and writes reviews.	Practical task or timed test	6
SK-TEC-13	IT, Software & Engineering	IT / Software	Application security	Technical	3	Building software that resists common attacks.	Prevents common vulnerabilities and handles secrets properly.	Practical task or timed test	9
SK-TEC-14	IT, Software & Engineering	IT / Software	System design	Technical	2	Designing systems that scale and fail safely.	Produces a sound design with trade-offs explained.	Practical task or timed test	8
SK-TEC-15	IT, Software & Engineering	IT / Software	AI tools & prompt engineering	Technical	2	Using AI tools effectively and safely.	Gets reliable results and checks outputs.	Practical task or timed test	2
SK-TEC-16	IT, Software & Engineering	IT / Software	Mobile app development	Technical	2	Building Android or iOS apps.	Ships and maintains a mobile feature.	Practical task or timed test	1
SK-TEC-17	IT, Software & Engineering	IT / Software	Front-end frameworks & UI build	Technical	2	Building responsive interfaces.	Builds accessible, responsive screens.	Practical task or timed test	2
SK-TEC-18	IT, Software & Engineering	IT / Software	IT service management	Functional	2	Running incident, request and change processes.	Resolves tickets within SLA and keeps records clean.	Scenario test + manager rating	4
SK-TEC-19	IT, Software & Engineering	IT / Software	Networking & infrastructure	Technical	2	Running networks and servers.	Maintains reliable connectivity and fixes faults.	Practical task or timed test	5
SK-TEC-20	IT, Software & Engineering	IT / Software	Database administration	Technical	2	Keeping databases fast, safe and backed up.	Tunes, backs up and restores databases reliably.	Practical task or timed test	2

SK-DAT-01	Data, Analytics & AI	All industries	Advanced Excel / spreadsheets	Technical	2	Building accurate models and reports in spreadsheets.	Uses lookups, pivots and formulas without errors.	Practical task or timed test	35
SK-DAT-02	Data, Analytics & AI	All industries	Data visualisation & BI dashboards	Technical	2	Turning data into clear dashboards.	Builds dashboards leaders use.	Practical task or timed test	5
SK-DAT-03	Data, Analytics & AI	All industries	Statistics fundamentals	Technical	1	Using basic statistics soundly.	Chooses sensible measures and avoids misreads.	Practical task or timed test	11
SK-DAT-04	Data, Analytics & AI	All industries	Data storytelling	Behavioural	2	Explaining what data means and what to do.	Presents findings with a clear recommendation.	Situational judgement test + 360 feedback	15
SK-DAT-05	Data, Analytics & AI	All industries	Data engineering & pipelines	Technical	2	Moving and shaping data reliably.	Builds and monitors stable pipelines.	Practical task or timed test	1
SK-DAT-06	Data, Analytics & AI	All industries	Machine learning	Technical	2	Building models that predict or classify.	Builds, validates and explains a model.	Practical task or timed test	2
SK-DAT-07	Data, Analytics & AI	All industries	Data quality & governance	Functional	2	Keeping data accurate, owned and protected.	Defines checks and fixes data issues at source.	Scenario test + manager rating	4
SK-DAT-08	Data, Analytics & AI	All industries	Forecasting & modelling	Technical	2	Predicting demand or outcomes.	Builds forecasts with tracked accuracy.	Practical task or timed test	7
SK-DAT-09	Data, Analytics & AI	All industries	Generative AI applications	Technical	2	Building useful workflows with generative AI.	Builds reliable AI features with checks.	Practical task or timed test	2
SK-PRD-01	Product & Design	IT / Software	Product management	Functional	2	Deciding what to build and why.	Owns a product with clear goals and results.	Scenario test + manager rating	2
SK-PRD-02	Product & Design	IT / Software	UX & UI design	Functional	2	Designing usable, clear interfaces.	Designs flows that users complete without help.	Scenario test + manager rating	4
SK-PRD-03	Product & Design	IT / Software	User research	Functional	2	Learning what users need.	Runs studies that change decisions.	Scenario test + manager rating	3
SK-PRD-04	Product & Design	IT / Software	Agile & Scrum practice	Functional	2	Delivering work in short cycles.	Runs sprints and keeps the backlog healthy.	Scenario test + manager rating	6
SK-PRD-05	Product & Design	IT / Software	Business analysis & requirements	Functional	2	Turning needs into clear requirements.	Writes testable requirements that teams accept.	Scenario test + manager rating	2
SK-PRD-06	Product & Design	IT / Software	Roadmapping & prioritisation	Functional	2	Ordering work by value and effort.	Maintains a roadmap leaders trust.	Scenario test + manager rating	2
SK-RSK-01	Risk, Compliance & Safety	All industries	POSH awareness & compliance	Compliance	3	Understanding and applying the POSH Act.	Explains obligations and reports concerns correctly.	Knowledge test (pass mark 80%) + scenario check	187

SK-RSK-02	Risk, Compliance & Safety	All industries	Data privacy (DPDP) compliance	Compliance	3	Handling personal data lawfully.	Applies consent, purpose and rights rules.	Knowledge test (pass mark 80%) + scenario check	187
SK-RSK-03	Risk, Compliance & Safety	All industries	Risk management	Functional	2	Identifying and managing risks.	Maintains a risk register with owners and actions.	Scenario test + manager rating	11
SK-RSK-04	Risk, Compliance & Safety	All industries	Contract management	Functional	2	Reviewing and managing contracts.	Reviews contracts and tracks obligations.	Scenario test + manager rating	4
SK-RSK-05	Risk, Compliance & Safety	All industries	Regulatory compliance management	Compliance	3	Meeting rules set by regulators.	Tracks changes and keeps filings current.	Knowledge test (pass mark 80%) + scenario check	5
SK-RSK-06	Risk, Compliance & Safety	All industries	Workplace health & safety	Compliance	3	Keeping people safe at work.	Follows procedures and reports hazards promptly.	Knowledge test (pass mark 80%) + scenario check	14
SK-RSK-07	Risk, Compliance & Safety	All industries	Business continuity & incident management	Functional	2	Staying operational during disruption.	Runs drills and keeps plans current.	Scenario test + manager rating	1
SK-ECM-01	E-commerce	E-commerce	Catalogue & listing management	Functional	3	Creating accurate, rich product listings.	Lists with low error rates and good content.	Scenario test + manager rating	4
SK-ECM-02	E-commerce	E-commerce	Marketplace account management	Functional	2	Managing seller accounts on marketplaces.	Meets marketplace health and sales targets.	Scenario test + manager rating	1
SK-ECM-03	E-commerce	E-commerce	Seller onboarding & operations	Functional	2	Bringing sellers on and keeping them compliant.	Onboards sellers on time with few issues.	Scenario test + manager rating	1
SK-ECM-04	E-commerce	E-commerce	Order fulfilment & tracking	Functional	3	Getting orders picked, packed and shipped.	Meets dispatch and accuracy targets.	Scenario test + manager rating	3
SK-ECM-05	E-commerce	E-commerce	Returns, refunds & reverse logistics	Functional	2	Handling returns quickly and correctly.	Processes returns within SLA with low leakage.	Scenario test + manager rating	2
SK-ECM-06	E-commerce	E-commerce	Pricing & promotions	Functional	2	Setting prices and offers that win and earn.	Sets prices that hold margin and move volume.	Scenario test + manager rating	6
SK-ECM-07	E-commerce	E-commerce	Category management	Functional	2	Owning assortment and performance of a category.	Grows category sales and margin.	Scenario test + manager rating	1
SK-ECM-08	E-commerce	E-commerce	Online merchandising	Functional	2	Presenting products to drive conversion.	Improves page conversion through placement.	Scenario test + manager rating	2
SK-ECM-09	E-commerce	E-commerce	Conversion rate optimisation	Technical	2	Testing changes that lift conversion.	Runs tests that deliver lift.	Practical task or timed test	2
SK-ECM-10	E-commerce	E-commerce	COD & RTO management	Functional	2	Cutting returns-to-origin and cash-on-delivery losses.	Reduces RTO rate with verification and routing.	Scenario test + manager rating	3

SK-EDU-01	EdTech & Education	EdTech & Education	Admissions counselling	Functional	3	Guiding students to the right course and college.	Converts qualified leads with honest advice.	Scenario test + manager rating	4
SK-EDU-02	EdTech & Education	EdTech & Education	Education lead qualification	Functional	2	Judging student intent and fit quickly.	Qualifies leads accurately; data is clean.	Scenario test + manager rating	4
SK-EDU-03	EdTech & Education	EdTech & Education	College & institution partnerships	Functional	2	Building and managing college partners.	Signs and retains partners; keeps listings current.	Scenario test + manager rating	2
SK-EDU-04	EdTech & Education	EdTech & Education	Application & admission processing	Functional	3	Processing applications accurately.	Processes files on time with few errors.	Scenario test + manager rating	2
SK-EDU-05	EdTech & Education	EdTech & Education	Career & course counselling	Functional	2	Advising on careers and courses.	Gives structured, unbiased advice.	Scenario test + manager rating	4
SK-EDU-06	EdTech & Education	EdTech & Education	Curriculum & course design	Functional	3	Designing courses with clear outcomes.	Designs a course aligned to outcomes and accreditation.	Scenario test + manager rating	4
SK-EDU-07	EdTech & Education	EdTech & Education	Pedagogy & active learning	Functional	3	Teaching in ways that make students learn.	Uses varied active methods; student feedback is strong.	Scenario test + manager rating	3
SK-EDU-08	EdTech & Education	EdTech & Education	Assessment design & evaluation	Functional	2	Setting fair assessments.	Designs assessments mapped to outcomes with rubrics.	Scenario test + manager rating	3
SK-EDU-09	EdTech & Education	EdTech & Education	Outcome-based education & accreditation (NBA / NAAC)	Compliance	2	Working to outcome-based and accreditation criteria.	Maps outcomes and gathers accreditation evidence.	Knowledge test (pass mark 80%) + scenario check	4
SK-EDU-10	EdTech & Education	EdTech & Education	Research & publication	Functional	2	Planning, doing and publishing research.	Publishes in credible venues and guides projects.	Scenario test + manager rating	3
SK-EDU-11	EdTech & Education	EdTech & Education	Student mentoring	Functional	2	Guiding students on learning and careers.	Mentors a cohort with recorded outcomes.	Scenario test + manager rating	5
SK-EDU-12	EdTech & Education	EdTech & Education	EdTech & online teaching tools	Technical	2	Teaching well with digital tools.	Runs engaging online or blended sessions.	Practical task or timed test	2
SK-EDU-13	EdTech & Education	EdTech & Education	Instructional design	Functional	2	Building effective learning experiences.	Builds courses with objectives, practice and assessment.	Scenario test + manager rating	2
SK-EDU-14	EdTech & Education	EdTech & Education	Student success & retention	Functional	2	Helping students stay and succeed.	Keeps drop-off low with timely support.	Scenario test + manager rating	1
SK-FMC-01	FMCG & Consumer Goods	FMCG	Route-to-market & beat planning	Functional	2	Planning how products reach outlets.	Builds beats that cover outlets efficiently.	Scenario test + manager rating	3
SK-FMC-02	FMCG & Consumer Goods	FMCG	Distributor & retailer management	Functional	3	Managing distributors and retail outlets.	Keeps stock, credit and service on target.	Scenario test + manager rating	3

SK-FMC-03	FMCG & Consumer Goods	FMCG	Trade marketing & promotions	Functional	2	Running trade schemes and promotions.	Runs promotions with measured lift.	Scenario test + manager rating	3
SK-FMC-04	FMCG & Consumer Goods	FMCG	Merchandising & shelf compliance	Functional	2	Keeping products visible and available.	Meets shelf share and availability targets.	Scenario test + manager rating	4
SK-FMC-05	FMCG & Consumer Goods	FMCG	Secondary sales & claims	Functional	2	Tracking sales to retailers and settling claims.	Keeps claims accurate and settled on time.	Scenario test + manager rating	4
SK-FMC-06	FMCG & Consumer Goods	FMCG	Brand planning	Functional	2	Planning brand activity and budgets.	Delivers a brand plan with clear measures.	Scenario test + manager rating	1
SK-FMC-07	FMCG & Consumer Goods	FMCG	Modern trade & key accounts	Functional	2	Managing large retail chains.	Grows key account sales and margin.	Scenario test + manager rating	1
SK-FMC-08	FMCG & Consumer Goods	FMCG	Food safety & quality assurance	Compliance	3	Meeting food safety and quality rules.	Follows hygiene and quality procedures; audits pass.	Knowledge test (pass mark 80%) + scenario check	1
SK-BPO-01	ITES, BPO & KPO	ITES / BPO / KPO	Productivity & handle-time management	Functional	2	Working fast without losing quality.	Meets productivity and quality targets together.	Scenario test + manager rating	4
SK-BPO-02	ITES, BPO & KPO	ITES / BPO / KPO	Quality auditing & calibration	Functional	3	Scoring interactions fairly and consistently.	Audits accurately and calibrates with peers.	Scenario test + manager rating	3
SK-BPO-03	ITES, BPO & KPO	ITES / BPO / KPO	Workforce management & scheduling	Functional	2	Forecasting volumes and building schedules.	Schedules meet service level at low cost.	Scenario test + manager rating	3
SK-BPO-04	ITES, BPO & KPO	ITES / BPO / KPO	Process transition & knowledge transfer	Functional	2	Moving work to a new team smoothly.	Completes transitions with stable results.	Scenario test + manager rating	1
SK-BPO-05	ITES, BPO & KPO	ITES / BPO / KPO	Process training & nesting	Functional	2	Training new hires to be productive.	New hires reach target proficiency on time.	Scenario test + manager rating	1
SK-BPO-06	ITES, BPO & KPO	ITES / BPO / KPO	Data processing accuracy	Functional	3	Entering and checking data accurately.	Meets accuracy and speed targets.	Scenario test + manager rating	2
SK-BPO-07	ITES, BPO & KPO	ITES / BPO / KPO	Back-office & document processing	Functional	2	Processing documents and requests.	Clears queues within turnaround time.	Scenario test + manager rating	1
SK-BPO-08	ITES, BPO & KPO	ITES / BPO / KPO	Collections & recovery calling	Functional	2	Recovering dues with compliant, respectful calls.	Meets recovery targets within conduct rules.	Scenario test + manager rating	1
SK-BPO-09	ITES, BPO & KPO	ITES / BPO / KPO	Delivery & SLA governance	Functional	2	Meeting client service commitments.	Meets client SLAs and reports clearly.	Scenario test + manager rating	5
SK-BPO-10	ITES, BPO & KPO	ITES / BPO / KPO	Process excellence	Functional	2	Improving process performance with data.	Delivers improvement projects with savings.	Scenario test + manager rating	3

SK-BPO-11	ITES, BPO & KPO	ITES / BPO / KPO	Research & analysis (KPO)	Functional	3	Researching and summarising for clients.	Delivers accurate, well-sourced research.	Scenario test + manager rating	4
SK-BPO-12	ITES, BPO & KPO	ITES / BPO / KPO	Legal process & contract review	Functional	2	Reviewing documents against legal criteria.	Reviews contracts accurately within turnaround.	Scenario test + manager rating	1
SK-BPO-13	ITES, BPO & KPO	ITES / BPO / KPO	Data annotation & labelling	Functional	2	Labelling data accurately for AI use.	Meets accuracy on labelling guidelines.	Scenario test + manager rating	1
SK-BPO-14	ITES, BPO & KPO	ITES / BPO / KPO	Market & competitive research	Functional	2	Gathering and analysing market information.	Produces reports that inform decisions.	Scenario test + manager rating	3
SK-RET-01	Retail & Store Operations	Retail	Store operations	Functional	3	Running daily store routines.	Opens, runs and closes the store to standard.	Scenario test + manager rating	3
SK-RET-02	Retail & Store Operations	Retail	Visual merchandising	Functional	2	Presenting products to attract and sell.	Sets displays that meet plan and lift sales.	Scenario test + manager rating	2
SK-RET-03	Retail & Store Operations	Retail	POS & billing	Technical	3	Using the till and billing accurately.	Bills with few errors and correct cash handling.	Practical task or timed test	2
SK-RET-04	Retail & Store Operations	Retail	Stock & replenishment	Functional	3	Keeping shelves stocked and counts accurate.	Keeps availability and stock accuracy on target.	Scenario test + manager rating	6
SK-RET-05	Retail & Store Operations	Retail	Loss prevention	Compliance	2	Reducing theft and shrinkage.	Follows controls and keeps shrinkage within target.	Knowledge test (pass mark 80%) + scenario check	4
SK-RET-06	Retail & Store Operations	Retail	In-store customer experience	Behavioural	3	Making visits easy and pleasant.	Customers rate service highly.	Situational judgement test + 360 feedback	2
SK-RET-07	Retail & Store Operations	Retail	Floor selling & upselling	Functional	2	Helping customers choose and buy more.	Meets conversion and basket targets.	Scenario test + manager rating	2
SK-RET-08	Retail & Store Operations	Retail	Buying & assortment planning	Functional	2	Choosing what to stock.	Builds assortments that sell through.	Scenario test + manager rating	1
SK-RET-09	Retail & Store Operations	Retail	Store P&L & staffing	Functional	2	Managing store costs, sales and rosters.	Hits the store budget with a fair roster.	Scenario test + manager rating	3
SK-RET-10	Retail & Store Operations	Retail	Omnichannel & click-and-collect	Functional	2	Linking online and store service.	Fulfils omnichannel orders accurately.	Scenario test + manager rating	2
SK-HLT-01	Healthcare	Healthcare	Basic patient care	Functional	3	Caring for patients safely and kindly.	Delivers care to protocol with good patient feedback.	Scenario test + manager rating	5
SK-HLT-02	Healthcare	Healthcare	Nursing procedures & medication safety	Functional	3	Performing procedures and giving medicines safely.	Follows protocol with no medication errors.	Scenario test + manager rating	2

SK-HLT-03	Healthcare	Healthcare	Infection prevention & control	Compliance	3	Preventing infection in care settings.	Follows hygiene and isolation protocols.	Knowledge test (pass mark 80%) + scenario check	7
SK-HLT-04	Healthcare	Healthcare	Clinical documentation	Functional	3	Recording care accurately and on time.	Records are complete, accurate and timely.	Scenario test + manager rating	7
SK-HLT-05	Healthcare	Healthcare	Medical coding (ICD / CPT)	Technical	3	Coding diagnoses and procedures correctly.	Meets coding accuracy and turnaround targets.	Practical task or timed test	2
SK-HLT-06	Healthcare	Healthcare	Revenue cycle & medical billing	Functional	2	Billing and collecting for care delivered.	Keeps claim denials and ageing low.	Scenario test + manager rating	3
SK-HLT-07	Healthcare	Healthcare	Laboratory procedures	Technical	3	Running tests accurately and safely.	Runs tests to protocol with quality checks.	Practical task or timed test	1
SK-HLT-08	Healthcare	Healthcare	Sample collection & handling	Functional	3	Collecting and handling samples correctly.	Collects without rejection or contamination.	Scenario test + manager rating	2
SK-HLT-09	Healthcare	Healthcare	Pharmacy dispensing & stock	Functional	3	Dispensing safely and managing drug stock.	Dispenses accurately and manages expiry and stock.	Scenario test + manager rating	1
SK-HLT-10	Healthcare	Healthcare	Imaging procedures	Technical	3	Performing imaging safely and well.	Produces quality images following safety rules.	Practical task or timed test	1
SK-HLT-11	Healthcare	Healthcare	Patient experience & front desk	Functional	2	Welcoming and guiding patients.	Short waits and good patient ratings.	Scenario test + manager rating	3
SK-HLT-12	Healthcare	Healthcare	Quality & accreditation (NABH)	Compliance	2	Meeting accreditation standards.	Keeps evidence ready and audits pass.	Knowledge test (pass mark 80%) + scenario check	4
SK-HLT-13	Healthcare	Healthcare	Emergency response & basic life support	Compliance	3	Acting fast in emergencies.	Performs basic life support and follows escalation protocol.	Knowledge test (pass mark 80%) + scenario check	3
SK-HLT-14	Healthcare	Healthcare	Telehealth coordination	Functional	2	Running remote consultations smoothly.	Schedules and supports consults without drop-offs.	Scenario test + manager rating	1
SK-HLT-15	Healthcare	Healthcare	Hospital administration & bed management	Functional	2	Running admissions, beds and discharge.	Keeps bed use high and discharge timely.	Scenario test + manager rating	2
SK-BFS-01	Banking, Insurance & Financial Services	BFSI	KYC & customer due diligence	Compliance	3	Verifying customers as rules require.	Completes KYC accurately with no regulatory gaps.	Knowledge test (pass mark 80%) + scenario check	7
SK-BFS-02	Banking, Insurance & Financial Services	BFSI	AML & transaction monitoring	Compliance	3	Spotting and reporting suspicious activity.	Reviews alerts accurately and files reports on time.	Knowledge test (pass mark 80%) + scenario check	5
SK-BFS-03	Banking, Insurance & Financial Services	BFSI	Credit appraisal	Functional	3	Assessing ability and willingness to repay.	Appraises files accurately within policy.	Scenario test + manager rating	2

SK-BFS-04	Banking, Insurance & Financial Services	BFSI	Insurance underwriting	Functional	3	Assessing and pricing insurance risk.	Underwrites within guidelines with good loss ratios.	Scenario test + manager rating	1
SK-BFS-05	Banking, Insurance & Financial Services	BFSI	Insurance claims handling	Functional	3	Assessing and settling claims fairly.	Settles claims within turnaround and policy.	Scenario test + manager rating	1
SK-BFS-06	Banking, Insurance & Financial Services	BFSI	Loan processing & disbursement	Functional	3	Processing loans from file to disbursal.	Processes without errors within turnaround.	Scenario test + manager rating	1
SK-BFS-07	Banking, Insurance & Financial Services	BFSI	Collections & recovery management	Functional	2	Managing delinquent accounts compliantly.	Meets roll-back and recovery targets.	Scenario test + manager rating	2
SK-BFS-08	Banking, Insurance & Financial Services	BFSI	Retail banking products & advice	Functional	3	Advising customers on accounts and products.	Gives suitable, compliant advice.	Scenario test + manager rating	4
SK-BFS-09	Banking, Insurance & Financial Services	BFSI	Wealth & investment advisory	Functional	2	Advising on investments suitably.	Builds suitable plans within regulation.	Scenario test + manager rating	1
SK-BFS-10	Banking, Insurance & Financial Services	BFSI	Branch operations & cash handling	Functional	3	Running branch services and cash safely.	Balances cash and follows controls.	Scenario test + manager rating	2
SK-BFS-11	Banking, Insurance & Financial Services	BFSI	Banking regulation & audit readiness	Compliance	3	Meeting banking rules and audit needs.	Keeps records audit-ready and findings closed.	Knowledge test (pass mark 80%) + scenario check	7
SK-BFS-12	Banking, Insurance & Financial Services	BFSI	Fraud detection & investigation	Functional	3	Detecting and investigating fraud.	Finds fraud patterns and closes cases well.	Scenario test + manager rating	2
SK-BFS-13	Banking, Insurance & Financial Services	BFSI	Insurance advisory & policy servicing	Functional	2	Advising on and servicing policies.	Sells suitable policies and servicing is accurate.	Scenario test + manager rating	1
SK-BFS-14	Banking, Insurance & Financial Services	BFSI	Treasury & market operations	Functional	2	Settling and controlling market transactions.	Settles accurately and reconciles daily.	Scenario test + manager rating	1
SK-FTC-01	Fintech	Fintech	Payments & settlement operations	Functional	3	Running payment flows and settlement.	Reconciles and settles with low exceptions.	Scenario test + manager rating	3
SK-FTC-02	Fintech	Fintech	Digital lending & credit decisioning	Functional	3	Running online lending journeys.	Keeps approval quality and turnaround on target.	Scenario test + manager rating	2
SK-FTC-03	Fintech	Fintech	Credit & risk modelling	Technical	2	Building models that estimate risk.	Builds validated models used in decisions.	Practical task or timed test	1
SK-FTC-04	Fintech	Fintech	Fraud operations & chargebacks	Functional	3	Stopping fraud and handling chargebacks.	Keeps fraud loss and chargeback rates low.	Scenario test + manager rating	2
SK-FTC-05	Fintech	Fintech	Merchant onboarding & partnerships	Functional	2	Signing and activating merchants and partners.	Onboards merchants on time and compliant.	Scenario test + manager rating	1

SK-FTC-06	Fintech	Fintech	RBI & fintech regulation compliance	Compliance	3	Meeting regulator rules for fintech.	Tracks circulars and keeps controls current.	Knowledge test (pass mark 80%) + scenario check	2
SK-FTC-07	Fintech	Fintech	Digital KYC & onboarding	Functional	3	Verifying customers online.	Completes digital KYC with low drop-off and no gaps.	Scenario test + manager rating	3
SK-FTC-08	Fintech	Fintech	Product analytics	Technical	2	Using data to improve products.	Defines metrics and finds insights that drive changes.	Practical task or timed test	1
SK-HSP-01	Hospitality & Travel	Hospitality & Travel	Front office & reservations	Functional	2	Checking guests in and managing bookings.	Handles check-in smoothly with accurate records.	Scenario test + manager rating	1
SK-HSP-02	Hospitality & Travel	Hospitality & Travel	Guest relations & experience	Behavioural	3	Making guests feel valued.	Resolves issues and earns high ratings.	Situational judgement test + 360 feedback	3
SK-HSP-03	Hospitality & Travel	Hospitality & Travel	Food & beverage service	Functional	3	Serving food and drink to standard.	Serves to standard with hygiene and speed.	Scenario test + manager rating	1
SK-HSP-04	Hospitality & Travel	Hospitality & Travel	Housekeeping & room standards	Functional	3	Keeping rooms clean and ready.	Meets cleanliness and turnaround standards.	Scenario test + manager rating	1
SK-HSP-05	Hospitality & Travel	Hospitality & Travel	Travel planning & booking	Functional	2	Planning trips and handling bookings.	Builds accurate itineraries and bookings.	Scenario test + manager rating	1
SK-HSP-06	Hospitality & Travel	Hospitality & Travel	Revenue & yield management	Functional	2	Pricing rooms and seats for best return.	Improves occupancy and rate together.	Scenario test + manager rating	1
SK-TEL-01	Telecom	Telecom	Network operations & monitoring	Technical	3	Watching and fixing the network.	Detects and clears faults within target time.	Practical task or timed test	1
SK-TEL-02	Telecom	Telecom	Field installation & maintenance	Technical	3	Installing and repairing in the field.	Completes jobs right first time and safely.	Practical task or timed test	1
SK-TEL-03	Telecom	Telecom	Telecom customer care & plan advice	Functional	2	Helping customers with plans and issues.	Resolves queries and recommends suitable plans.	Scenario test + manager rating	1
SK-TEL-04	Telecom	Telecom	Enterprise telecom solutions sales	Functional	2	Selling connectivity solutions to businesses.	Builds proposals that win and renew.	Scenario test + manager rating	1
SK-TEL-05	Telecom	Telecom	Revenue assurance	Functional	2	Stopping revenue leakage.	Finds and fixes billing leakage.	Scenario test + manager rating	1
SK-RES-01	Real Estate & Facilities	Real Estate & Facilities	Property consultation & sales	Functional	2	Advising buyers and closing sales.	Matches buyers to properties and closes.	Scenario test + manager rating	1
SK-RES-02	Real Estate & Facilities	Real Estate & Facilities	Facility operations & maintenance	Functional	3	Keeping buildings safe and working.	Meets uptime and safety targets.	Scenario test + manager rating	2

SK-RES-03	Real Estate & Facilities	Real Estate & Facilities	Site & project coordination	Functional	2	Coordinating work on site.	Keeps site work on schedule and safe.	Scenario test + manager rating	1
SK-RES-04	Real Estate & Facilities	Real Estate & Facilities	Lease & property management	Functional	2	Managing leases, tenants and rent.	Keeps occupancy and collections on target.	Scenario test + manager rating	1
SK-PRO-01	Professional Services & Staffing	Professional Services	Problem structuring & consulting	Functional	2	Breaking client problems into clear parts.	Structures problems and recommends clearly.	Scenario test + manager rating	2
SK-PRO-02	Professional Services & Staffing	Professional Services	Client delivery & engagement management	Functional	3	Delivering client work to scope and quality.	Delivers engagements on time with happy clients.	Scenario test + manager rating	1
SK-PRO-03	Professional Services & Staffing	Professional Services	Recruitment delivery (staffing)	Functional	2	Filling client roles with the right people.	Meets submission, interview and closure ratios.	Scenario test + manager rating	2
SK-PRO-04	Professional Services & Staffing	Professional Services	Proposal & bid writing	Functional	2	Writing winning proposals.	Writes proposals that meet criteria and win.	Scenario test + manager rating	1
SK-PRO-05	Professional Services & Staffing	Professional Services	Audit & assurance fieldwork	Functional	2	Testing records and controls for assurance.	Completes fieldwork to standard with clear evidence.	Scenario test + manager rating	1
SK-PRO-06	Professional Services & Staffing	Professional Services	Business development & pre-sales	Functional	2	Finding clients and shaping solutions.	Builds pipeline and supports solution design.	Scenario test + manager rating	1

Criticality: 1 nice to have, 2 important, 3 business-critical or legally required. Domain-specific skills (for example KYC, nursing, catalogue) carry the industry in Applies to; cross-industry skills say All industries. Each skill needs a test blueprint (sheet 09) and, before launch, at least 40 approved questions.

Role Library

187 roles across 15 industry groups. Each role has 10 to 16 required skills (sheet 07).

Industry groups covered

Code	Industry group	Roles
ALL	Cross-industry functions	31
ITS	IT / Software	21

R-ALL-005	Learning & Development Manager	R-EDU-011	Instructional Designer	Lateral (move across)
R-FTC-006	Fintech Product Manager	R-ITS-012	Product Manager	Lateral (move across)
R-ITS-012	Product Manager	R-FTC-006	Fintech Product Manager	Lateral (move across)
R-ALL-014	Marketing Manager	R-FMC-008	Brand Manager (FMCG)	Lateral (move across)
R-FMC-008	Brand Manager (FMCG)	R-ALL-014	Marketing Manager	Lateral (move across)

Lateral moves are stored in both directions. Readiness for each move is calculated from the Role-Skill Map and the person's tested skills (sheet 04, section G).

Skill Tests, Proctoring and Certification

How skills are tested, how mandatory training is protected, and how certificates are issued.

A. Skill test blueprint by skill type (every skill has one)

Skill type	Item mix	Length	Marking and review	Extra evidence
Technical	40% scenario or multiple choice; 30% practical task or work sample; 30% short written explanation	15 to 20 items; 20 to 30 minutes	Practical work is reviewed by an expert for level 4 and above	Practical upload or live task
Functional	50% scenario multiple choice; 30% case question; 20% short written	15 items; 15 to 20 minutes	Written answers AI-scored with rubric; expert samples 10%	Case exercise
Behavioural	70% situational judgement; 30% short written or voice answer	12 to 15 items; 15 minutes	Best with a manager or 360 rating added	Situational judgement
Leadership	70% situational judgement; 30% case	12 to 15 items; 20 minutes	Manager and peer ratings count as evidence	Case plus 360
Compliance	Knowledge questions plus scenarios	20 items; 20 minutes; pass mark 80%	Proctoring level set per programme (section E)	Certification course

B. Question banks and test rules

Topic	Rule	Note
Bank size	At least 40 approved questions per skill before launch: 10 for each of the bands awareness, working, proficient and advanced. Level 5 is judged by work sample.	Blocks adding the skill to a campaign until met
Who writes them	AI drafts from the skill definition and the level-3 description; an expert approves each question; the question shows its source.	AI never approves
Per attempt	15 to 20 questions chosen at random across bands; random order; no more than 20% overlap between attempts.	
One question per screen	Progress bar; pause between skills; answers saved as you go; time limit shown clearly.	Simple for every user
Languages	English and Hindi at launch; expert review of every translated question.	
Retakes	One retake after 7 days; best score counts; at most 3 attempts a quarter (settings).	
Question quality	After use, flag questions almost everyone gets right or wrong, and questions that top scorers get wrong; send to review.	V2
Adaptive tests	Start at the working band and move up or down based on answers; shorter tests with the same accuracy.	V2
Accessibility	Extra time and screen-reader support on request, logged; in-person option.	

C. Score to level

The score table (0 to 100 to level 0 to 5) is a setting in sheet 04, section A.

D. Proctoring levels (chosen per test; default shown)

Level	Used for	What is switched on	Human review	Learner experience
Basic	Skill tests and course quizzes (default)	Time limit; random questions and order; copy and paste blocked; tab-switch counter (flag after 3); one active session per person; no camera.	Flags go to the learner's manager only if repeated	Light touch; no camera
Standard	Mandatory certification (POSH, DPDP, safety) (default for those)	Everything in Basic plus camera snapshots about every 45 seconds, face present and extra-face detection, device and camera check before the test.	A proctor reviewer decides on every flagged attempt	Clear notice; consent; in-person alternative

Strict	Regulated or high-stakes tests (for example KYC and AML in BFSI, clinical competencies)	Everything in Standard plus continuous video recording, desktop screen share, mandatory ID check, optional live proctor.	A proctor reviewer decides; learner can appeal	Needs explicit consent and an in-person alternative

E. Integrity signals (create flags; never fail a person automatically)

Signal	How it is detected	Severity	What the reviewer sees
Tab or window switch	Browser visibility events	Low to medium	Time, count, duration
Copy and paste	Clipboard events in the test	Medium	Time, question
Extra face	Face detection on snapshots	High	Snapshot with time
No face	Face detection on snapshots	Medium	Snapshot with time; length of absence
Device or browser change	Session fingerprint	High	Old and new device
Long idle then fast answers	Answer-time analysis	Low	Time per question
Unusual similarity between people	Answer pattern comparison	Medium	Pairs and questions (V2)

F. Privacy rules for proctoring (must follow; see sheet 21)

Rule	Detail	Note
Notice and consent	Show what is captured, why, who sees it and for how long, before the test starts. Record consent.	
Alternative	Anyone who cannot or does not want to use the camera gets an in-person invigilated test and is not penalised.	
Only what is needed	Capture presence and number of faces only. No emotion or behaviour scoring.	
Retention	Delete images and video after 30 days (setting). Keep evidence for an open case until it is closed.	Scheduled job with deletion log
Access	Only proctor reviewers and HR for that case; every view is logged.	
Appeal	The learner can appeal; a different reviewer decides.	

G. Mandatory training starter list (all editable)

Programme	Who	When	Pass mark	Proctoring	Valid for
POSH awareness	All employees	Within 30 days of joining and every year	80%	Standard	12 months
POSH: Internal Committee orientation	ICC members	On appointment and every year	80%	Standard	12 months
Data privacy (DPDP)	All employees; deeper track for people who handle personal data	At joining and every year	80%	Standard	12 months
Information security	All employees	At joining and every year	80%	Basic	12 months
Code of conduct and ethics	All employees	At joining and every year	80%	Basic	12 months
Workplace safety	By site: office, store, warehouse, hospital, plant	At joining and every year	80%	Standard	12 months
KYC and AML	BFSI and fintech roles	At joining and every year	80%	Strict (if the regulator audit needs it)	12 months
Infection prevention and control	Healthcare roles	At joining and every year	80%	Standard	12 months
Food safety	FMCG and food service roles	As site rules require	80%	Standard	12 months

H. Certificates

Topic	Rule	Note

When issued	Course complete, test passed (80% for compliance) and proctor clear where proctored.	Automatic
Contents	Name, employee ID, course, date, validity and expiry, certificate ID, issuer, QR code.	
Formats	A PDF certificate and a signed digital credential in Open Badges 3.0 format [R5], so it can be verified and shared.	
Verification page	Opening the QR code shows name, course, date, validity and status (valid, expired, revoked) without login.	Shows minimum personal data
Renewal	Reminders at 60, 30 and 7 days before expiry; renewal course assigned automatically.	
Revocation	An admin can revoke with a reason; the credential and the page show revoked.	Logged

AI Course Studio, Video and AR / Simulation

How courses are generated, how they become simulations, and what works on which phone.

A. Course pipeline (workflow W-05)

Step	What happens	Human gate	Target time (hypothesis)
1. Source	Upload or link an SOP, deck, PDF, web page or recording; or type a topic. Remove personal data.	Uploader confirms the source may be used	Under 1 minute
2. Outline	Split into topics; link to a skill and level; write learning objectives.	Expert reviews the outline	Under 2 minutes
3. Lessons	Write lessons, examples and practice. Attach the source passage to every fact.	None here	Under 8 minutes for 20 pages
4. Quiz	Create questions with answers and reasons, tagged by objective and difficulty.	Expert approves	Under 2 minutes
5. Simulation (optional)	Draft the scenario file from the process steps (section C).	Expert runs it once	Under 5 minutes
6. Approve	Expert checks facts, tone and local context. Nothing is published without this.	Required	Human
7. Checks	Citations present, reading level, captions, contrast, banned claims.	Fix list if any fail	Automatic
8. Publish	L&D sets owner, review date; for certification sets pass mark, proctoring level, template and validity.	Required	Human

B. Course types

Type	What it is	Use for
Self-paced	Lessons and a quiz; reminders only (no invitations)	Most courses
Microlearning	5 minutes or less; one idea; one question	Refreshers and nudges
Live or cohort	Scheduled sessions; invitations (sheet 12)	Workshops, programmes
Certification	Pass mark, proctoring level, certificate and validity	Mandatory and regulated training
Simulation	Practice a task in an interactive or AR scenario with scoring	Hands-on skills

C. AR and interactive simulation

One scenario file describes a task: the steps, the objects, the right actions, the common mistakes and the scoring. The player runs it in the best mode the phone supports. Do not promise AR on every phone: browser AR works on many Android phones but not on iPhones, so every simulation must also run as a normal interactive screen [R4].

Mode	What the learner does	Where it works	Phase	Note
A. Interactive (all devices)	Photos or 360-degree views with tappable hotspots, drag-and-order steps, branching and scoring.	Every phone, tablet and computer	MVP	Default and fallback
B. 3D object and place-in-room AR	View and place a 3D object (equipment, shelf, device) in the room; guided questions around it.	Android Chrome with ARCore (browser AR); iPhone and iPad through AR Quick Look (object placement only, no custom scoring inside AR); computers show a 3D viewer	V2	Uses a 3D viewer component and USDZ files for iPhone [R4, R5]
C. Guided AR tasks	Step-by-step tasks anchored to the real space with scoring.	Android Chrome (WebXR); iPhone needs a native app	V3	Only if a native app is built

Scenario file (the one format behind all modes)

Field	Meaning	Example

scenario_id, title, language	Identity and language	SIM-0012, Hand hygiene and PPE, en
skill_ids, target_level	Skills it builds and the level it proves	SK-HLT-03, level 3
objective, duration_minutes	What the learner can do after; length	Put on PPE in the right order; 6 minutes
environment	Photo, 360, 3D or AR surface, with the asset reference	photo: ward_entrance.jpg
objects[]	Items in the scene with name, asset and hotspot position	gloves, mask, gown, sanitiser
steps[]	Each step: instruction, expected action (tap, select, place, order, answer), correct feedback, wrong feedback, points, critical (yes or no), hint	Step 2: tap the sanitiser; critical
branches[]	If this answer, go to that step	If wrong at step 4, go to remedial step 4a
mistakes[]	Known wrong patterns and the feedback to show	Gloves before sanitiser: explain why order matters
scoring	Pass mark; whether order matters; time limit; critical steps that must be right	80%; order matters; 5 minutes; steps 2 and 5 critical
review	Approved by, date, version	Expert name, 12 Oct 2026, v1

How a simulation is generated

Step	What happens	Who
1	Read the approved SOP or process steps.	AI
2	Draft the scenario file: steps, correct actions, common mistakes, scoring.	AI
3	Pick or generate scene assets: photos, illustrations or 3D objects from the approved library; never use real patient or customer data.	AI plus library
4	Expert edits in a simple editor (a list of steps), runs it once, approves.	Expert
5	Publish; the result of each run is recorded as skill evidence.	System

Starter simulation templates by industry

Industry	Template	Modes
Retail	Billing and returns at the till; shelf set-up to a plan	Mode A, then B for fixtures
Healthcare	Hand hygiene and PPE order; sample collection steps	Mode A; B for equipment
BFSI	KYC document check; branch cash counting	Mode A
FMCG	Shelf compliance audit	Mode A; B for display units
ITES and BPO	Call and chat handling role-play (voice or chat simulation, not AR)	Conversation simulation
IT	Incident response drill; server-room walk-through	Mode A; B for rack
Hospitality	Table set-up and guest greeting	Mode A
Logistics	Warehouse picking and safe lifting	Mode A; B for racks
Telecom	Field installation checklist	Mode A; B for outdoor unit
All industries	Evacuation and fire extinguisher use	Mode A

D. Video from a lesson (workflow W-06)

Mode	How it works	Cost and risk
Narrated slides (default, MVP)	Slides from the lesson with a synthetic voice and captions in English and Hindi.	Lowest cost; no real person's face or voice

Avatar presenter (V2)	Virtual presenter from an approved avatar; needs a consent record.	Higher cost; consent and label required
Session recording (MVP)	Webinar recording becomes a lesson with transcript, chapters and quiz.	Little synthetic media

E. Rules for AI media (India)

Rule	What to do	Basis
Label it	Realistic AI-generated audio, picture or video must carry a clear label; embed provenance data where possible [R1]. Label every synthetic video by default.	IT Amendment Rules 2026, in force from 20 Feb 2026; confirm with counsel
Text is outside that rule	AI-written text is not covered by the labelling rule [R1], but it still follows the approval and citation rules here.	
Consent	Never create an avatar or voice of a real person without written consent; store the consent and its scope.	Product rule
Record	For every AI job keep input, provider, version, cost, reviewer and approval time.	Audit
Cost caps	Monthly cap per company; warning at 80%; stop at 100% unless an admin raises it.	Setting

Gamification and Real-Time Leaderboards

Make learning fun and visible without pressure or unfairness. Points, levels, badges, challenges and live boards.

A. Principles

Principle	What it means
Reward real learning	Points only for verified learning: lesson watched to the required point, test passed, session attended. No points for clicking.
Positive only	No negative points. No public shaming. Compliance boards show departments, not individuals.
Fair	Boards by role family and a Most improved board, so newcomers and non-technical roles can win.
Choice	People can hide their name on boards. Admins can switch gamification off per course or team.
Simple	Three things on screen: your level, your streak and one challenge.

B. Points (all values are settings)

Event	Points	Rule	Cap
Complete a lesson	10	Only when the completion rule is met (for example 90% watched)	Daily cap applies
Complete a course	50, plus 20% if before the due date		
Pass a course test	30, plus 10 for first attempt		
Complete a skill test	40	Once per skill per quarter	
Gain a skill level	100 per level	After re-test	No daily cap
Earn a certificate	200		No daily cap
Attend a live session	20	Credited attendance only	
Pass a simulation	40, plus 20 for a perfect run		
Finish a pathway wave	150		No daily cap
Verified knowledge article	40	When the owner verifies it	
Helpful expert answer	10	Marked helpful by the asker	
Daily streak	5 a day after 3 days in a row		

Daily cap: 200 points a day except level gains, certificates and pathway waves. The same item never earns points twice.

C. Levels (cumulative points; settings)

Level name	Points needed
Starter	0
Explorer	500
Practitioner	1,500
Specialist	4,000

Mentor	8,000

D. Badges (28 at launch; rules are editable)

Badge	Rule
First Step	First lesson completed
On a Roll	3-day streak
Week Warrior	7-day streak
Month Master	30-day streak
Test Ready	First skill test completed
Level Up	First skill level gained
Double Up	Two levels gained in a quarter
Skill Champion	Top 3 in a skill in your team
Certified	First certificate
Compliance Hero	All mandatory training on time
Early Bird	Finish 5 items before the due date
Simulation Ace	Perfect simulation run
Pathway Complete	Finish a whole pathway
Wave Rider	Finish a pathway wave
Team Player	Help your team finish a team challenge
Comeback	Return after 14 days away and finish an item
Perfect Score	100% on a test
Quiz Streak	Pass 5 tests in a row
Feedback Giver	Rate 10 courses
Career Explorer	Open the career map and add a role to your pathway
Mentor Hand	Complete 3 coaching sessions as the expert
Knowledge Sharer	First verified knowledge article
Helpful Expert	10 helpful answers
Safety First	Safety certificate
Data Guardian	Data privacy certificate
Respect at Work	POSH certificate
Speaker	Lead a live session
All-Rounder	Level 3 or above in every skill of your role

E. Challenges

Challenge	Rule	Reward
Team week	The team finishes 80% of assigned items this week	Badge and team points; opt-in for individuals
30-day streak	Learn on 30 days in 40	Badge

Department race	Departments compete on on-time completion of mandatory training	Shown at department level only
Quarter skill	Raise one skill by one level this quarter	100 points per level plus badge

F. Leaderboards (live)

Board	Metric	Scope	Window	Visibility
Skill Champions	Highest test score in a skill (at least 5 people tested)	By skill; team, department, company	Quarter, all time	Names follow the privacy setting
Learning Hours	Verified learning minutes divided by 60	Person, team	Week, month, quarter	Names follow the privacy setting
Pathway Progress	Percent of pathway steps complete	Person; team average	Current	Person sees own; team average public
Compliance On Time	Mandatory items finished by due date divided by assigned	Department, site only	Current cycle	No individual names
Skill Level-ups	Number of levels gained	Person, team	Quarter	Names follow the privacy setting
Certifications	Certificates earned	Person, team	Year	Names follow the privacy setting
Most Improved	Score gain between the last two tests on a skill	Person	Quarter	Names follow the privacy setting
Knowledge Contributors	Verified articles plus helpful answers	Person, team	Quarter	Names follow the privacy setting
Streaks	Current day streak	Person	Current	Names follow the privacy setting
Session Attendance	Credited sessions divided by invited	Team, department	Quarter	No individual names

G. Real-time behaviour

Topic	Rule	Test
Speed	A board changes within 5 seconds of the event, without a page refresh.	Test: complete a lesson and watch the board
How	Learning events go to a stream; counters and sorted lists are updated; the app receives pushes over a live connection; falls back to refresh every 30 seconds.	
Correctness	Events carry unique IDs so a repeat does nothing; a nightly job recalculates and corrects any drift; daily snapshots keep history.	
Ties	Equal values share a rank; the person who reached it first is shown first.	
Windows and time zone	Today, week, month, quarter and all time, in the company's time zone.	

H. Admin live dashboard (critical L&D metrics)

Tile	Definition	Drill-down
Active learners today	People with any learning activity today	Drill to list

Completion this week	Completed divided by assigned for items due this week	By course and team
On-time compliance	Mandatory items on time divided by assigned	By department and site
Overdue items	Items past due, with age	Drill to people
Tests completed	Skill tests finished versus invited	By campaign
Average level gain	Average levels gained per person this quarter	By skill
Pathways on track	Pathways with no step overdue	By team
Certificates	Issued this month and expiring in 60 days	Drill to list
Sessions	This week's sessions and attendance	By session
Top skill gaps	Skills with the biggest total gap	Link to availability
Content backlog	Skill and level bands with no content, by people who need them	Link to AI studio

I. Anti-gaming and privacy

Topic	Rule
Duplicate and repeat events	Ignored.
Speed-running	Lessons need minimum watch time; tests need minimum time per question.
Point spikes	A weekly report flags unusual spikes for the admin to review.
Name display	Setting: full name, first name and initial, or anonymous; each person can opt out of public display and still count in team totals.
Data	Leaderboard history is kept for the retention period set in settings.

Invitations and Reminders

Invitations are only for scheduled sessions. Self-paced learning gets completion reminders only, at a convenient time.

A. Which message when

Situation	Send	Do not send
Scheduled session (live, cohort, in person)	Invitation with Accept and Decline and a calendar file; then reminders to those who accepted only	No completion reminders (there is no "complete" until attendance)
Self-paced course or pathway step	Completion reminders only, inside the person's convenient window	No invitation and no calendar file
Skill test campaign	Invitation on the start date, then completion reminders until done	No reminders after completion
Mandatory training	Assignment notice, then completion reminders; escalation to manager after the due date	Same rules as self-paced
Certificate expiring	Reminders at 60, 30 and 7 days	

B. Invitation for a scheduled session

Topic	Rule	Note
Content	Title, date, time and time zone, length, trainer, link or venue, what to prepare, Accept and Decline buttons, calendar file.	
Channels	Email and in-app; WhatsApp only where the person opted in.	
Replies	Accept and Decline recorded; the trainer sees the list live; a waiting list offers seats when someone declines.	
Reminders	Only people who accepted: 7 days, 1 day and 1 hour before. Declined people get nothing more.	
Changes	Reschedule or cancel updates every invitation and calendar within 5 minutes.	
After	Thank you and feedback survey; attendance credit; recording link.	

C. Completion reminders at a convenient time

Step	Rule	Note
1. Who gets one today	People with an unfinished self-paced item, excluding people on leave, on a non-working day, in quiet hours, or who have already had a nudge today.	
2. Convenient window	Use the person's saved preference. If none, use the 2-hour window in which they most often open the app on working days (last 30 days). If no history, 11:00 to 13:00.	Learn quietly; show the window in settings so they can change it

3. Quiet hours	No messages before 09:00 or after 19:00, on weekends or on company holidays, or during a person's shift break, unless the person chooses otherwise (settings).	
4. Limits	At most one nudge a day and three a week per person; at most two a day for the same manager's team digest.	Settings
5. Message	Short, friendly, one action. Include the item name, how long it takes to finish, and a direct link. Choose by status: not started, in progress, due soon, overdue.	See templates
6. Snooze	"Remind me tomorrow" moves the next nudge by one day (at most 3 snoozes).	
7. Stop	Stop immediately when the item is complete or the assignment is removed.	Test required
8. After the due date	Send a final notice to the learner and a summary list to the manager; compliance items overdue by 14 days go to the department head.	
9. Manual	An admin or manager can send a reminder to chosen people with Run now; a preview shows who gets what; it still respects quiet hours unless overridden with a reason.	

D. Channels

Channel	Rule	Note
In-app	Always on; shows on the home screen.	
Email	Default for invitations and digests.	
WhatsApp	Only with the person's opt-in and an approved message template; business-initiated messages use templates.	Check the provider's rules
SMS	Optional, for people without email or WhatsApp.	V2

E. Message templates (English; also in Hindi)

Template	Text	Note
Invitation	Hi {first_name}, you are invited to "{session}" on {date} at {time}. Can you join? [Accept] [Decline]	
Session reminder (1 day)	Reminder: "{session}" is tomorrow at {time}. Join link: {link}	Only to those who accepted
Not started	Hi {first_name}, "{course}" takes about {minutes} minutes. A good time to start? [Start now] [Remind me tomorrow]	
In progress	You are {percent}% through "{course}". About {minutes_left} minutes left. [Continue]	

Due soon	"{course}" is due on {due_date}. You can finish it in {minutes_left} minutes. [Continue]	
Overdue (learner)	"{course}" was due on {due_date}. Please finish it today. Need help? [Ask my manager]	
Overdue (manager digest)	{count} people in your team have items overdue: {list}. [See details]	Once a week
Session cancelled	"{session}" on {date} is cancelled. We will share a new date soon.	

F. Settings and measures

Item	Detail	Note
Settings	Quiet hours; daily and weekly limits; default window; channels; snooze limit; escalation days; templates; languages.	
Measures	Delivered, opened, started within 24 hours of a nudge, completion rate with and without nudges, opt-outs.	Shown in the reminder log report

Reports

32 standard reports. All can be filtered, exported to Excel, CSV and PDF, and scheduled.

#	Report	Who uses it	Key fields	Filters
1	Employee-role mapping	L&D admin	Employee, role, manager, location, mapped yes or no; unmapped list	Team, location, role
2	Skill test campaign status	L&D admin	Campaign, people invited, started, completed, not started, average score	Campaign, team, date
3	Test results by skill	L&D admin, leaders	Skill, people tested, average score, level distribution (0 to 5)	Skill, role, team, date
4	Skill stack rank	Manager, L&D admin	Skill, employee, score, level, rank, out of, percentile	Skill, team, role, location
5	Employee skill profile	Manager, employee	Role, every required skill, level, required level, gap, last tested	Employee
6	Gap report	Manager, L&D admin	Person or team, skill, gap, priority score, status	Team, skill, status
7	Skills availability and risk	Leaders	Skill, demand, qualified, experts, near-ready, coverage, risk flag, suggested route	Skill, department, risk
8	Single points of failure	Leaders, HR	Skill, expert count, names of experts, successors who are near-ready	Department
9	Pathway progress	Manager, L&D admin	Person, pathway, wave, step, percent complete, due date, status	Team, status
10	Overdue and at-risk learners	Manager, L&D admin	Person, item, due date, days overdue, last active, reminders sent	Team, item, days
11	Course completion	L&D admin	Course, assigned, started, completed, average time, pass rate	Course, team, date
12	Course feedback and ratings	Course owner	Course, rating, comments, version	Course, date
13	Learning hours	L&D admin, leaders	Person or team, verified learning hours, by month	Team, date
14	Mandatory training compliance	HR, auditors	Programme, department or site, assigned, completed on time, overdue, expired	Programme, site, date
15	Certificates	HR	Certificate ID, person, course, issued, expires, status (valid, expiring, expired, revoked)	Course, status, date
16	Proctoring flags and outcomes	Proctor reviewer, HR	Attempt, flags, severity, reviewer, decision, appeal outcome	Programme, date, decision
17	POSH audit pack	HR, ICC	Awareness programmes held, dates, attendees, completion, ICC orientation records	Year, site
18	Sessions: schedule, RSVP and attendance	L&D admin, trainer	Session, invited, accepted, declined, attended, credited, feedback	Session, trainer, date
19	Reminder and notification log	L&D admin	Person, message type, channel, sent, opened, acted on, stopped	Date, type, channel
20	Leaderboard snapshot and badges	L&D admin, managers	Board, rank, name (per privacy), value; badges earned	Board, window, team
21	Points ledger and anomalies	L&D admin	Person, event, points, cap applied, spikes flagged	Date, person
22	Career readiness and mobility	HR, managers	Person, next role, type, readiness, skills to close, weeks, interest expressed	Role, readiness
23	Content backlog and AI usage	L&D admin	Skill and level band, people who need it; AI jobs, cost, approvals	Skill, date
24	Question and course quality	Content owners	Question, difficulty, discrimination, flags; course drop-off points	Skill, course
25	Knowledge Hub freshness and ownership	Knowledge admin	Space, items, verified, due for review, overdue, no owner	Space, owner
26	Knowledge search success and gaps	Knowledge admin	Searches, answered, not answered, top missed questions	Date, space
27	Audit log	Admin, auditors	Who, what, when, old and new value, reason	User, action, date
28	L&D impact summary	Leaders	Levels gained against hours; certification rates; link to business measures	Quarter, team
29	Knowledge: versions and revisions	Knowledge admin, owners	Item, version, revision date, who, change note, approver; items revised in the last 30 days	Function, kind, date

30	Knowledge: review log and reminders	Function heads, knowledge admin	Item, owner, reviews done, outcome, reminders sent, snoozes, days overdue	Function, owner, status
31	Knowledge: ownership and access	Function heads, auditors	Items without owner or backup; who can see Restricted and Confidential items; access requests and decisions	Function, classification
32	Knowledge health by function	Leaders, function heads	Health score and trend; current %; overdue; due soon; owner coverage; critical items current; search success	Function, month

Rules for every report

Access: managers see their own team; admins see all; auditors read only. Row-level rules are enforced on the server.

Export: Excel, CSV and PDF. Large exports run in the background and email a link. The first sheet states who exported, when, the filters and a data dictionary.

Personal data: exports with personal data are watermarked and logged.

Schedule: daily, weekly or monthly to chosen people, using the saved filters.

Drill-down: any number can be clicked to see the people or items behind it.

Knowledge Hub (a completely separate module)

Store, find, review and control company knowledge: SOPs, policies, files, links and data lists. Requirements are in sheet 14a; types and categories in 14b; demo and dashboard maths in 14c and 14d.

A. What it is, and how it stays separate

Topic	What it means	Note
Own space	Its own address (for example /knowledge), menu, permissions and settings. A company can use it without the learning system.	
Shared basics	It uses the same login and people directory as the learning system.	
Optional links	If both are used, an item can be tagged to skills, an item can become a course, and a course can show its related items.	V2
Four verbs	Find (one search box, one Library view). Add (three big buttons). Keep fresh (owner, review date, versions, reminders). Control access (owners decide).	
Menu	Home, Library, My items, Dashboard (leaders and function heads), Admin (knowledge admins).	Five tabs

B. The Library: all knowledge in one view

Element	What it does	Note
Where	The Library tab. One screen shows every item the person is allowed to see.	K-07
Two ways to group	By Kind (SOP, policy, template and so on) or by Category (function, then topic). One switch toggles them; filters stay.	Same list, two views
Filters	Kind, Format, Category, Owner, Status, Classification, Critical, and Mine. A count sits beside every choice.	Counts update as filters change
Each row shows	Name, Kind, Category, Owner, Version, Status chip (Verified, Due soon, Overdue, Draft, In review), Next review date.	Phone: name, status and owner
Saved views	Ready-made: My items, Overdue, Due in 30 days, Critical, Needs approval, No owner. People can save their own.	
Bulk actions	Select many: remind owners, change owner, set review date, change category, export. A preview first; Undo for 10 minutes.	KNW-11
Click through	Click a row to open the item; click a count on a dashboard to open the Library with that filter on.	Same screen everywhere

C. Versions, revisions and reviews (three different things)

Term	Meaning	Where it is recorded
Revision	Every saved change, in a draft or a published item: who, when, what changed, why. Revisions are automatic.	Recorded for every save
Version	A published state of an item, numbered major.minor (for example 3.2). A new version is made when a change is published.	Needs a one-line change note
Review	The owner confirms that the item is still correct (Still correct), updates it, or retires it. A review does not change the content or the version number.	Recorded in the review log

Approval	Sign-off before a major version goes live. Minor edits can publish with owner confirmation (setting).	Recorded with name and time

Rule	Detail
Numbering	Minor change (typo, small fix): 3.1 to 3.2. Major change (content or rule changes): 3.2 to 4.0. The owner picks; the AI suggests from the size of the change.
Published stays live	While someone edits a new draft, readers keep seeing the last published version, marked Update in progress.
Compare and restore	Pick any two versions to see changes highlighted. Restoring an old version creates a new version; history is never overwritten.
History is kept	All versions and review logs are kept for the retention period; only a knowledge admin can delete history, and it is logged.
Reviews reset the clock	Verifying sets the next review date by the item's review cycle.

D. Status of an item

Status	What it means	Next step
Draft	Being written; only author and invited reviewers see it.	Submit for review
In review	Waiting for an approver. Reminder to the approver after 2 days.	Approve or send back
Verified	Published and within its review cycle. Shows the verified date.	Owner re-verifies by the date
Due soon	The review date is within 14 days.	Owner gets reminders
Overdue	The review date has passed. Warning label; weekly reminders; escalation at 14 and 30 days; left out of AI answers after 30 days.	Owner verifies or hands over
No review needed	Items such as reports and meeting notes, which are dated records. They are archived after a set time instead of reviewed.	Archive rule
Archived	Retired but kept for the retention period; not shown in search or AI answers unless asked.	Admin can restore

E. Reminders and escalation (workflow W-21)

When	Who is told and what happens	Channel
30 days before review	Owner: a friendly note listing the item.	Email and in-app
14 days before	Owner and backup owner: second note; item shows Due soon.	Email, in-app
7 days before	Owner: third note.	Email, in-app, WhatsApp if opted in
Due date	Owner: today is the review date.	Email, in-app, WhatsApp if opted in
Every week while overdue	Owner and backup owner: one weekly message listing all overdue items.	Email, in-app
14 days overdue	Function head: a list of the function's overdue items with owners.	Email, in-app digest
30 days overdue	Knowledge admin is told; the item is left out of AI answers and search results move it down.	Email, in-app
90 days overdue	Archive is suggested to the owner and the knowledge admin.	In-app
Waiting for approval	Approver: reminder after 2 days, then weekly.	Email, in-app

Draft untouched 14 days	Author: nudge to finish or delete.	In-app

Rule	Detail
One message per person	All items due for a person are combined into one message a day. Quiet hours and the person's preferred time follow the rules in sheet 12.
One-click actions	Every reminder offers Still correct, Update, Hand over and Snooze. Snooze is allowed twice for 7 days, with a reason.
Stop	Reminders stop the moment the item is verified, updated, handed over or archived.
Run now	A function head or knowledge admin can send reminders to chosen owners at any time, after a preview.

F. Ownership and access (authorised owners only)

Role	What they can do	Note
Owner	Accountable for one item. Edits, publishes, verifies, hands over, sets who can see it, approves access requests.	One owner per item; must belong to the function
Backup owner	Receives reminders and can verify when the owner is away. Required for Critical items.	Taken over automatically if the owner leaves
Space owner / function head	Owns a function's space; sets defaults; confirms new owners; sees the function dashboard.	
Editor	Edits drafts; cannot publish or change access.	Per item or space
Commenter, Viewer	Comment or only read.	
Knowledge admin	Manages categories, review cycles, imports and escalations; can change access and ownership with a reason.	Every action logged
Auditor	Read-only access to logs and dashboards.	

Rule	Detail
Default deny	People see only what their space and classification allow. Everyone else sees nothing, not even the title.
Request access	One click. The owner decides within 2 days (reminder after that). Every decision is logged.
Only owners and admins change access	Editors and viewers cannot share an item more widely.
No orphans	When an owner leaves or changes role, items move to the backup owner and the function head confirms a new owner within 7 days. A monthly check lists any item without an owner or backup (workflow W-24).
Dashboards never leak	Dashboards show counts. Drilling down shows only items the viewer may open; hidden items appear as "restricted item".

G. Dashboards (overall, function and owner)

Dashboard	Who sees it	What it shows	Screen

Leader dashboard (overall)	Leaders, knowledge admin	Health score and trend; items by kind and function; current %; overdue; due in 30 days; no owner or backup; critical items current; access requests waiting; revisions in 30 days; function league table	K-11
Function dashboard	Function head, leaders	The same for one function, plus by category and by owner; actions to remind owners and assign backups	K-12
My items	Every owner	My overdue, due soon, waiting for me, drafts, with one-click actions	K-09
Admin view	Knowledge admin	Orphans, access requests, escalations, import tasks, search misses	K-05

Measure	Definition
Items	Published items by kind and by function (archived excluded)
Current %	(Verified + Due soon) divided by (Verified + Due soon + Overdue); items that need no review are left out
Owner coverage %	Published items with both an owner and a backup, divided by published items
Critical current %	Critical published items that are not overdue, divided by critical published items (100% if none)
Revised in 30 days	Items with a revision in the last 30 days, a sign that knowledge is being kept alive
Search success %	Searches where the person opened or accepted a result, divided by all searches (from the search log)
Knowledge health score	100 x (40% Current + 20% Owner coverage + 20% Critical current + 20% Search success). Weights are settings that must add to 100%
Targets (hypotheses)	Current 90% or more; no item without an owner; critical items 100% current; search success 70% or more

Knowledge Hub Requirements

44 requirements with tests. Build to these. Screens are listed in sheet 22.

ID	Requirement (what the system must do)	Acceptance criteria (how to test it)	Priority	Screen
KNW-01	Separate module with its own address, navigation and permissions; usable without the learning system; shares login and people directory.	Opening the module needs no learning-system setup; a user signs in with the same account.	MVP	K-01
KNW-02	Home: one search box with Ask, Find by type chips (SOP, Policy, Template, Checklist, Playbook, Files, Links, Lists), spaces, and a strip showing my items that need attention.	A new user finds a known SOP in under 10 seconds from home; the strip shows the right counts for that user.	MVP	K-01
KNW-03	Spaces for the company, each function and each team; each has owners and a default classification.	A space owner can add and remove members and change the default classification.	MVP	K-04
KNW-04	Add in three ways: Write (page with templates), Upload (files or folders) and Link (web or drive).	From home to a saved item takes 3 clicks or fewer.	MVP	K-02
KNW-05	Templates for SOP, policy, FAQ, checklist, playbook, meeting notes, contact list, form and register.	Each template opens with guidance text and the required fields.	MVP	K-02
KNW-06	AI help while adding: suggests title, summary, kind, category, tags, owner, review date and classification; one click to accept.	A pasted SOP gets all suggestions in under 10 seconds; nothing is saved until accepted.	MVP	K-02
KNW-07	Every item has one owner who belongs to the function, and a backup owner (required for Critical items). Publishing needs an owner and a review date.	An item without an owner or review date cannot be published; a Critical item without a backup cannot be published.	MVP	K-02
KNW-08	Every item has a Format (page, file, link, data list), a Kind (SOP, policy, playbook, FAQ, checklist, template, contract, register, training material, reference, report, meeting notes) and one Category (function and topic); tags are optional.	An item cannot be saved without Kind and Category; the lists come from sheet 14b.	MVP	K-07
KNW-09	Library: one screen listing everything the person may see, grouped by Kind or by Category, with filters (kind, format, category, owner, status, classification, critical, mine), counts beside each filter, search within the list, sorting and saved views.	Switching between By type and By category keeps the filters; counts match sheet 14d for the demo data.	MVP	K-07
KNW-10	Each Library row shows name, kind, category, owner, version, status chip, next review date and access; on a phone each row is a card.	Every column is visible on a laptop; on a 360-pixel phone each row shows name, status and owner.	MVP	K-07
KNW-11	Bulk actions on selected items: remind owners, change owner, set review date, change category, export the list. A preview shows what will happen; Undo for 10 minutes.	Selecting 20 items and changing the category shows a preview; Undo restores them.	MVP	K-07
KNW-12	Revisions and versions: every saved change is a revision (who, when, what, why); every publish is a numbered version (major.minor). Published items show the version.	Editing and saving twice creates two revisions; publishing creates the next version number.	MVP	K-08
KNW-13	A one-line change note (what changed and why) is required to publish a new version.	Publishing without a change note is blocked with a clear message.	MVP	K-08
KNW-14	Compare any two versions side by side with changes highlighted; restore any version (restoring creates a new version).	Restoring version 2 creates version 4 and keeps the history.	MVP	K-08
KNW-15	Approval: a major version needs the owner or an approver to approve; a minor edit can publish with owner confirmation (setting). The published version stays live while a new draft is edited.	While a draft exists, readers still see the last published version with an Update in progress tag.	MVP	K-08

KNW-16	Review log: every verification records reviewer, date, outcome (still correct, updated, retire) and a comment. Verifying does not create a new version.	Clicking Still correct adds a log line and resets the next review date; the version number does not change.	MVP	K-08
KNW-17	Review cycles by kind (defaults in sheet 14b), editable per kind and per item; the next review date shows everywhere.	Changing the cycle for FAQ from 6 to 3 months moves next review dates for FAQs on the next run.	MVP	K-03
KNW-18	Status chips: Draft, In review, Verified, Due soon (within 14 days), Overdue, Archived, plus an Update in progress tag.	An item moved past its review date shows Overdue the next day.	MVP	K-07
KNW-19	Reminders to owners: 30, 14 and 7 days before the review date, on the due date, then weekly while overdue. The backup owner is copied from 14 days before. Reminders are combined into one message per owner per day.	An owner with 5 due items gets one message listing 5 items, not 5 messages.	MVP	K-10
KNW-20	Escalation: 14 days overdue, the function head is told; 30 days overdue, the knowledge admin is told and the item is left out of AI answers; 90 days, an archive is suggested.	Moving an item to each date triggers exactly the listed action once.	MVP	K-10
KNW-21	One-click actions from a reminder: Still correct (verify), Update (start a new draft), Hand over (to backup or another person), Snooze (twice, 7 days, with a reason).	Each action works from the email, the app and WhatsApp (where opted in) and is logged.	MVP	K-09
KNW-22	My items: one worklist for owners showing Overdue, Due soon, Waiting for my approval and Drafts, with counts and the one-click actions.	The counts equal what the Library shows with the Mine and status filters.	MVP	K-09
KNW-23	Owner changes: when an owner leaves or changes role, their items move to the backup owner and the function head must confirm a new owner within 7 days. The system never leaves an item without an owner.	After an HR exit event, no published item has an empty owner.	MVP	K-05
KNW-24	Access is set by space and by item. Only owners and knowledge admins can change access. Roles: viewer, commenter, editor, owner, space owner, knowledge admin.	A viewer cannot change access even with the link; an owner can.	MVP	K-05
KNW-25	Request access in one click; the owner approves or declines; the approver is reminded after 2 days; every decision is logged.	A request not answered in 2 days produces one reminder; the log shows who decided and when.	MVP	K-05
KNW-26	Classification: Company-wide, Team, Restricted, Confidential, with a default per function. Views, edits and exports of Restricted and Confidential items are logged.	Opening a Confidential item adds a log line with user and time.	MVP	K-03
KNW-27	Search and AI answers respect permissions and use verified content only; answers show sources and the last-verified date, and say "I don't know" when there is no source.	A restricted item never appears in another team's results; an overdue item is never cited.	MVP	K-01
KNW-28	Files: PDF, Word, Excel, PowerPoint, images and video up to 100 MB; text extracted for search; virus scan on upload.	Searching a phrase inside an uploaded PDF finds it.	MVP	K-02
KNW-29	Data lists: simple tables (vendors, assets, contacts, licences) with columns, filters, saved views, import and export, and row history; no coding.	A non-technical user builds a vendor list from a spreadsheet in under 5 minutes.	MVP	K-06
KNW-30	Bulk import from folders or a spreadsheet; the importer is asked to assign an owner and category before items publish.	Importing 200 files creates drafts with the importer as temporary owner and a to-do to assign owners.	MVP	K-02
KNW-31	Export any item or space to PDF, Word or Excel; full space backup as a zip.	A space backup restores into a new space.	MVP	K-04
KNW-32	Leader dashboard (overall): knowledge health score and trend; items by kind and by function; current percent; overdue; due in 30 days; items without owner or backup; critical items current; access requests waiting; revisions in the last 30 days; function league table; each number drills down to a list.	For the demo data the numbers equal sheet 14d.	MVP	K-11

KNW-33	Function dashboard: the same measures for one function, plus by category and by owner, with actions: remind all overdue owners, assign a backup owner.	The HR dashboard equals the HR row of sheet 14d; Remind owners sends one message per owner.	MVP	K-12
KNW-34	Who sees dashboards: leaders see all functions; a function head sees only that function; owners see My items; auditors read only. Dashboards show counts and, to people without access, never the titles of restricted items.	A function head cannot open another function's dashboard; a Confidential title is hidden in drill-down from people without access.	MVP	K-11
KNW-35	Health score = weighted mix of current on time, owner and backup coverage, critical items current and search success; the weights are settings (default 40, 20, 20, 20).	Changing a weight changes the score on the next refresh; weights must add to 100%.	MVP	K-11
KNW-36	Scheduled digests: weekly to function heads and monthly to leaders with health, overdue and items without owner.	The digest arrives on schedule with the same numbers as the dashboard.	V2	K-11
KNW-37	Category management: admins add, rename, merge and move categories; items follow; the tree is two levels (function and topic).	Merging two topics moves all their items and keeps their history.	MVP	K-13
KNW-38	Critical flag: a Must know list, an offline or print copy, inclusion in every backup, review every 6 months.	A Critical item shows on the list, has an offline copy on mobile, and a 6-month review date.	MVP	K-03
KNW-39	Links to the learning system: tag skills, turn an article into a course, show related courses.	Clicking Turn into course creates a course request with the item as the source.	V2	K-03
KNW-40	Duplicate warning when adding an item whose title or content closely matches an existing one.	Adding a second Refund SOP shows the existing one and asks whether to continue.	V2	K-02
KNW-41	Audit trail for restricted items and for access, ownership and category changes: who, what, when, old and new value.	Changing an owner adds a line with the old and new owner and the reason.	MVP	K-05
KNW-42	Retention and deletion: archive or delete by classification; a deletion log; legal hold later.	A deleted item is gone from search and logged; a held item cannot be deleted (V2).	MVP (log); V2 (hold)	K-05
KNW-43	Draft items from webinar transcripts and handover recordings.	A transcript produces a draft with links back to the transcript.	V2	K-02
KNW-44	Usage analytics: most used items, never-used items, search misses; per function.	Search misses list the top 20 unanswered questions.	MVP	K-11

44 requirements. Demo numbers for tests are in sheets 14c and 14d.

Knowledge Types and Categories

How every item is described so it can be found: Format, Kind and Category (function, then topic). Blue cells are settings.

A. Format (what it is made of)

Format	What it is
Page	Written in the Hub using a template
File	Upload: PDF, Word, Excel, PowerPoint, image, video
Link	A web or drive link, with a description
Data list	A simple table (register or list)

B. Kind (what it is for): drives the review cycle

Kind	Usual formats	Review every (months)	What it is	Note
SOP / procedure	Page, File	12	Step-by-step how to do a task	
Policy	Page, File	12	Rules the company follows	
Playbook / guideline	Page, File	12	Advice and standards for a team	
FAQ	Page	6	Common questions and answers	
Checklist	Page	12	A list to follow and tick off	
Template / form	File	12	A document people copy and fill in	
Contract / agreement	File	12	Signed agreements; also review 60 days before expiry	
Register / list	Data list	3	A table such as vendors, assets or licences	
Training material	File, Link	12	Decks, guides and videos	
Reference document	File, Link	12	Manuals, specifications, external references	
Report	File	0	A dated report; archived, not re-verified	0 means no review; the item is archived instead
Meeting notes / decision	Page	0	A record of a meeting or decision; archived after 24 months	0 means no review; the item is archived instead

C. Category tree: function, then topic (admins can add, rename, merge)

Function	Topics	Default classification	Default owner (role)
Company-wide	Strategy & goals; Org charts & directories; Brand & communication; Business continuity; Governance	Company-wide	Chief of Staff or admin head
HR	Policies; Hiring; Onboarding & exit; Payroll & benefits; Performance & learning; Compliance (POSH, labour law); Forms & templates	Team	HR operations lead
Finance	Accounting & close; Tax & GST; Payments & vendors; Budgets & reports; Audit & controls	Restricted	Finance manager

Sales & Business Development	Playbooks & pitches; Pricing & proposals; Customer contracts; CRM guides	Team	Sales operations lead
Marketing	Brand assets; Campaign plans; Content guidelines; Analytics reports	Team	Marketing manager
Customer Support & Success	Support SOPs; Escalation guides; FAQs & scripts; Quality standards	Team	Support team lead
Operations	Process SOPs; Vendor management; Quality & audits; Facilities & admin	Team	Operations manager
Technology & Product	Engineering runbooks; Architecture; Security policies; Product docs; Release notes	Team	Engineering manager
Legal & Compliance	Contracts & agreements; Regulatory filings; Data privacy (DPDP); Risk register; Policies register	Confidential	Legal and compliance manager

D. Industry add-ons (extra topics to switch on)

Industry	Extra topics
EdTech and education	Academics (curriculum, accreditation evidence), Admissions (counselling scripts, partner college data)
Healthcare	Clinical protocols, infection control, NABH evidence, equipment manuals
BFSI and fintech	KYC and AML procedures, credit policy, audit evidence, regulator circulars
Retail and FMCG	Store SOPs, planograms, distributor agreements, trade schemes
IT, ITES and BPO	Client process documents, quality scorecards, transition plans, runbooks
E-commerce and logistics	Seller policies, catalogue standards, warehouse SOPs, courier SLAs

E. Classification

Level	Who can see it

Company-wide	Everyone in the company can read it
Team	Members of the space or team
Restricted	Named people and groups; views and edits logged
Confidential	Very few named people; every view and export logged; hidden from search for others

Rules: every item has exactly one Kind and one Category; tags are optional. A function head confirms its topics. The 12 kinds and their review cycles are the lookup used by sheet 14c.

Demo Knowledge Items

164 invented items. Blue = input. Review cycle, next review, status and ownership are formulas that use the as-of date on sheet 14d.

ID	Title	Format	Kind	Function	Category	Owner	Backup owner	Classification	Critical	State	Version	Last revised	Last verified	Cycle (months)	Next review	Days to review	Status	Ownership

Level = highest threshold in sheet 04 section A that the score reaches. Rank in skill = 1 plus the number of people tested on the same skill with a higher score (equal scores share a rank). Required level looks up the person's role in sheet 07. To add records, copy the last row's formulas down and extend the ranges.

Demo Skills Availability: supply, demand and risk

Live formulas over sheet 16. Shows where skills are thin, where one person holds a critical skill, and what to do.

Summary

Employees	36	**Critical gaps (2+ levels short)**	40
Test results	429	**Single points of failure**	9
Requirements met	64%	**Skills with coverage risk**	10

Rules are in sheet 04, section E. Green text is linked from sheet 05; black is calculated. Based on invented demo data.

Demo Pathways, Career Map and Rankings (example output)

Created by the rules in sheet 04 from the demo data. The product produces these automatically (workflows W-03, W-04, W-13).

A. Learning pathways

E003 | Admissions Counsellor | 8 priority skills | about 88 hours | 30 weeks at 3 h/week | longer than 26 weeks: later waves go to the next cycle

Employee	Role	Wave	Skill	Level now to needed	Gap	Priority score	Learn (catalogue)	Practise on the job	Connect	Prove / certificate	Hours	Window	Status

B. Career map: next roles by readiness (tested skills only)

Employee	Now	Next role	Type	Readiness	Skills to close (levels needed)	Skills to test next	Tested	Weeks to close
E003	Admissions Counsellor	Senior Admissions Counsellor	Vertical	42%	Data privacy (DPDP) compliance (+3); POSH awareness & compliance (+2); Ethics & code of conduct (+2)	Coaching & feedback; Negotiation	8 of 10	71
E003	Admissions Counsellor	Student Success Executive	Lateral	58%	Data privacy (DPDP) compliance (+2); POSH awareness & compliance (+1); Ethics & code of conduct (+1)	Student success & retention; Customer communication; Student mentoring	6 of 9	12
E003	Admissions Counsellor	Inside Sales Executive	Lateral	44%	Data privacy (DPDP) compliance (+2); Verbal communication & presentation (+2); CRM discipline (+2)	Prospecting & lead generation; Consultative selling	8 of 10	30
E003	Admissions Counsellor	Customer Success Manager	Lateral	33%	Data privacy (DPDP) compliance (+3); POSH awareness & compliance (+2); Ethics & code of conduct (+2)	Customer success & retention; Account management; Customer communication	4 of 10	31
E016	Software Engineer	Senior Software Engineer	Vertical	47%	System design (+4); Software testing & QA (+2); POSH awareness & compliance (+2)	Java & backend services; Application security; Coaching & feedback	13 of 16	116
E016	Software Engineer	QA Engineer	Lateral	79%	Software testing & QA (+1); POSH awareness & compliance (+1); Information security awareness (+1)	Test automation; Agile & Scrum practice	9 of 11	14
E016	Software Engineer	Data Engineer	Lateral	70%	SQL & databases (+1); POSH awareness & compliance (+1); Information security awareness (+1)	Data engineering & pipelines; Data quality & governance	9 of 11	22
E025	HR Business Partner	HR Head	Vertical	70%	Information security awareness (+2); Employee relations & grievance handling (+2); POSH awareness & compliance (+1)	Strategic thinking; Workforce planning; Learning & development design	8 of 15	80
E025	HR Business Partner	Talent Acquisition Specialist	Lateral	100%	None	Talent acquisition & sourcing; Structured interviewing; CRM discipline	7 of 13	0
E035	Customer Support Executive	Customer Support Team Lead	Vertical	5%	POSH awareness & compliance (+3); Information security awareness (+3); Data privacy (DPDP) compliance (+3)	Team leadership; Escalation handling; Coaching & feedback	7 of 11	72
E035	Customer Support Executive	Voice Process Associate	Lateral	20%	Customer communication (+2); POSH awareness & compliance (+1); Information security awareness (+1)	Voice support handling; Productivity & handle-time management	9 of 11	12
E035	Customer Support Executive	Inside Sales Executive	Lateral	9%	POSH awareness & compliance (+2); Information security awareness (+2); Data privacy (DPDP) compliance (+2)	Telesales & outbound calling; Prospecting & lead generation; Consultative selling	5 of 10	24
E035	Customer Support Executive	Student Success Executive	Lateral	8%	Customer communication (+3); POSH awareness & compliance (+2); Information security awareness (+2)	Student success & retention; Career & course counselling; Student mentoring	6 of 9	28

C. Stack rank by skill (top 5 for four skills)

Skill	Rank	Employee	Role	Score	Level
Customer communication	1	E012	Student Success Executive	71	3
Customer communication	2	E034	Customer Support Executive	65	3
Customer communication	3	E011	Student Success Executive	53	2
Customer communication	4	E010	Student Success Executive	25	1
Customer communication	5	E035	Customer Support Executive	15	0
SQL & databases	1	E023	Data Analyst	96	5
SQL & databases	2	E024	Data Analyst	82	4
SQL & databases	3	E018	Software Engineer	71	3
SQL & databases	4	E017	Software Engineer	64	3
SQL & databases	5	E022	Data Analyst	60	3
Information security awareness	1	E007	College Partnerships Manager	97	5
Information security awareness	2	E021	DevOps Engineer	96	5
Information security awareness	3	E009	College Partnerships Manager	91	5
Information security awareness	4	E019	DevOps Engineer	88	4
Information security awareness	5	E001	Admissions Counsellor	78	4
Admissions counselling	1	E006	Admissions Team Leader	87	4
Admissions counselling	2	E005	Admissions Team Leader	83	4

Admissions counselling	3	E001	Admissions Counsellor	76	4
Admissions counselling	4	E004	Admissions Team Leader	73	3
Admissions counselling	5	E002	Admissions Counsellor	65	3

D. Content gap backlog (what to create next in the AI studio)

Skill	Level band	People who	Action
Data privacy (DPDP) compliance	Applied practice	5	Create with the AI studio (W-05), then expert review
System design	Foundations	4	Create with the AI studio (W-05), then expert review
Ethics & code of conduct	Applied practice	3	Create with the AI studio (W-05), then expert review
AI tools & prompt engineering	Foundations	3	Create with the AI studio (W-05), then expert review
Problem solving	Foundations	2	Create with the AI studio (W-05), then expert review
Cloud infrastructure (AWS or equivalent)	Advanced	2	Create with the AI studio (W-05), then expert review
Data visualisation & BI dashboards	Applied practice	2	Create with the AI studio (W-05), then expert review
Employee relations & grievance handling	Advanced	2	Create with the AI studio (W-05), then expert review
Admissions counselling	Advanced	1	Create with the AI studio (W-05), then expert review
Coaching & feedback	Advanced	1	Create with the AI studio (W-05), then expert review
Team leadership	Advanced	1	Create with the AI studio (W-05), then expert review
CRM discipline	Applied practice	1	Create with the AI studio (W-05), then expert review

Readiness = sum of the person's level (capped at the level needed) divided by the sum of levels needed, on tested skills only. Demo data is invented.

Demo Content Catalogue (seed)

138 illustrative items mapped to skills and level bands. Some bands are missing on purpose to show content-gap detection.

Content ID	Title	Skill ID	From level	To level	Format	Minutes	Source	Language	Certification

C-138	Student success & retention: Applied practice	SK-EDU-14	2	3	Course + case exercise	120	Vendor library	English	No

Placeholders only. Real items also carry owner, review date, accessibility status and the skills they build. Compliance skills use certification courses.

Data Model (logical)

The records and their key fields. Working names; use clear table names.

Record	Purpose	Key fields	Notes
Company	A customer (tenant)	id, name, domain, branding, time zone, settings (score table, weekly hours, horizon, caps, retention)	Owns everything
User	A person who logs in	id, company, name, work email, mobile, role(s), manager, team, location, joining date, language, status	Learner, manager, admin
Role	A job role	id, company, name, industry group, function, level band, version, status	Has RoleSkillRequirement
RoleSkillRequirement	Level a role needs for a skill	role, skill, required level 0-5, importance (core or supporting)	Drives gaps
Skill	A skill	id, domain, name, definition, type, criticality 1-3, level descriptors, status, version	Used by roles, tests, content
CareerPath	A possible move	from role, to role, type (vertical or lateral), status	Career map
SkillTest / Question	Question bank per skill	skill, band, type, text, options, answer key, rubric, source, language, status, approved by, difficulty stats	Expert-approved
TestAttempt / Answer	One person's test	user, test, start, end, score per skill, proctoring level, status, attempt number	Feeds SkillResult
SkillResult	Current level and score for a skill	user, skill, score, level, rank, tested count, percentile, tested on, confirmed by, next review	Stack rank source
Pathway / PathwayStep	A person's plan and steps	user, wave, skill, step type (learn, practise, connect, prove), content, expert, hours, due date, status, progress	Tracked live
ReadinessSnapshot	Career readiness over time	user, target role, readiness, tested count, skills to close, date	Career map
Course / Lesson / Quiz	Learning content	id, title, type, skills, level band, language, owner, review date, certification settings, source, AI flag, version, status	
SimulationScenario / Asset	AR or interactive simulation	scenario file (sheet 10), assets (photo, 360, glb, usdz), version, approved by	Mode A, B, C
Assignment	Training given to a person	user, content, rule, due date, status, reason if skipped	From rules and pathways
LearningEvent (xAPI)	Anything a learner did	user, content, verb, result, score, time, device	Drives progress and points
Session / Registration / Attendance	Live learning	session: time, trainer, link, capacity, audience; registration: reply; attendance: join and leave, credited, override reason	
ProctorSession / ProctorFlag	Proctoring record	attempt, level, consent, snapshots (with expiry), flags (type, time, severity), reviewer, decision, appeal	Retention rules apply
Certificate / Credential	Proof of completion	user, content, issued, expires, certificate ID, status, signed credential, verification code	Open Badges 3.0
PointsLedger / Badge / UserBadge / Challenge	Gamification	user, event, points, cap applied; badge rules; challenge rules and progress	
LeaderboardSnapshot	History of boards	board, scope, window, rank list, date	Daily
WorkflowDefinition / WorkflowRun	Workflows	trigger, conditions, actions, approvals, mode (manual, automated, hybrid), caps; runs with step results and errors	
Notification / Preference	Messages	user, channel, template, sent, opened, acted; preferences: window, channel, quiet hours, opt-ins	
ReportDefinition / ReportRun / Export	Reports	report, filters, schedule, recipients; run; export file, who, when	Logged
AIJob	Every AI generation	type, input, provider, model version, prompt version, output, cost, requested by, reviewer, approval time, label status	Audit and cost
Consent	Permissions recorded	person, purpose (proctoring, avatar likeness, WhatsApp), scope, date, withdrawn date	Privacy

AuditLog	Who did what	user, action, object, old value, new value, reason, time, IP	
KnowledgeSpace / KnowledgeItem	Knowledge Hub	space; item: format, kind, category, title, body or file, owner, backup owner, classification, critical flag, tags, state, review cycle, next review date	Separate module
KnowledgeVersion / KnowledgeRevision	Published versions and every saved change	version: number (major.minor), published date, approver, change note; revision: who, when, what changed, why, linked draft	History is never overwritten
ReviewLog	Each verification	item, reviewer, date, outcome (still correct, updated, retire), comment, next review date set	Separate from versions
KnowledgeKind / KnowledgeCategory	Lookups for types and categories	kind: name, usual formats, review months; category: function, topic, default owner role, default classification	Admin editable
ReminderLog / SnoozeLog	Reminders sent about knowledge reviews	item, person, step (30, 14, 7, due, weekly, escalation), channel, sent, acted, snooze reason	Feeds reports 30 and 32
OwnerAssignment / AccessGrant	Who owns and who can see	item, owner, backup, assigned by, date; grant: person or group, level (viewer, commenter, editor), granted by, expiry	Audit-logged
KnowledgeHealthSnapshot	Weekly scores	function, date, published, current %, overdue, owner coverage, critical current %, search success %, health score	Dashboard trend
SavedView	Library views	owner, name, filters, grouping, sort	Per person or shared
DataList / Column / Row	Simple tables in the Knowledge Hub	list, columns (name, type), rows, views, row history	
AccessRequest	Request access	item, requester, owner, decision, time	

AI Guardrails, Privacy, Security and Legal Rules

Non-negotiable. Reuses the access, audit and claim rules from the company's security design.

A. AI rules

Rule	Detail	Note
1. Humans approve	No AI content reaches learners without human approval; compliance content always needs an expert and L&D approval.	
2. Sources	Every factual statement carries a source passage. No source, no publish.	
3. Personal data	Do not send pay, performance or personal data to an AI service unless the contract and settings allow it; remove names where not needed.	
4. Record	Keep an AIJob record for every generation (input, provider, version, cost, reviewer, approval).	
5. Cost caps	Per-company caps; show the cost before large jobs.	
6. Explain	People can see why a level or learning step was suggested and can challenge it.	
7. Fairness	Before turning on any feature that infers skills from work data, test it for unfair patterns by gender, language and location.	V3 feature
8. Label	Label AI-generated audio and video visibly (sheet 10, section E).	
9. Quality tests	Keep a golden set of 50 real documents with approved outlines and questions; re-run on every model or prompt change; a change must not score lower.	

B. Roles and access

Role	Can do	Note
Learner	Own learning, tests, pathway, career map, leaderboards, knowledge they may see.	
Manager	Own team's results, skills, pathways approvals, reports.	Only their team
L&D admin	People and roles import, skill tests, courses, sessions, workflows, reports.	MFA required
Content author	Create and edit courses and questions; cannot publish alone.	
Expert reviewer	Approve questions, courses, simulations, written-answer scores.	
Proctor reviewer	Review proctoring flags and images for assigned cases.	Access logged
Report viewer / auditor	Read-only reports.	
Super admin	Company settings, integrations, retention.	MFA required
Knowledge roles	Viewer, commenter, editor, owner, backup owner, space owner (function head), knowledge admin, auditor (sheet 14).	

C. Privacy and retention defaults (all settings; confirm periods with a legal adviser)

Topic	Rule	Basis
Consent and notice	Show what is collected and why for skills data, proctoring, WhatsApp and avatars; record consent.	India's data protection law (DPDP)
Right to see and correct	A person can see their skill levels and results, and dispute them.	
Proctoring images and video	Delete after 30 days; keep evidence for an open case until closed.	
Audit and access logs	Keep at least 1 year [R3].	
Test results and levels	Keep for the employment period plus the period set by the company (default 3 years).	Setting
Leaderboard history	Keep 13 months of snapshots (setting).	
Deletion	On request or at exit, delete or anonymise personal data but keep anonymous totals.	
Where data lives	Prefer hosting in India; list every AI provider, where it processes data and the contract terms; allow turning AI features off.	

D. Legal points the product must support

Topic	Rule	Note
POSH Act	Employers with 10 or more employees must run awareness programmes at regular intervals and orient Internal Committee members; the annual report to the District Officer includes the number of programmes held [R2]. The product records programmes, attendance and certificates and exports an audit pack.	The ICC prepares the report; the product supplies the data
Labelling of AI media	Realistic AI-generated audio and video must be clearly labelled [R1].	Confirm with counsel
Certificates	Verification page shows only name, course, date and status.	
Security claims	Do not claim SOC 2 or ISO 27001 compliance, certification or readiness until an auditor has issued it.	Same rule as the company's Trust Center
Accessibility	Meet WCAG 2.1 AA.	
Knowledge access	Default deny: people see only what their space and classification allow, not even titles. Only owners and knowledge admins change access. Dashboards show counts; drill-down shows only items the viewer may open, and hidden items appear as restricted items.	Sheet 14
Knowledge ownership	Every published item has an owner who belongs to the function and (for Critical items) a backup. Items are never left without an owner when someone leaves.	Workflow W-24

UI Screens

Every screen, who uses it, its one main button, and where to see it in the UI deck (slide number).

Screen	Name	Who	Purpose	Main button	Key elements	Deck slide
L-01	Learner home	Learner	Shows the one next step, progress, streak and what is due.	Continue	Next-step card; progress ring; due soon; upcoming session; points and level	5
L-02	My pathway	Learner	Shows waves, skills and the four steps with progress.	Continue	Wave tabs; step list (learn, practise, connect, prove); hours left; manager approval status	7
L-03	Lesson, simulation and course player	Learner	Plays lessons and runs simulations.	Next	Video with captions; quiz; simulation with 2D or AR mode; save and resume	8
L-04	Skill test	Learner	Start, one question per screen, then result with level and rank band.	Start test / Next	Intro with time and tips; progress bar; result: level, rank band, next step	6
L-05	Catalogue	Learner	Find any course.	Search	Search box; filters; cards	Same pattern as L-01
L-06	Certificates and proctored test	Learner	Notice and consent, camera check, then the test; certificates list.	I agree, start / Download	Notice; consent; camera check; certificate list with QR	9
L-07	Career map	Learner	Shows roles to move up or sideways to, readiness and what to learn.	Add to my pathway	Current role in the centre; up and side options; readiness rings; skills to close; skills to test next	10
L-08	Leaderboards	Learner, manager	Live boards with your rank.	See my rank	Tabs; top 10; your row; opt-out toggle	12
L-09	Points, badges and challenges	Learner	Level, badges, streak and the current challenge.	Join challenge	Level bar; badge grid; streak; challenge card	11
L-10	My reminders	Learner	Choose best time and channel; snooze.	Save	Best-time picker; channel toggles; quiet hours	5
M-01	Team home	Manager	Who is on track, who is overdue, what to approve.	Nudge	Team progress; overdue list; approvals; cheer button	13
M-02	Team skills and availability	Manager	Heatmap of levels, gaps and risks.	View pathway	Heatmap by skill and person; risk flags; stack rank	13
M-03	Approvals	Manager	Approve pathways and level changes.	Approve	List with reason and evidence	13
A-01	Admin home	L&D admin	Live tiles and five quick actions.	Assign training	Live metrics; quick actions; alerts	14
A-02	People and roles	L&D admin	Upload employees, map roles, fix errors.	Upload employees	Template download; preview with errors; unmapped list	15
A-03	Roles and skills library	L&D admin	Edit roles, skills, levels and career paths.	Save role	Industry filter; role editor; skill picker with levels; career paths	15
A-04	Skill tests and ranking	L&D admin	Set up a campaign and see results and stack rank.	Send tests	Campaign form; results table; rank by skill; override with reason	15
A-05	AI course studio	L&D admin, author	Three-step wizard to create a course, video or simulation.	Create course	Source; options (video, simulation, certification); review and approve	16
A-06	Sessions and invitations	L&D admin	Schedule a session and send invitations; see the reminder rules for self-paced items.	Send invitations	Form; audience; preview of invitation; RSVP list; reminder preview	17
A-07	Workflows	L&D admin	Turn workflows on, set mode and run now.	Run now	Template list; mode switch (manual, automated, hybrid); When, If, Then builder; history	18
A-08	Reports	L&D admin, manager	Run, export and schedule reports.	Export	Report list; filters; export buttons; schedule	19
A-09	Proctoring review	Proctor reviewer	Review flagged attempts and decide.	Decide	Queue; evidence; decision buttons; appeal	20
A-10	Gamification settings	L&D admin	Points, badges, privacy and challenges.	Save	Points table; badge rules; name display	Same pattern as A-11
A-11	Settings	Super admin	Score table, hours, caps, retention, integrations.	Save	Grouped settings with descriptions	Same pattern
K-01	Knowledge Hub home	Everyone	One search box and Ask, find-by-type chips, spaces, and my items needing attention.	Search	Search; Ask; type chips; spaces; my items strip; recently verified	21
K-07	Library: all knowledge in one view	Everyone (what they may see)	Every item in one list, grouped by type or by category, with status, owner and next review.	Open	Group switch (By type or By category); filters with counts; saved views; status chips; bulk actions	22

K-02	Add knowledge	Contributor	Write, Upload or Link, with AI suggestions.	Save and publish	Three big buttons; template; AI suggestions for kind, category, owner, review date and classification	23
K-03	Knowledge page	Reader, owner	Read an SOP or file with version, verified badge and actions.	Verify / Ask owner	Version; verified badge; owner and backup; next review; History; Turn into course; Request access	24
K-08	Versions, revisions and reviews	Owner, editor, approver	See every version and review, compare two versions, restore.	Compare / Restore	Version list with change notes; review log; side-by-side compare; approve	25
K-09	My items	Owner	One worklist: overdue, due soon, waiting for me, drafts.	Still correct	Counts; rows with Still correct, Update, Hand over, Snooze; backup owner	26
K-10	Reminders and escalation	Owner, function head, knowledge admin	The reminder ladder and what is coming for me.	Remind owners now	Timeline (30, 14, 7, due, weekly, escalations); preview of next messages; settings	27
K-11	Leader dashboard	Leaders, knowledge admin	Knowledge health for the whole company and by function.	Open the list	Health score and trend; tiles; function league table; clickable numbers	28
K-12	Function dashboard	Function head	Knowledge health for one function, by category and by owner.	Remind overdue owners	Tiles; by category; by owner; actions	29
K-05	Access and owners	Owner, knowledge admin	Who can see an item, who owns it, access requests, items without an owner.	Approve	Owner and backup; access list; requests; items without owner; who can do what	30
K-06	Data lists	Any team	Simple tables for registers and lists.	Add row	Columns; views; import and export	31
K-13	Categories	Knowledge admin	Edit the function and topic tree.	Add category	Tree; rename; merge; move; counts	31
K-04	Space	Space owner	Items, members and settings of one space.	Add	Items; members; classification default; backup	Same pattern as K-01

Rules for every screen

One main button: only one primary button per screen; everything else is secondary text or an icon.

Plain words: short labels a new joiner understands (Start learning, Continue, Send invitations, Run now).

Always show the next step: home and pathway screens say what to do next.

Safe actions: preview before sending to many people; Undo for 10 minutes; confirm deletes.

Defaults filled in: forms open with sensible defaults; admins change only what they need.

Helpful empty and error states: say what happened and what to do next, in one sentence.

Short lists: show 5 to 9 items at a time with a clear Show more.

Mobile first: design learner screens for a 360-pixel-wide phone first.

Navigation: Learner has 5 tabs (Home, My path, Learn, Rank, Knowledge); Manager 4 tabs; Admin 6 sections; the Knowledge Hub opens as its own app from the app switcher and has 5 tabs: Home, Library, My items, Dashboard (leaders and function heads), Admin.

Build Order, Suggested Stack and End-to-End Tests

Build in this order. Prove each phase with the tests before moving on.

A. Build order

Phase	Name	What to build	Depends on	Proves with
Phase 1	Foundation	Company and user setup, login and roles, employee upload and role mapping, role and skill libraries, basic catalogue and lesson player, learner home, settings, audit log	None	T-01
Phase 2	The skills loop	Skill tests and question banks, scoring to level, stack rank, gaps, availability, pathway engine, tracking, completion reminders and notification settings	Phase 1	T-02 to T-06
Phase 3	Content and engagement	AI course studio (outline, lessons, quiz, narrated video), 2D simulations, certificates, points, badges, live leaderboards, reports centre	Phase 2	T-07, T-11, T-12, T-14
Phase 4	Compliance and live	Proctoring levels and review queue, mandatory training rules, certificate renewal, live sessions with invitations, workflow engine screens, career map and openings	Phase 3	T-08 to T-10, T-13
Phase 5	Knowledge Hub	Spaces, add and search, the Library view, versions and revisions, review log, reminders and escalation, owner-controlled access, AI answers from verified content, data lists, categories, leader and function dashboards. Can start after Phase 1 with a second engineer	Phase 1	T-15 to T-20
Phase 6	V2 and V3	3D and AR modes, avatar video, HR system sync, single sign-on, cohorts, internal opportunity matching, adaptive tests, custom report builder	Phases 1 to 5	

B. Suggested stack (defaults; change with a written reason)

Area	Default
Front end	Installable web app (progressive web app), React or Next.js with TypeScript; mobile first; Hindi and English.
Back end	Python (FastAPI) or Node (NestJS); REST API plus a live connection (WebSocket or server-sent events) for boards and progress.
Database	PostgreSQL; full-text search and vector search (pgvector) to start.
Queues and cache	Redis for queues, counters and sorted lists (leaderboards); background workers for AI jobs, reports and reminders.
Files	S3-compatible object storage with virus scan; video through a slide renderer and a text-to-speech provider.
AI	One internal AI service in front of the model providers: logging, cost caps, redaction, prompt versions, the golden-set tests.
AR and 3D	A 3D viewer web component with WebXR on Android and AR Quick Look (USDZ) on iPhone [R4, R5]; mode A needs only standard web technology.
Proctoring	Browser APIs (visibility, fullscreen, camera) and an open-source face-presence detector; no emotion detection.
Certificates	PDF generator plus Open Badges 3.0 signing [R6].
Hosting	Containers on a cloud region in India; separate staging and production; daily backups; error monitoring.

C. End-to-end tests (each must pass with the demo data)

Test	Name	What to do and what to expect	Uses	Phase
T-01	Upload and map	Upload the 36 demo employees with roles. Expect: 36 users, 0 unmapped, 36 skill profiles with the right number of required skills.	Sheets 15, 07	Phase 1
T-02	Campaign	Start a skill campaign for all demo employees. Expect: 429 personal test items created, invitations sent once, one question per screen.	Sheet 16	Phase 2
T-03	Score to level and rank	Load the demo scores. Expect: every level, gap, status and rank equals sheet 16.	Sheet 16	Phase 2
T-04	Availability	Expect: the numbers in the sheet 17 summary and every skill's risk flag and route.	Sheet 17	Phase 2
T-05	Pathways	Expect: the same waves, skills, hours, windows and experts as sheet 18 for the four example employees.	Sheet 18	Phase 2
T-06	Reminders	Assign a self-paced course. Expect: no invitation; reminders only inside the learner's window; none after completion; none in quiet hours.	Sheet 12	Phase 2
T-07	Scheduled session	Create a session. Expect: invitations with Accept and Decline; reminders only to those who accepted; attendance credited at 75%; recording becomes a draft lesson.	Sheet 12	Phase 3
T-08	Proctored POSH test	Take a Standard test with a tab switch and a second face. Expect: flags in the review queue; no automatic fail; reviewer clears; certificate issued with working QR page.	Sheet 09	Phase 4
T-09	Certificate expiry	Move a certificate to 60, 30 and 7 days before expiry. Expect: three reminders and a renewal assignment; expired status after expiry.	Sheet 09	Phase 4
T-10	Career map	Open the career map for the example Software Engineer. Expect: the readiness numbers in sheet 18; Add to my pathway merges without duplicates.	Sheet 18	Phase 4
T-11	Leaderboard speed	Complete a lesson. Expect: the board and points change within 5 seconds with no refresh; repeating the lesson earns nothing.	Sheet 11	Phase 3
T-12	Report export	Run Mandatory training compliance and export to Excel. Expect: totals equal the screen; first sheet shows who, when and filters.	Sheet 13	Phase 3
T-13	Workflow modes	Set Completion reminders to Manual. Expect: no automatic sends; Run now shows a preview and sends only after confirm; kill switch stops the queue.	Sheet 03	Phase 4
T-14	AI course and simulation	Create a course from a 20-page SOP with a simulation. Expect: outline, lessons with citations and a quiz; publishing blocked until an expert approves; 2D simulation scores correctly on a phone.	Sheet 10	Phase 3
T-15	Knowledge Hub basics	Add an SOP in 3 clicks with suggested owner and review date. Expect: search finds it; an overdue item is left out of AI answers; a restricted item is invisible to another team; Turn into course works (V2).	Sheet 14a	Phase 5
T-16	Library single view	Load the 164 demo items and open the Library. Expect: counts by kind and function equal the matrix in sheet 14d; By type and By category show the same items; filters combine; bulk Remind owners sends one message per owner.	Sheets 14b to 14d	Phase 5
T-17	Versions and revisions	Update a published item: edit and save twice, add a change note, approve. Expect: two revisions, the published version stayed live with an Update in progress tag, a new version number, Compare highlights changes, Restore creates a new version, a Still correct review adds a log line but no version.	Sheet 14	Phase 5
T-18	Reminders and escalation	Set the as-of date to each step for one item. Expect: reminders at 30, 14, 7 days and on the due date (backup copied from 14 days), weekly while overdue, function head at 14 days overdue, admin and AI exclusion at 30 days, archive suggestion at 90 days; one message per owner per day; Snooze works twice.	Sheet 14	Phase 5

T-19	Access and ownership	Sign in as a user without access. Expect: the item and its title are not visible in Library, search or dashboards; Request access reaches the owner; a reminder follows after 2 days; approval is logged. Mark an owner as leaving: items move to the backup and the function head must confirm.	Sheet 14	Phase 5
T-20	Dashboards	With the as-of date 7 Oct 2026, open the leader dashboard and the HR function dashboard. Expect: every number, the health score and the rank equal sheet 14d; a function head cannot open another function; clicking Overdue opens the Library filtered to those items.	Sheet 14d	Phase 5

D. Definition of done (every feature)

Check
1. Works on a 360-pixel phone and a laptop.
2. Passes the accessibility scan and a keyboard-only check.
3. Has an audit-log entry for important actions.
4. Respects roles and company separation (tested with two companies).
5. Every default is in settings, not in code.
6. Has a manual way and, where relevant, a preview and an undo.
7. The acceptance criteria in sheet 02 or 14a pass.
8. Plain-language labels and helpful empty and error states.
